Projector

CP-X4021N/CP-X5021N/CP-WX4021N

User's Manual (detailed) Operating Guide

Thank you for purchasing this projector.

▲ **WARNING** ► Before using this product, please read all manuals for this product. Be sure to read **User's Manual - Safety Guide** first. After reading them, store them in a safe place for future reference.

About this manual

A CAUTION

Various symbols are used in this manual. The meanings of these symbols are described below.

▲ WARNING This symbol indicates information that, if ignored, could possibly

result in personal injury or even death due to incorrect handling.

This symbol indicates information that, if ignored, could possibly

result in personal injury or physical damage due to incorrect

handling.

NOTICE This entry notices of fear of causing trouble.

Please refer to the pages written following this symbol.

NOTE • The information in this manual is subject to change without notice.

- The manufacturer assumes no responsibility for any errors that may appear in this manual.
- The reproduction, transfer or copy of all or any part of this document is not permitted without express written consent.

Projector

User's Manual - Safety Guide

Thank you for purchasing this projector.

WARNING • Before using, read these user's manuals of this projector to ensure correct usage through understanding. After reading, store them in a safe place for future reference. Incorrect handling of this product could possibly result in personal injury or physical damage. The manufacturer assumes no responsibility for any damage caused by mishandling that is beyond normal usage defined in these manuals of this projector.

NOTE • The information in this manual is subject to change without notice.

- The manufacturer assumes no responsibility for any errors that may appear in this manual.
- The reproduction, transmission or use of this document or contents is not permitted without express written authority.

About The Symbols

Various symbols are used in this manual, the user's manual and on the product itself to ensure correct usage, to prevent danger to the user and others, and to prevent property damage. The meanings of these symbols are described below. It is important that you read these descriptions thoroughly and fully understand the contents.

| ⚠ WARNING | This symbol indicates information that, if ignored, could possibly result in personal injury or even death due to incorrect handling. |
|------------------|--|
| ⚠ CAUTION | This symbol indicates information that, if ignored, could result possibly in personal injury or physical damage due to incorrect handling. |

Typical Symbols

This symbol indicates an additional warning (including cautions). An illustration is provided to clarify the contents.

This symbol indicates a prohibited action. The contents will be clearly indicated in an illustration or nearby (the symbol to the left indicates that disassembly is prohibited).

This symbol indicates a compulsory action. The contents will be clearly indicated in an illustration or nearby (the symbol to the left indicates that the power plug should be disconnected from the power outlet).

Safety Precautions

↑ WARNING

Never use the projector if a problem should occur.

Abnormal operations such as smoke, strange odor, no image, no sound, excessive sound, damaged casing or elements or cables, penetration of liquids or foreign matter, etc. can cause a fire or electrical shock.

In such case, immediately turn off the power switch and then disconnect the power plug from the power outlet. After making sure that the smoke or odor has stopped, contact your dealer. Never attempt to make repairs yourself because this could be dangerous.

power outlet.

• The power outlet should be close to the projector and easily accessible.

Use special caution for children and pets.

Incorrect handling could result in fire, electrical shock, injury, burn or vision problem.

Use special caution in households where children and pets are present.

Do not insert liquids or foreign object.

Penetration of liquids or foreign objects could result in fire or electrical shock. Use special caution in households where children are present.

If liquids or foreign object should enter the projector, immediately turn off the power switch, disconnect the power plug from the power outlet and contact your dealer.

- Do not place the projector near water (ex. a bathroom, a beach, etc.).
- Do not expose the projector to rain or moisture. Do not place the projector outdoors.
- Do not place flower vases, pots, cups, cosmetics, liquids such as water, etc on or around the projector.
- Do not place metals, combustibles, etc on or around the projector.
- To avoid penetration of foreign objects, do not put the projector into a case or bag together with any thing except the accessories of the projector, signal cables and connectors.

Never disassemble and modify.

The projector contains high voltage components. Modification and/or disassembly of the projector or accessories could result in fire or electrical shock.

· Ask your dealer to repair and clean insider.

Do not give the projector any shock or impact.

If the projector should be shocked and/or broken, it could result in an injury, and continued use could result in fire or electrical shock.

If the projector is shocked, immediately turn off the power switch, disconnect the power plug from the power outlet and contact your dealer.

Do not place the projector on an unstable surface.

If the projector should be dropped and/or broken, it could result in an injury, and continued use could result in fire or electrical shock.

- Do not place the projector on an unstable, slant or vibrant surface such as a wobbly or inclined stand.
- Use the caster brakes placing the projector on a stand with casters.
- Do not place the projector in the side up position, the lens up position or the lens down position.
- In the case of a ceiling installation or the like, contact your dealer before installation.

Do not disassemble.

№ WARNING

Be cautious of High temperatures of the projector.

High temperatures are generated when the lamp is lit. It could result in fire or burn. Use special caution in households where children are present.

Do not touch about the lens, air fans and ventilation openings during use or immediately after use, to prevent a burn. Take care of ventilation.

- Keep a space of 30 cm or more between the sides and other objects such as walls.
- Do not place the projector on a metallic table or anything weak in heat.
- Do not place anything about the lens, air fans and ventilation openings of the projector.
- Never block the air fan and ventilation openings.
- Do not cover the projector with a tablecloth, etc.
- Do not place the projector on a carpet or bedding.

Never look through the lens or openings when the lamp is on.

The powerful light could adversely affect vision.

Use special caution in households where children are present.

Use only the correct power cord and the correct power outlet. Incorrect power supply could result in fire or electrical shock.

- Use only the correct power outlet depending on the indication on the projector and the safety standard.
- The enclosed power cord must be used depending on the power outlet to be used.

Be cautious of the power cord connection.

Incorrect connection of the power cord could result in fire or electrical shock.

- Do not touch the power cord with a wet hand.
- Check that the connecting portion of the power cord is clean (with no dust), before using. Use a soft and dry cloth to clean the power plug.
- Insert the power plug into a power outlet firmly. Avoid using a loose, unsound outlet or contact failure.

Be sure to connect with ground wire.

Connect the ground terminal of AC inlet of this unit with the ground terminal provided at the building using the correct power cord; otherwise, fire or electric shock can result.

· Don't take the core of power cord away.

Surely connect the ground wire.

WARNING

Be careful in handling the light source lamp.

The projector uses a high-pressure mercury glass lamp made of glass. The lamp can break with a loud bang, or burn out. When the bulb bursts, it is possible for shards of glass to fly into the lamp housing, and for gas containing mercury to escape from the projector's vent holes.

Please carefully read the section "Lamp".

Be careful in handling the power cord and external connection cables.

If you keep using a damaged the power cord or cables, it can cause a fire or electrical shock. Do not apply too much heat, pressure or tension to the power cord and cables.

If the power cord or cables is damaged (exposed or broken core wires, etc.), contact your dealer.

• Do not place the projector or heavy objects on the power cord and cables. Also, do not place a spread, cover, etc, over them because this could result in the inadvertent placing of heavy objects on the concealed power cord or cables.

- Do not place the cord near the heater.
- Avoid bending the power cord sharply.
- Do not attempt to work on the power cord.

Be careful in handling the battery of the remote control.

Incorrect handling of the battery could result in fire or personal injury. The battery may explode if not handled properly.

- Keep the battery away from children and pets. If swallowed consult a physician immediately for emergency treatment.
- Do not allow the battery in a fire or water.
- Avoid fire or high-temperature environment.
- Do not hold the battery with the metallic tweezers.
- Keep the battery in a dark, cool and dry play.
- Do not short circuit the battery.
- Do not recharge, disassemble or solder the battery.
- Do not give the battery a physical impact.
- Use only the battery specified in the other manual of this projector.
- · Make sure the plus and minus terminals are correctly aligned when loading
- If you observe a leakage of the battery, wipe out the flower and then replace the battery. If the flower adheres your body or clothes, rinse well with
- · Obey the local laws on disposing the battery.

⚠ CAUTION

Be careful in moving the projector.

Neglect could result in an injury or damage.

- Do not move the projector during use. Before moving, disconnect the power cord and all external connections, and close the slide lens door or attach the lens cap.
- Avoid any impact or shock to the projector.
- · Do not drag the projector.
- For moving the projector, use the enclosed case or bag if provided.

Do not put anything on top of the projector.

Placing anything on the projector could result in loss of balance or falling, and cause an injury or damage. Use special caution in households where children are present.

Do not attach anything other than specified things to the projector. Neglect could result in an injury or damage.

· Some projector has a screw thread in a lens part. Do not attach anything other than specified options (such as conversion lens) to the screw thread.

Avoid a smoky, humid or dusty place.

Placing the projector in a smoke, a highly humid, dusty place, oily soot or corrosive gas could result in fire or electrical shock.

- Do not place the projector near a smoky, humid or dusty place (ex. a smoking space, a kitchen, a beach, etc.). Do not place the projector outdoors.
- Do not use a humidifier near the projector.

Take care of the air filter to normal ventilate.

The air filter should be cleaned periodically. If the air filter becomes clogged by dust or the like, internal temperature rises and could cause malfunction. The projector may display the message such as "CHECK THE AIR FLOW" or turn off the projector, to prevent the internal heat level rising.

- When the indicators or a message prompts you to clean the air filter, clean the air filter as soon as possible.
- If the soiling will not come off the air filter, or it becomes damaged, replace the air filter.
- Use the air filter of the specified type only. Please order the air filter specified in the other manual of this projector to your dealer.
- When you replace the lamp, replace also the air filter. The air filter may be attached when you buy a replacement lamp for this projector.
- Do not turn on the projector without air filter.

Avoid a high temperature environment.

The heat could have adverse influence on the cabinet of the projector and other parts. Do not place the projector, the remote control and other parts in direct sunlight or near a hot object such as heater, etc.

Avoid Magnetism.

Manufacture strongly recommends to avoid any magnetic contact that is not shielded or protected on or near the projector itself. (ie.,. Magnetic Security Devices, or other projector accessory that contains magnetic material that has not been provided by the manufacture etc.) Magnetic objects may cause interruption of the projector's internal mechanical performance which may interfere with cooling fans speed or stopping, and may cause the projector to completely shut down.

↑ CAUTION

Remove the power cord for complete separation.

- For safety purposes, disconnect the power cord if the projector is not to be used for prolonged periods of time.
- Before cleaning, turn off and unplug the projector. Neglect could result in fire or electrical shock.

Disconnect the plug from the power outlet.

Ask your dealer to cleaning inside of the projector about every year.

Accumulations of dust inside the projector cause result in fire or malfunction. Cleaning inside is more effective if performed before every humid periods such as rainy season.

• Do not clean inside yourself because it is dangerous.

NOTE

Do not give the remote control any physical impact.

A physical impact could cause damage or malfunction of the remote control.

- Take care not to drop the remote control.
- Do not place the projector or heavy objects on the remote control.

Take care of the lens.

- Close the slide lens door or attach the lens cap to prevent the lens surface being scratched when the projector is not used.
- Do not touch the lens to prevent fog or dirt of the lens that cause deterioration of display quality.
- Use commercially available lens tissue to clean the lens (used to clean cameras, eyeglasses, etc.). Be careful not to scratch the lens with hard objects.

Take care of the cabinet and the remote control.

Incorrect care could have adverse influence such as discoloration, peeling paint, etc.

- Use a soft cloth to clean the cabinet and control panel of the projector and the remote control. When excessively soiled dilute a neutral detergent in water, wet and wring out the soft cloth and afterward wipe with a dry soft cloth. Do not use undiluted detergent directly.
- Do not use an aerosol sprays, solvents, volatile substances or abrasive cleaner.
- Before using chemical wipes, be sure to read and observe the instructions.
- Do not allow long-term close contact with rubber or vinyl.

About bright spots or dark spots.

Although bright spots or dark spots may appear on the screen, this is a unique characteristic of liquid crystal displays, and such do not constitute or imply a machine defect.

Be careful of printing of the LCD panel.

If the projector continues projecting a still image, inactive images or 16:9 aspect images in case of 4:3 panel, etc., for long time, the LCD panel might possibly be printed.

NOTE

About consumables.

Lamp, LCD panels, polarizors and other optical components, and air filter and cooling fans have a different lifetime in each. These parts may need to be replaced after a long usage time.

- This product isn't designed for continuous use of long time. In the case of continuous use for 6 hours or more, or use for 6 hours or more every day (even if it isn't continuous), or repetitious use, the lifetime may be shortened, and these parts may need to be replaced even if one year has not passed since the beginning of using.
- Any inclining use beyond the adjustment range explained in these user's manuals may shorten the lifetimes of the consumables.

Before turning on the power, make the projector cool down adequately.

After turning the projector off, pushing the restart switch or interrupting of the power supply, make the projector cool down adequately. Operation in a high temperature state of the projector causes a damage of the electrode and un-lighting of the lamp.

Avoid strong rays.

Any strong ray (such as direct rays of the sun or room lighting) onto the remote control sensors could invalidate the remote control.

Avoid radio interference.

Any interfering radiation could cause disordered image or noises.

• Avoid radio generator such as a mobile telephone, transceiver, etc. around the projector.

About displaying characteristic.

The display condition of the projector (such as color, contrast, etc.) depends on characteristic of the screen, because the projector uses a liquid crystal display panel. The display condition can differ from the display of CRT.

• Do not use a polarized screen. It can cause red image.

Turn the power on/off in right order.

To prevent any trouble, turn on/off the projector in right order mentioned below unless specifying.

- Power on the projector before the computer or video tape recorder.
- Power off the projector after the computer or video tape recorder.

Take care not to fatigue your eyes.

Rest the eyes periodically.

Set the sound volume at a suitable level to avoid bothering other people.

• It is better to keep the volume level low and close the windows at night to protect the neighborhood environment.

Connecting with notebook computer

When connecting with notebook computer, set to valid the RGB external image output (setting CRT display or simultaneous display of LCD and CRT).

Please read instruction manual of the notebook for more information.

Lamp

↑ WARNING

HIGH VOLTAGE HIGH TEMPERATURE HIGH PRESSURE

The projector uses a high-pressure mercury glass lamp. The lamp can <u>break with a loud bang</u>, or <u>burn out</u>, if jolted or scratched, handled while hot, or worn over time. Note that each lamp has a different lifetime, and some may burst or burn out soon after you start using them. In addition, when the bulb bursts, it is possible for <u>shards of glass</u> to fly into the lamp housing, and for <u>gas containing mercury</u> to escape from the projector's vent holes.

About disposal of a lamp • This product contains a mercury lamp; do not put in trash. Dispose of in accord with environmental laws.

For lamp recycling, go to www.lamprecycle.org. (in USA)

For product disposal, contact your local government agency or www.eiae.org (in the US) or www.epsc.ca (in Canada).

For more information, call your dealer.

Disconnect the plug from the power outlet

- If the lamp should break (it will make a loud bang when it does), unplug the power cord from the outlet, and make sure to request a replacement lamp from your local dealer. Note that shards of glass could damage the projector's internals, or cause injury during handling, so please do not try to clean the projector or replace the lamp yourself.
- If the lamp should break (it will make a loud bang when it does), ventilate the room well, and make sure not to breathe the gas that comes out of the projector vents, or get it in your eyes or mouth.
- Before replacing the lamp, make sure the power switch is off and the power cable is not plugged in, then wait at least 45 minutes for the lamp to cool sufficiently. Handling the lamp while hot can cause burns, as well as damaging the lamp.

- Do not open the lamp cover while the projector is suspended from above. This is dangerous, since if the lamp's bulb has broken, the shards will fall out when the cover is opened. In addition, working in high places is dangerous, so ask your local dealer to have the lamp replaced even if the bulb is not broken.
- Do not use the projector with the lamp cover removed. At the lamp replacing, make sure that the screws are screwed in firmly. Loose screws could result in damage or injury.
- Use the lamp of the specified type only.
- If the lamp breaks soon after the first time it is used, it is possible that there are electrical problems elsewhere besides the lamp. If this happens, contact your local dealer or a service representative.

- Handle with care: jolting or scratching could cause the lamp bulb to burst during use.
- Using the lamp for long periods of time, could cause it dark, not to light up
 or to burst. When the pictures appear dark, or when the color tone is poor,
 please replace the lamp as soon as possible. Do not use old (used) lamps;
 this is a cause of breakage.

Regulatory Notices

FCC Statement Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

WARNING: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

INSTRUCTIONS TO USERS: This equipment complies with the requirements of FCC (Federal Communication Commission) equipment provided that the following conditions are met. Some cables have to be used with the core set. Use the accessory cable or a designated-type cable for the connection. For cables that have a core only at one end, connect the core to the projector.

CAUTION: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

For the Customers in CANADA

NOTICE: This Class B digital apparatus complies with Canadian ICES-003.

Warranty And After-Service

Unless seen any abnormal operations (mentioned with the first paragraph of WARNING in this manual), when a problem occurs with the equipment, first refer to the "Troubleshooting" section of the "Operating Guide", and run through the suggested checks. If this does not resolve the problem contact your dealer or service company. They will tell you what warranty condition is applied.

RESOLUTION

HDMI RANGE, COMPUTER IN, FRAME LOCK,

Introduction

Features

The projector provides you with the broad use by the following features.

- ✓ This projector has a variety of I/O ports that supposedly cover for any business scene. The HDMI port can support various image equipment which have digital interface to get clearer pictures on a screen.
- ✓ This projector has a 1.7 times optical zoom, horizontal and vertical manual lens shift, allowing flexible installation.
- ✓ If you insert a USB storage device, such as a USB memory, into the USB TYPE A port and select the port as the input source, you can view images stored in the device.
- ✓ This projector can be controlled and monitored via LAN connection.
- ✓ The built-in 16W speaker can deliver sufficient sound volume in a large space like a classroom without external speakers.

Checking the contents of package

Please see the **Contents of package** section in the **User's Manual (concise)** which is a book. Your projector should come with the items shown there. Require of your dealer immediately if any items are missing.

NOTE • Keep the original packing materials, for future reshipment. Be sure to use the original packing materials when moving the projector. Use special caution for the lens.

• The projector may make a rattling sound when tilted, moved or shaken, since a flap to control the air flow inside of the projector has moved. Be aware that this is not a failure or malfunction.

- **△WARNING** ► Do not open or remove any portion of the product, unless the manuals direct it.
- ▶ Do not subject the projector to unstable conditions.
- ▶ Do not apply a shock or pressure to this product.
- ▶ Do not look into the lens and the openings on the projector while the lamp is on.
- ▶ Keep the pocket caps away from children and pets. Make sure they do not swallow the caps. If swallowed consult a physician immediately for emergency treatment.

△ CAUTION ▶ Do not touch around the lamp cover and the exhaust vents during use or just after use, since it is too hot.

Back of the remote control

Setting up

Install the projector according to the environment and manner the projector will be used in.

For the case of installation in a special state such as ceiling mount, the specified mounting accessories (Specifications in the User's manual (concise)) and service may be required. Before installing the projector, consult your dealer about your installation.

Arrangement

Refer to the following tables **T-1** and **T-2** to determine the screen size and projection distance. The values shown in the table are calculated for a full size screen.

- $\mathbb{H} \times \mathbb{V}$: Screen size
- (a): Projection distance (from the projector's end)
- (b), (c): Screen height

T-1: CP-X4021N, CP-X5021N

- ▲ WARNING ► Install the projector where you can access the power outlet easily. If an abnormality should occur, unplug the projector urgently. Otherwise it could cause a fire or electric shock.
- ▶ Do not subject the projector to unstable conditions. If the projector falls or topples over, it could result in injury or damage to the projector and the surrounding things. Using a damaged projector could result in a fire and an electric shock.
- Do not place the projector in unstable places, such as an inclined surface, places subject to vibration, on top of a wobbly table or cart, or a surface that is smaller than the projector.
- Do not put the projector on its side, front or rear position.
- Do not attach nor place anything on the projector unless otherwise specified in the manual.
- Do not use any mounting accessories except the accessories specified by the manufacturer. Read and keep the manuals of the accessories used.
- For special installation such as ceiling mounting, be sure to consult your dealer beforehand.

(continued on next page)

Arrangement (continued)

- **★WARNING** Do not install the projector near thermally conductive or flammable things. Such things when heated by the projector could result in a fire and burns.
- Do not place the projector on a metal stand.
- ▶ Do not place the projector where any oils, such as cooking or machine oil, are used. Oil may harm the product, resulting in malfunction, or falling from the mounted position.
- ▶ Do not place the projector in a place where it may get wet. Getting the projector wet or inserting liquid into the projector could cause a fire and an electric shock, and damage the projector.
- Do not place the projector near water, such as in a bathroom, kitchen, or poolside.
- Do not place the projector outdoors or by the window.
- Do not place anything containing liquid near the projector.
- **△ CAUTION** ► Place the projector in a cool place with sufficient ventilation. The projector may shutdown automatically or may malfunction if its internal temperature is too high.

Using a damaged projector could result in a fire and an electric shock.

- Do not place the projector in direct sunlight or near hot objects such as heaters.
- Keep a space of 30 cm or more between a side of the projector and other objects such as walls.
- Do not place the projector on carpet, cushions or bedding.
- Do not stop up, block nor cover the projector's vent holes. Do not place anything around the projector that could be sucked in or stuck to the projector's intake vents.
- Do not place the projector at places that are exposed to magnetic fields, doing so can cause the cooling fans inside the projector to malfunction.
- ► Avoid placing the projector in smoky, humid or dusty place. Placing the projector in such places could cause a fire, an electric shock and malfunction of the projector.
- Do not place the projector near humidifiers. Especially for an ultrasonic humidifier, chlorine and minerals contained in tap water are atomized and could be deposited in the projector causing image degradation or other problems.
- Do not place the projector in a smoking area, kitchen, passageway or by the window.
- **NOTICE** Position the projector to prevent light from directly hitting the projector's remote sensor.
- Do not place the product in a place where radio interference may be caused.
- Keep heat-sensitive things away from the projector. Otherwise, they may be damaged by the heat from the projector.

Connecting with your devices

Before connecting the projector to a device, consult the manual of the device to confirm that the device is suitable for connecting with this projector and prepare the required accessories, such as a cable in accord with the signal of the device. Consult your dealer when the required accessory did not come with the product or the accessory is damaged.

After making sure that the projector and the devices are turned off, perform the connection, according to the following instructions. Refer to the figures in subsequent pages.

Before connecting the projector to a network system, be sure to read **User's Manual - Network Guide** too.

- **★WARNING** ► Use only the appropriate accessories. Otherwise it could cause a fire or damage the projector and devices.
- Use only the accessories specified or recommended by the projector's manufacturer. It may be regulated under some standard.
- Neither disassemble nor modify the projector and the accessories.
- Do not use the damaged accessory. Be careful not to damage the accessories. Route a cable so that it is neither stepped on nor pinched out.

△ CAUTION ► For a cable with a core at only one end, connect the end with the core to the projector. That may be required by EMI regulations.

- **NOTE** Do not turn on or off the projector while connected to a device in operation, unless that is directed in the manual of the device. Otherwise it may cause malfunction in the device or projector.
- The function of some input ports can be selected according to your usage requirements. Check the reference page indicated beside each port in the following illustration.
- Be careful not to mistakenly connect a connector to a wrong port. Otherwise it may cause malfunction in the device or projector.
- When connecting a connector to a port, make sure that the shape of the connector fits the port.
- Tighten the screws to connect a connector equipped with screws to a port.
- Use the cables with straight plugs, not L-shaped ones, as the input ports of the projector are recessed.

About Plug-and-Play capability

- Plug-and-Play is a system composed of a computer, its operating system and peripheral equipment (i.e. display devices). This projector is VESA DDC 2B compatible. Plug-and-Play can be used by connecting this projector to a computer that is VESA DDC (display data channel) compatible.
- Take advantage of this feature by connecting a computer cable to the **COMPUTER IN1** port (DDC 2B compatible). Plug-and-Play may not work properly if any other type of connection is attempted.
- Please use the standard drivers in your computer as this projector is a Plugand-Play monitor.

Computer

NOTE • Before connecting the projector to a computer, consult the computer's manual and check the compatibility of the signal level, the synchronization methods and the display resolution output to the projector.

- Some signal may need an adapter to input this projector.
- Some computers have multiple screen display modes that may include some signals which are not supported by this projector.
- Although the projector can display signals with resolution up to UXGA (1600X1200), the signal will be converted to the projector's panel resolution before being displayed. The best display performance will be achieved if the resolutions of the input signal and the projector panel are identical.
- If you connect this projector and a notebook computer, you need output the display to an external monitor, or output simultaneously to the internal display and an external monitor. Consult the computer's manual for the setting.
- Depending on the input signal, the automatic adjustment function of this projector may take some time and not function correctly.
- Note that a composite sync signal or sync-on-green signal may confuse the automatic adjustment function of this projector (41).
- If the automatic adjustment function does not work correctly, you may not see
 the dialog to set the display resolution. In such a case, use an external display
 device. You may be able to see the dialog and set an appropriate display
 resolution.

- **△ CAUTION** ► Before connecting the projector to a network system be sure to obtain the consent of the administrator of the network.
- ▶ Do not connect the **LAN** port to any network that might have the excessive voltage.
- ▶ Before removing the USB storage device from the port of the projector, be sure to use the REMOVE USB function on the thumbnail screen to secure your data. (♣80)

NOTE • If an oversized USB storage device blocks the **LAN** port, use a USB extension cable to connect the USB storage device.

(continued on next page)

NOTE • The **HDMI** port of this model is compatible with HDCP (High-bandwidth Digital Content Protection) and therefore capable of displaying a video signal from HDCP compatible DVD players or the like.

- The HDMI supports the following video signals: 480i@60,480p@60,576i@50,576p@50,720p@50/60,1080i@50/60,1080p@50/60
- This projector can be connected with another equipment that has HDMI connector, but with some equipment the projector may not work properly, something like no video.
- Be sure to use an HDMI cable that has the HDMI logo.
- When the projector is connected with a device having DVI connector, use a DVI to HDMI cable to connect with the HDMI input.

(continued on next page)

NOTE • If a loud feedback noise is produced from the speaker, move the microphone away from the speaker.

• This projector doesn't support plug-in power for the microphone.

Microphone function

• You can connect a dynamic microphone to the **MIC** port with a 3.5 mm mini-plug. In that case, the built-in speaker outputs the sound from the microphone, even while the sound from the projector is output. You can input line level signal to the **MIC** port from equipment such as wireless microphone. Select HIGH in the MIC LEVEL item of the AUDIO menu when you input line level audio signal to the **MIC** port. In the normal mode, the volume of the microphone can be adjusted separately from the volume of the projector using the menu. (\$\supersquare\$46, 47\$) In the standby mode, the volume of the microphone is adjustable with the **VOLUME +/-** buttons on the remote control, in synchronization with the volume of the projector. (\$\supersquare{19}\$19)

Even when the sound of projector is set to mute mode by the AUDIO SOURCE function (446), the volume of the microphone is adjustable.

In both modes (standby or normal), the **MUTE** button on the remote control works on the sounds of the microphone and the projector. (19)

• This projector doesn't support plug-in power for the microphone.

Connecting to a power supply

- 1. Put the connector of the power cord into the **AC IN** (AC inlet) of the projector.
- 2. Firmly plug the power cord's plug into the outlet. In a couple of seconds after the power supply connection, the **POWER** indicator will light up in steady orange.

Please remember that when the DIRECT POWER ON function activated (454), the connection of the power supply make the projector turn on.

► WARNING ► Please use extra caution when connecting the power cord, as incorrect or faulty connections may result in fire and/or electrical shock.

- Only use the power cord that came with the projector. If it is damaged, consult your dealer to get a new one.
- Only plug the power cord into an outlet whose voltage is matched to the power cord. The power outlet should be close to the projector and easily accessible.
 Remove the power cord for complete separation.
- Never modify the power cord.

Using the security bar and slot

A commercially available anti-theft chain or wire can be attached to the security bar on the projector. Refer to the figure to choose an anti-theft chain or wire.

Also this product has the security slot for the Kensington lock.

For details, see the manual of the security tool.

► WARNING Do not use the security bar and slot to prevent the projector from falling down, since it is not designed for it.

△CAUTION ► Do not place anti-theft chain or wire near the exhaust vents. It may become too hot.

NOTE • The security bar and slot is not comprehensive theft prevention measures. It is intended to be used as supplemental theft prevention measure.

Remote control

Installing the batteries

Please insert the batteries into the remote control before using it. If the remote control starts to malfunction, try to replace the batteries. If you will not use the remote control for long period, remove the batteries from the remote control and store them in a safe place.

- 1 Holding the hook part of the battery cover, remove it.
- 2. Align and insert the two AA batteries (HITACHI MAXELL, Part No.LR6 or R6P) according to their plus and minus terminals as indicated in the remote control.

Replace the battery cover in the direction of the arrow and snap it back into place.

▲ **WARNING** ► Always handle the batteries with care and use them only as directed. Improper use may result in battery explosion, cracking or leakage, which could result in fire, injury and/or pollution of the surrounding environment.

- Be sure to use only the batteries specified. Do not use batteries of different types at the same time. Do not mix a new battery with used one.
- Make sure the plus and minus terminals are correctly aligned when loading a battery.
- Keep a battery away from children and pets.
- Do not recharge, short circuit, solder or disassemble a battery.
- Do not place a battery in a fire or water. Keep batteries in a dark, cool and dry place.
- If you observe battery leakage, wipe out the leakage and then replace a battery. If the leakage adheres to your body or clothes, rinse well with water immediately.
- Obey the local laws on disposing the battery.

About the remote control signal

The remote control works with the projector's remote sensor. This projector has a remote sensor on the front. The sensor senses the signal within the following range when the sensor is active:

60 degrees (30 degrees to the left and right of the sensor) within 3 meters about.

NOTE • The remote control signal reflected in the screen or the like may be available. If it is difficult to send the signal to the sensor directly, attempt to make the signal reflect.

- The remote control uses infrared light to send signals to the projector (Class 1 LED), so be sure to use the remote control in an area free from obstacles that could block the remote control's signal to the projector.
- The remote control may not work correctly if strong light (such as direct sun light) or light from an extremely close range (such as from an inverter fluorescent lamp) shines on the remote sensor of the projector. Adjust the position of projector avoiding those lights.

(2)

Changing the frequency of remote control signal

The accessory remote control has the two choices on signal frequency Mode 1:NORMAL and Mode 2:HIGH. If the remote control does not function properly, attempt to change the signal frequency. In order to set the Mode, please keep pressing the combination of two buttons listed below simultaneously for about 3 seconds.

- (1) Set to Mode 1:NORMAL... **VOLUME -** and **RESET** buttons
- (2) Set to Mode 2:HIGH... MAGNIFY OFF and ESC buttons

Please remember that the REMOTE FREQ. in the SERVICE item of the OPTION menu (\$\subseteq 60\$) of the projector to be controlled should be set to the same mode as the remote control.

The accessory remote control works as a simple mouse and keyboard of the computer, when the projector's **USB TYPE B** port and the computer's type A USB port are connected and MOUSE is selected for the USB TYPE B item in the OPTION menu (\$\square\$5.

- (2) PAGE DOWN key: Press PAGE DOWN button.
- (3) Mouse left button: Press ENTER button.
- (4) Move pointer: Use the cursor buttons \blacktriangle , \blacktriangledown , \blacktriangleleft and \blacktriangleright .
- (5) ESC key: Press ESC button.
- (6) Mouse right button: Press RESET button.

▲ NOTICE ► Improper use of the simple mouse & keyboard function could damage your equipment. While using this function, please connect this product only to a computer. Be sure to check your computer's manuals before connecting this product to the computer.

NOTE When the simple mouse & keyboard function of this product does not work correctly, please check the following.

- When a USB cable connects this projector with a computer having a built-in pointing device (e.g. track ball) like a laptop PC, open BIOS setup menu, then select the external mouse and disable the built-in pointing device, because the built-in pointing device may have priority to this function.
- Windows 95 OSR 2.1 or higher is required for this function. And also this function may not work depending on the computer's configurations and mouse drivers. This function can work with the computer which can operate general USB mouse or keyboard.
- You cannot do things like press two buttons at once (for instance, pressing two buttons at the same time to move the mouse pointer diagonally).
- This function is activated only when the projector is working properly. This function is not available in any of the following cases:
- While the lamp is warming up. (The **POWER** indicator blinks in green.)
- When either **USB TYPE A** or **USB TYPE B** port is selected.
- While displaying BLANK (Q28), TEMPLATE (Q52) or MY IMAGE (Q67) screen.
- When any menu is displayed on the screen.
- While using the cursor buttons to operate the sound or screen functions such as adjusting the sound volume, correcting the keystone, correcting the picture position and magnifying the screen.

Power on/off

Turning on the power

- Make sure that the power cord is firmly and correctly connected to the projector and the outlet.
- 2. Make sure that the **POWER** indicator is steady orange (\$\sup\$97). Then remove the lens cover.
- 3. Press **STANDBY/ON** button on the projector or the remote control.

 The projection lamp will light up and **POWER** indicator will begin blinking in green. When the power is completely on, the indicator will stop blinking and light in steady green (197).

STANDBY/ON button

POWER indicator

To display the picture, select an input signal according to the section **Selecting an input signal** ($\square 19$).

Turning off the power

- 1. Press the **STANDBY/ON** button on the projector or the remote control. The message "Power off?" will appear on the screen for about 5 seconds.
- 2. Press the **STANDBY/ON** button again while the message appears. The projector lamp will go off, and the **POWER** indicator will begin blinking in orange. Then **POWER** indicator will stop blinking and light in steady orange when the lamp cooling is complete (497).
- 3 Attach the lens cover, after the **POWER** indicator turns in steady orange.

Do not turn the projector on for about 10 minutes or more after turning it off. Also, do not turn the projector off shortly after turning it on. Such operations might cause the lamp to malfunction or shorten the lifetime of some parts including the lamp.

△WARNING ► A strong light is emitted when the projector's power is on. Do not look into the lens of the projector or look inside of the projector through any of the projector's openings.

▶ Do not touch around the lamp cover and the exhaust vents during use or just after use, since it is too hot.

NOTE • Turn the power on/off in right order. Please power on the projector prior to the connected devices.

- This projector has the function that can make the projector automatically turn on/ off. Please refer to the DIRECT POWER ON (\$\omega\$54\$) and AUTO POWER OFF (\$\omega\$55\$) items of the OPTION menu.
- Use the shutdown switch (498) only when the projector is not turned off by normal procedure.

Operating volume +/- button

Adjusting the volume

Use the VOLUME +/VOLUME - buttons to adjust the volume.
 A dialog will appear on the screen to aid you in adjusting the volume. If you do not do anything, the dialog will automatically disappear after a few seconds.

- When

 is selected for current picture input port, the volume adjustment is disabled. Please see AUDIO SOURCE item of AUDIO menu (

 46).
- Even if the projector is in the standby mode, the volume is adjustable when both of the following conditions are true:
 - An option other than ★ is selected for STANDBY in the AUDIO SOURCE item of the AUDIO menu (□46).
 - NORMAL is selected in the STANDBY MODE item of the SETUP menu (45).
- In the standby mode, the volume of the microphone is adjustable with the VOLUME +/- buttons on the remote control, in synchronization with the volume of the projector (□19). The volume of the microphone is adjusted regardless of the mode (standby or normal).

Temporarily muting the sound

Press MUTE button on the remote control. A dialog will appear on the screen indicating that you have muted the sound.

To restore the sound, press the **MUTE**, **VOLUME** + or **VOLUME** - button. Even if you do not do anything, the dialog will automatically disappear after a few seconds.

MUTE button

- When ¾ is selected for current picture input port, the sound is always muted. Please see AUDIO SOURCE item of AUDIO menu (♣46).
- C.C. (Closed Caption) is automatically activated when sound is muted and an input signal containing C.C. is received. This function is available only when the signal is NTSC for VIDEO or S-VIDEO, or 480i@60 for COMPONENT, COMPUTER IN1 or COMPUTER IN2, and when AUTO is selected for DISPLAY in the C.C. menu under the SCREEN menu (\$\subset\$53).

Selecting an input signal

1 Press **INPUT** button on the projector.

• Each time you press the button, the projector switches its input port from the current port as below.

- While ON is selected for AUTO SEARCH item in OPTION menu (\$\subseteq\$54\$), the projector will keep checking the ports in above order repeatedly till an input signal is detected.
- It may take several seconds to project the images from the USB TYPE B port.

(continued on next page)

Selecting an input signal (continued)

Press **COMPUTER** button on the remote control.

Each time you press the button, the projector switches its input port from the current port as below.

COMPUTER IN1 → COMPUTER IN2 → LAN —
 USB TYPE B ← USB TYPE A ←

- While ON is selected for AUTO SEARCH item in OPTION menu, the projector will keep checking every port sequentially till an input signal is detected (\$\subseteq\$54\$). If COMPUTER button is pressed when VIDEO, S-VIDEO, COMPONENT or HDMI port is selected, the projector will check COMPUTER IN1 port first.
- It may take several seconds to project the images from the USB TYPE B port.
- 1. Press **VIDEO** button on the remote control. Each time you press the button, the projector switches its input port from the current port as below.

→ HDMI → COMPONENT → S-VIDEO → VIDEO —

- While ON is selected for AUTO SEARCH item in OPTION menu, the projector will keep checking every port sequentially till an input signal is detected (□54). If VIDEO button is pressed when COMPUTER IN1 or COMPUTER IN2 port is selected, the projector will check HDMI port first.
- 1. Press the MY SOURCE / DOC. CAMERA button on the remote control. The input signal will be changed into the signal you set as MY SOURCE (458).
 - This function also can use for document camera. Select the input port that connected the document camera.

ASPECT AUTO SEARCH BLANK

# Searching an input signal

**SEARCH** button

- Press SEARCH button on the remote control.
- The projector will start to check its input ports as below in order to find any input signals.

When an input is found, the projector will stop searching and display the image. If no signal is found, the projector will return to the state selected before the operation.

- While ON is selected for AUTO SEARCH item in OPTION menu (\$\subseteq\$54\$), the
  projector will keep checking the ports in above order repeatedly till an input
  signal is detected.
- It may take several seconds to project the images from the **USB TYPE B** port.

# Selecting an aspect ratio

- Press **ASPECT** button on the remote control.
- Each time you press the button, the projector switches the mode for aspect ratio in turn.
  - O For a computer signal

CP-X4021N, CP-X5021N: NORMAL 
$$\leftrightarrow$$
 4:3  $\leftrightarrow$  16:9  $\leftrightarrow$  16:10   
CP-WX4021N: NORMAL  $\leftrightarrow$  4:3  $\leftrightarrow$  16:9  $\leftrightarrow$  16:10  $\leftrightarrow$  NATIVE

O For an HDMI signal

CP-X4021N, CP-X5021N: NORMAL 
$$\leftrightarrow$$
 4:3  $\leftrightarrow$  16:9  $\leftrightarrow$  16:10  $\leftrightarrow$  14:9   
CP-WX4021N: NORMAL  $\leftrightarrow$  4:3  $\leftrightarrow$  16:9  $\leftrightarrow$  16:10  $\leftrightarrow$  14:9  $\leftrightarrow$  NATIVE

O For a video signal, s-video signal or component video signal

```
CP-X4021N, CP-X5021N:4:3 \leftrightarrow 16:9 \leftrightarrow 14:9 
CP-WX4021N: 4:3 \leftrightarrow 16:9 \leftrightarrow 16:10 \leftrightarrow 14:9 \leftrightarrow NATIVE
```

O For an input signal from the LAN, USB TYPE A or USB TYPE B port, or if there is no signal

CP-X4021N, CP-X5021N: 4:3 (fixed) CP-WX4021N: 16:10 (fixed)

- ASPECT button does not work when no proper signal is inputted.
- NORMAL mode keeps the original aspect ratio setting.

# Adjusting the projector's elevator

When the place to put the projector is slightly uneven to the left or right, use the elevator feet to place the projector horizontally.

Using the feet can also tilt the projector in order to project at a suitable angle to the screen, elevating the front side of the projector within 12 degrees.

This projector has 2 elevator feet and 2 elevator buttons. An elevator foot is adjustable while pushing the elevator button on the same side as it.

- 1 Holding the projector, push the elevator buttons to loose the elevator feet.
- Position the front side of the projector to the desired on the same side height.
- Release the elevator buttons in order to lock the elevator feet.
- After making sure that the elevator feet are locked, put the projector down gently.
- If necessary, the elevator feet can be manually twisted to make more precise adjustments. Hold the projector when twisting the feet.

**△ CAUTION** ► Do not handle the elevator buttons without holding the projector, since the projector may drop down.

▶ Do not tilt the projector other than elevating its front within 12 degrees using the adjuster feet. A tilt of the projector exceeding the restriction could cause malfunction or shortening the lifetime of consumables, or the projector itself.

### **Adjusting the lens**

- 1 Use the **ZOOM** ring to adjust the screen size.
- 2 Use the **FOCUS** ring to focus the picture.
- 3. Turn the **VERTICAL** adjuster fully counter clockwise. Then turn it clockwise and adjust the vertical lens position upward.
- Turn the **LOCK** counter clockwise to loosen the lock of the **HORIZONTAL** adjuster.
- 5. Turn the **HORIZONTAL** adjuster clockwise or counter clockwise to adjust the horizontal lens position.

- Turn the **LOCK** fully clockwise to tighten it and lock the horizontal lens position.
- 7 Use the **FOCUS** ring to focus the picture.

▲ CAUTION ► Operate the lens adjusters gently as the lens may malfunction when subjected to shocks. It may need more strength to turn the adjusters near the adjustment limits. Be careful not to apply too much strength.

**NOTE** • Use a hexagon wrench to turn the **VERTICAL**, **HORIZONTAL** adjusters and **LOCK**. If you do not have a hexagon wrench, you can use a flathead screwdriver with more careful handling.

• Use the **LOCK** so that the lens does not shift from the adjusted horizontal lens position. Adjusting the vertical lens position may shift the horizontal lens position. This projector is not equipped with a lock for vertical lens position.

# Using the automatic adjustment feature

- Press **AUTO** button on the remote control.
- 1. Pressing this button performs the following.

#### O For a computer signal

The vertical position, the horizontal position and the horizontal phase will be automatically adjusted.

Make sure that the application window is set to its maximum size prior to attempting to use this feature. A dark picture may still be incorrectly adjusted. Use a bright picture when adjusting.

#### O For a video signal and s-video signal

The video format best suited for the respective input signal will be selected automatically. This function is available only when the AUTO is selected for the VIDEO FORMAT item in the INPUT menu (440). The vertical position and horizontal position will be automatically set to the default.

#### O For a component video signal

The vertical position and horizontal position will be automatically set to the default. The horizontal phase will be automatically adjusted.

- The automatic adjustment operation requires approx. 10 seconds. Also please note that it may not function correctly with some input.
- When this function is performed for a video signal, a certain extra such as a line may appear outside a picture.
- When this function is performed for a computer signal, a black frame may be displayed on the edge of the screen, depending on the PC model.
- The items adjusted by this function may vary when the FINE or DISABLE is selected for the AUTO ADJUST item of the SERVICE item in the OPTION menu (459).

# **Adjusting the position**

1. Freed indicated. Press **POSITION** button on the remote control when no menu is

The "POSITION" indication will appear on the screen.

Use the  $\triangle/\nabla/\triangle/\triangleright$  cursor buttons to adjust the picture position.

2. Use the A/ V/ T/P cursor button to be so, when you want to reset the operation, press RESET button on the remote control during the operation.

To complete this operation, press **POSITION** button again. Even if you do not do anything, the dialog will automatically disappear after a few seconds.

**POSITION** button

- When this function is performed on a video signal or an s-video signal, some image such as an extra-line may appear at outside of the picture.
- When this function is performed on a video signal or s-video signal, the range of this adjustment depends on OVER SCAN in IMAGE menu (436) setting. It is not possible to adjust when OVER SCAN is set to 10.
- If **POSITION** button is pressed when a menu is indicated on screen, the displayed picture does not move its position but the menu does.
- This function is unavailable for a signal from the LAN, USB TYPE A, USB TYPE B or **HDMI** port.

# **Correcting the distortion**

To correct the distortion of projected screen, you can select one of three options, AUTO, MANUAL and PERFECT FIT.

AUTO: performs the automatic vertical keystone correction. (43)

MANUAL: allows you to adjust the vertical and horizontal keystone.

PERFECT FIT: allows you to adjust each of the screen corners and sides to correct the distortion.

- 1 First press the **KEYSTONE** button to display the KEYSTONE menu, and point at one of items with the ▲/▼ buttons. Then follow the procedure shown below for the item you selected.
- **NOTE** The menu or dialog will automatically disappear after several seconds of inactivity. Pressing the **KEYSTONE** button again finishes the operation and closes the menu or dialog.
- When the screen is adjusted by PERFECT FIT, neither AUTO nor MANUAL is selectable. If you wish to use these functions, refer to step 3 in the PERFECT FIT item to initialize the adjustment of PERFECT FIT.
- When TRANSITION DETECTOR is ON, these functions are not available (□74).

#### **AUTO**

2 When AUTO is pointed at, pressing the ▶ or ENTER button performs automatic vertical keystone correction. To close the operation, press the KEYSTONE button, or pointed at the EXIT in the dialog with ▲/▼ buttons and press the ▶ or ENTER button.

#### MANUAL

When MANUAL is pointed at, pressing the ▶ or ENTER button displays the KYSTONE\_MANUAL dialog.

- 3. Select the vertical or horizontal keystone (△ / ≤) with the ▲/▼ buttons.
- **4** Use the **◄/▶** buttons to adjust the keystone distortion.
- To close the operation, press the KEYSTONE button, or pointed at the EXIT in the dialog with ▲/▼ buttons and press the ► or ENTER button. Alternatively, point at RETURN in the dialog with the ▲/▼ buttons and press the ◄ or ENTER button to return to the menu in step 1.

#### **PERFECT FIT**

- 2. When PERFECT FIT is pointed at, pressing the ▶ or ENTER button displays the KEYSTONE\_PERFECT FIT dialog.
- 3. If it is necessary to initialize the current adjustment, point at RESET in the dialog with the **RESET** button, and press the **ENTER** or **INPUT** button.
- 4 Select one of the corners or sides to be adjusted with the ▲/▼/◄/▶ buttons and press the ENTER or INPUT button.
- Adjust the selected part as below.

- For adjusting a corner, use the ▲/▼/◄/▶ buttons to adjust the position of the corner.
- For adjusting the upper or lower side, use the ◄/▶ buttons to select any one
  point on the side, and use the ▲/▼ buttons to adjust the distortion of the side.
- For adjusting the left or right side, use the ▲/▼ buttons to select any one point on the side, and use the ◄/► buttons to adjust the distortion of the side.
- To adjust another corner or side press the **ENTER** or **INPUT** button and follow the procedure from step 4.

**NOTE** • Each corner and side can be adjusted individually but in some cases it may be adjusted in conjunction with another corner or side. This is due to control restrictions and not a malfunction.

To close the operation, press the KEYSTONE button, or point at EXIT in the dialog with ▲/▼ buttons and press the ▶ or ENTER button. Alternatively, point at RETURN in the dialog with the ▲/▼ buttons and press the ◄ or ENTER button to return to the menu in step 1.

# Using the magnify feature

Press the MAGNIFY ON button on the remote control. The picture will be magnified, and the MAGNIFY dialog will appear on the screen. When the MAGNIFY ON button is pressed for the first time after the projector is turned on, the picture will be zoomed by 1.5 times. On the dialog, triangle marks to show each direction will be displayed.

- 2. While the triangles are displayed on the dialog, use the  $\triangle/\nabla/\blacktriangleleft/\triangleright$  cursor buttons to shift the magnifying area.
- 3. A magnifying glass icon will be displayed on the dialog when the **MAGNIFY ON** button is pressed while the dialog with the triangles is displayed.
- 4. While the magnifying glass icon is displayed on the dialog, use the ▲/▼ cursor buttons to adjust the magnification ratio. The magnification ratio will be adjusted with fine steps. And changes in the ratio in single steps are subtle so they may be hard to recognize.
- 5 Press the **MAGNIFY OFF** button on the remote control to exit magnification.
  - The MAGNIFY dialog will automatically disappear in several seconds with no operation. The dialog will appear again if the MAGNIFY ON button is pressed when the dialog has automatically disappeared.
  - While the MAGNIFY dialog is displayed, press the MAGNIFY ON button to switch the dialog between magnifying area shifting (with the triangles) and magnification ratio adjustment (with the magnifying glass icon).
  - The magnification is automatically disabled when the displaying signal or its display condition is changed.
  - While the magnification is active, the keystone distortion condition may vary.
     It will be restored when the magnification is disabled.
  - Some horizontal stripes might be visible on the image while magnification is active.
  - This function is not available in the following cases:
    - The **USB TYPE A** port is selected as the input source.
    - A sync signal in the range not supported is input.
    - There is no input signal.

# **Temporarily freezing the screen**

- Press the **FREEZE** button on the remote control.
- The "FREEZE" indication will appear on the screen (however, the indication will not appear when the OFF is selected for the MESSAGE item in the SCREEN menu (450), and the projector will go into the FREEZE mode, which the picture is frozen.

To exit the FREEZE mode and restore the screen to normal. press the **FREEZE** button again.

- The projector automatically exits from the FREEZE mode when some control buttons are pressed.
- If the projector continues projecting a still image for a long time, the LCD panel might possibly be burned in. Do not leave the projector in the FREEZE mode for too long.
- Images might appear degraded when this function is operated, but it is not a malfunction

# Temporarily blanking the screen

- Press **BLANK** button on the remote control.
- 1. The BLANK screen will be displayed instead of the screen of input signal. Please refer to BLANK item in SCREEN menu  $(\Box 48).$

To exit from the BLANK screen and return to the input signal screen, press BLANK button again.

ASPECT AUTO SEARCH BLANK 

**BLANK** button

• The projector automatically exits from the BLANK mode when some control buttons are pressed.

**△CAUTION** ► If you wish to have a blank screen while the projector's lamp is on, use one of methods below.

- Use the supplied lens cover.
- Use the BLANK function above.

Taking any other action may cause the damage on the projector.

**NOTE** • The sound is not connected with the BLANK screen function. If necessary, set the volume or mute first. To display the BLANK screen and mute the sound at one time, use AV MUTE function (419).

## **Using the menu function**

This projector has the following menus:

PICTURE, IMAGE, INPUT, SETUP, AUDIO, SCREEN, OPTION, NETWORK, SECURITY and EASY MENU.

EASY MENU consists of functions often used, and the other menus are classified into each purpose and brought together as the ADVANCED MENU.

Each of these menus is operated using the same methods. While the projector is displaying any menu, the **MENU** button on the projector works as the cursor buttons. The basic operations of these menus are as follows.

To start the MENU, press the MENU button. The MENU you last used (EASY or ADVANCED) will appear. EASY MENU has priority to appear just after powered on.

# 2. In the EASY MENU

- (1) Use the ▲/▼ cursor buttons to select an item to operate. If you want to change it to the ADVANCED MENU, select the ADVANCED MENU.
- (2) Use the **◄/▶** cursor buttons to operate the item.

#### In the ADVANCED MENU

- (1) Use the ▲/▼ cursor buttons to select a menu. If you want to change it to the EASY MENU, select the EASY MENU.
  - The items in the menu appear on the right side.
- (2) Press the ▶ cursor button or ENTER button to move the cursor to the right side. Then use the
  - ▲/▼ cursor buttons to select an item to operate and press the ▶ cursor button or **ENTER** button to progress. The operation menu or dialog of the selected item will appear.
- (3) Use the buttons as instructed in the OSD to operate the item.

#### Using the menu function (continued)

- 3. To close the MENU, press the **MENU** button again or select EXIT and press the **◄** cursor button or **ENTER** button. Even if you do not do anything, the dialog will automatically disappear after about 30 seconds.
  - If you want to move the menu position, use the cursor buttons after pressing the POSITION button.
  - Some functions cannot be performed when a certain input port is selected, or when a certain input signal is displayed.
  - When you want to reset the operation, press RESET button on the remote control during the operation. Note that some items (ex. LANGUAGE, VOLUME) cannot be reset.

#### Indication in OSD (On Screen Display)

The meanings of the general words on the OSD are as follows.

| Indication   | Meaning                                                                                         |
|--------------|-------------------------------------------------------------------------------------------------|
| EXIT         | Selecting this word finishes the OSD menu. It's the same as pressing the <b>MENU</b> button.    |
| RETURN       | Selecting this word returns the menu to the previous menu.                                      |
| CANCEL or NO | Selecting this word cancels the operation in the present menu and returns to the previous menu. |
| OK or YES    | Selecting this word executes the prepared function or shifts the menu to the next menu.         |

## EASY MENU

From the EASY MENU, items shown in the table below can be performed.

Select an item using the  $\blacktriangle/\blacktriangledown$  cursor buttons. Then perform it according to the following table.

| Item              | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                           |  |

| ECO MODE      | Using the ◀/▶ buttons turns off/on the Eco mode.<br>See the ECO MODE item in SETUP menu (□44).                                                                                                                                                                                                  |
| MIRROR        | Using the ◀/▶ buttons switches the mode for mirror status. See the MIRROR item in SETUP menu (□44).                                                                                                                                                                                             |
| RESET         | Performing this item resets all of the EASY MENU items except the FILTER TIME and LANGUAGE. A dialog is displayed for confirmation. Selecting the OK using the ▶ button performs resetting.                                                                                                     |
| FILTER TIME   | The usage time of the air filter is shown in the menu.  Performing this item resets the filter time which counts usage time of the air filter.  A dialog is displayed for confirmation. Selecting the OK using the ▶ button performs resetting.  See the FILTER TIME item in OPTION menu (□56). |
| LANGUAGE      | Using the ◀/▶ buttons changes the display language.<br>See the LANGUAGE item in SCREEN menu (□48).                                                                                                                                                                                              |
| ADVANCED MENU | Press the ▶ or <b>ENTER</b> button to use the menu of PICTURE, IMAGE, INPUT, SETUP, AUDIO, SCREEN, OPTION, NETWORK or SECURITY.                                                                                                                                                                 |
| EXIT          | Press the ◀ or <b>ENTER</b> button to finish the OSD menu.                                                                                                                                                                                                                                      |

# PICTURE menu

From the PICTURE menu, items shown in the table below can be performed.

Select an item using the ▲/▼ cursor buttons, and press the ▶ cursor button or **ENTER** button to execute the item. Then perform it according to the following table.

| Item       | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| BRIGHTNESS | Using the <b>◄/▶</b> buttons adjusts the brightness.  Dark ⇔ Light                                                                                                                                                                                                                                                                                                                                                                                                                      |
| CONTRAST   | Using the <b>◄/▶</b> buttons adjusts the contrast.  Weak ⇔ Strong                                                                                                                                                                                                                                                                                                                                                                                                                       |
|            | Using the ▲/▼ buttons switches the gamma mode.                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|            | 1 DEFAULT ⇔ 1 CUSTOM ⇔ 2 DEFAULT ⇔ 2 CUSTOM ⇔ 3 DEFAULT                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|            | 6 CUSTOM 3 CUSTOM                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|            | To adjust CUSTOM                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|            | Selecting a mode whose name includes CUSTOM and then pressing the ▶ button or the ENTER button displays a dialog to aid you in adjusting the mode. This function is useful when you want to change the brightness of particular tones.                                                                                                                                                                                                                                                  |
| GAMMA      | Choose an item using the ◀/▶ buttons, and adjust the level using the ▲/▼ buttons.                                                                                                                                                                                                                                                                                                                                                                                                       |
| GAWIWA     | You can display a test pattern for checking the effect of your adjustment by pressing the ENTER button.  Each time you press the ENTER button, the pattern changes as below.                                                                                                                                                                                                                                                                                                            |
|            | No pattern ⇒ Gray scale of 9 steps —                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|            | î——Ramp ⇔ Gray scale of 15 steps                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|            | The eight equalizing bars correspond to eight tone levels of the test pattern (Gray scale of 9 steps) except the darkest in the left end. If you want to adjust the 2nd tone from left end on the test pattern, use the equalizing adjustment bar "1". The darkest tone at the left end of the test pattern cannot be controlled with any of equalizing adjustment bar.  • Lines or other noise might appear on the screen when this function is operated, but it is not a malfunction. |

| Item       | Description                                                                                                                                                                                                                                                                                                                                                                                                                    |  |  |
|------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|
| COLOR TEMP | Using the ▲/▼ buttons switches the color temperature mode.  1 HIGH ⇔ 1 CUSTOM ⇔ 2 MID ⇔ 2 CUSTOM                                                                                                                                                                                                                                                                                                                               |  |  |
| COLOR      | Using the ◀/▶ buttons adjusts the strength of whole color.  Weak ⇔ Strong  • This item can be selected only for a video, s-video and component video signal.  • For an HDMI signal, this item can also be selected if either (1) or (2) applies.  (1) HDMI FORMAT item in the INPUT menu is set to VIDEO.  (2) HDMI FORMAT item in the INPUT menu is set to AUTO, and the projector recognizes that it receives video signals. |  |  |
| TINT       | Using the ◀/▶ buttons adjusts the tint.  Reddish ⇔ Greenish  • This item can be selected only for a video, s-video and component video signal.  • For an HDMI signal, this item can also be selected if either (1) or (2) applies.  (1) HDMI FORMAT item in the INPUT menu is set to VIDEO.  (2) HDMI FORMAT item in the INPUT menu is set to AUTO, and the projector recognizes that it receives video signals.               |  |  |

| Item        | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| SHARPNESS   | Using the ◀/▶ buttons adjusts the sharpness.  Weak ⇔ Strong  • There may be some noise and/or the screen may flicker for a                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|             | moment when an adjustment is made. This is not a malfunction.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| ACTIVE IRIS | Using the ▲/▼ cursor buttons changes the active iris control mode.  PRESENTATION ⇔ THEATER ⇔ OFF  PRESENTATION: The active iris displays the best presentation                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|             | image for both bright and dark scenes.  THEATER: The active iris displays the best theater image for both bright and dark scenes.  OFF: The active iris is always open.  The screen may flicker when the PRESENTATION or THEATER modes are selected. If this occurs select OFF.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| MY MEMORY   | This projector has 4 memories for adjustment data (for all the items of the PICTURE menu).  Selecting a function using the ▲/▼ buttons and pressing the ▶ or ENTER button performs each function.  SAVE-1 ⇔ SAVE-2 ⇔ SAVE-3 ⇔ SAVE-4 ⇔ LOAD-4 ⇔ LOAD-3 ⇔ LOAD-2 ⇔ LOAD-1 ⊕ SAVE-1, SAVE-2, SAVE-3, SAVE-4  Performing a SAVE function saves the current adjustment data into the memory linked in the number included in the function's name.  Remember that the current data being stored of a memory will be lost by saving new data into the memory.  LOAD-1, LOAD-2, LOAD-3, LOAD-4  Performing a LOAD function loads the data from the memory linked in the number included in the function's name, and adjusts the picture automatically depending on the data.  The LOAD functions whose linked memory has no data are skipped.  Remember that the current adjusted condition will be lost by loading data. If you want to keep the current adjustment, please save it before performing a LOAD function.  There may be some noise and the screen may flicker for a moment when loading data. This is not malfunction.  You can perform the LOAD function using MY BUTTON. Please see MY BUTTON item in OPTION menu (□57). |

# IMAGE menu

From the IMAGE menu, items shown in the table below can be performed.

Select an item using the  $\triangle/\nabla$  cursor buttons, and press the  $\triangleright$  cursor button or **ENTER** button to execute the item. Then perform it according to the following table.

| Item      | Description                                                                                                         |
|-----------|---------------------------------------------------------------------------------------------------------------------|
|           | Using the ▲/▼ buttons switches the mode for aspect ratio.                                                           |
|           | For a computer signal                                                                                               |
|           | CP-X4021N, CP-X5021N: NORMAL ⇔ 4:3 ⇔ 16:9 ⇔ 16:10                                                                   |
|           | CP-WX4021N: NORMAL ⇔ 4:3 ⇔ 16:9 ⇔ 16:10 ⇔ NATIVE                                                                    |
|           | For an HDMI signal                                                                                                  |
|           | CP-X4021N, CP-X5021N: NORMAL ⇔ 4:3 ⇔ 16:9 ⇔ 16:10 ⇔ 14:9                                                            |
| ASPECT    | CP-WX4021N: NORMAL ⇔ 4:3 ⇔ 16:9 ⇔ 16:10 ⇔ 14:9 ⇔ NATIVE                                                             |
|           | For a video signal, s-video signal or component video signal CP-X4021, CP-X5021: 4:3 ⇔ 16:9 ⇔ 14:9                  |
|           | CP-WX4021: 4:3 ⇔ 16:9 ⇔ 16:10 ⇔ 14:9 ⇔ NATIVE                                                                       |
|           | For an input signal from the LAN, USB TYPE A or USB TYPE B port, or if there is no signal                           |
|           | CP-X4021N, CP-X5021N: 4:3 (fixed)<br>CP-WX4021N: 16:10 (fixed)                                                      |
|           | The NORMAL mode keeps the original aspect ratio of the signal.                                                      |
|           | Using the ◄/► buttons adjusts the over-scan ratio.                                                                  |
|           | Small (It magnifies picture) ⇔ Large (It reduces picture)                                                           |
|           | This item can be selected only for a video, s-video and component video signal.                                     |
| OVER SCAN | • For an HDMI signal, this item can also be selected if either (1) or (2)                                           |
|           | applies.                                                                                                            |
|           | (1) HDMI FORMAT item in the INPUT menu is set to VIDEO.                                                             |
|           | (2) HDMI FORMAT item in the INPUT menu is set to AUTO, and the projector recognizes that it receives video signals. |

| V POSITION | Using the ◀/▶ buttons adjusts the vertical position.  Down ⇔ Up  • Over-adjusting the vertical position may cause noise to appear on the screen. If this occurs, please reset the vertical position to the default setting. Pressing the RESET button when the V POSITION is selected will reset the V POSITION to the default setting.  • When this function is performed on a video signal or an s-video signal, the range of this adjustment depends on OVER SCAN (□36) setting. It is not possible to adjust when OVER SCAN is set to 10.  • This function is unavailable for a signal from the LAN, USB TYPE A, USB TYPE B or HDMI port.      |
| H POSITION | Using the ◀/▶ buttons adjusts the horizontal position. Right ⇔ Left • Over-adjusting the horizontal position may cause noise to appear on the screen. If this occurs, please reset the horizontal position to the default setting. Pressing the RESET button when the H POSITION is selected will reset the H POSITION to the default setting. • When this function is performed on a video signal or an s-video signal, the range of this adjustment depends on OVER SCAN (♣36) setting. It is not possible to adjust when OVER SCAN is set to 10. • This function is unavailable for a signal from the LAN, USB TYPE A, USB TYPE B or HDMI port. |

| AUTO ADJUST<br>EXECUTE | Selecting this item performs the automatic adjustment feature.  For a computer signal  The vertical position, the horizontal position and the horizontal phase will be automatically adjusted.  Make sure that the application window is set to its maximum size prior to attempting to use this feature. A dark picture may still be incorrectly adjusted. Use a bright picture when adjusting.  For a video signal and s-video signal  The video format best suited for the respective input signal will be selected automatically. This function is available only when the AUTO is selected for the VIDEO FORMAT item in the INPUT menu (\$\sup\$40). The vertical position and horizontal position will be automatically set to the default.  For a component video signal  The vertical position and horizontal position will be automatically set to the default. The horizontal phase will be automatically adjusted. |
|                        | <ul> <li>The automatic adjustment operation requires approx. 10 seconds. Also please note that it may not function correctly with some input.</li> <li>When this function is performed for a video signal, a certain extra such as a line may appear outside a picture.</li> <li>When this function is performed for a computer signal, a black frame may be displayed on the edge of the screen, depending on the PC model.</li> <li>The items adjusted by this function may vary when the FINE or DISABLE is selected for the AUTO ADJUST item of the SERVICE item in the OPTION menu (□59).</li> </ul>                                                                                                                                                                                                                                                                                                                     |

# INPUT menu

From the INPUT menu, items shown in the table below can be performed.

Select an item using the  $\triangle/\nabla$  cursor buttons, and press the  $\triangleright$  cursor button or **ENTER** button to execute the item. Then perform it according to the following table.

| Item        | Description                                                                                                                                                                                                                                                                                                                                                                                                                      |
|-------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PROGRESSIVE | Using the ▲/▼ buttons switches the progress mode.  TV ⇔ FILM ⇔ OFF                                                                                                                                                                                                                                                                                                                                                               |
|             | video signal (of 480i@60 or 576i@50 or 1080i@50/60) and an HDMI signal (of 480i@60 or 576i@50 or 1080i@50/60).  • When TV or FILM is selected, the screen image will be sharp. FILM adapts to the 2-3 Pull-Down conversion system. But these may cause a certain defect (for example, jagged line) of the picture for a quick moving object. In such a case, please select OFF, even though the screen image may lose sharpness. |
| VIDEO NR    | Using the ▲/▼ buttons switches the noise reduction mode.  HIGH ⇔ MID ⇔ LOW                                                                                                                                                                                                                                                                                                                                                       |
|             | • This function works only for a video signal, s-video signal, component video signal (of 480i@60 or 576i@50 or 1080i@50/60) and an HDMI signal (of 480i@60 or 576i@50 or 1080i@50/60).                                                                                                                                                                                                                                          |
| COLOR SPACE | Using the ▲/▼ buttons switches the mode for color space.  AUTO ⇔ RGB ⇔ SMPTE240 ⇔ REC709 ⇔ REC601  ↑ ↑                                                                                                                                                                                                                                                                                                                           |
|             | <ul> <li>This item can be selected only for a computer signal (except for signals from the LAN, USB TYPE A and USB TYPE B ports) or a component video signal (except SCART RGB).</li> <li>The AUTO mode automatically selects the optimum mode.</li> <li>The AUTO operation may not work well at some signals. In such a case, it might be good to select a suitable mode except AUTO.</li> </ul>                                |
| COMPONENT   | Using the ▲/▼ buttons switches the function of the <b>COMPONENT</b> ports.                                                                                                                                                                                                                                                                                                                                                       |
|             | COMPONENT ⇔ SCART RGB  When the SCART RGB is selected, the COMPONENT (Y, Cb/ Pb, Cr/Pr) and VIDEO ports will function as a SCART RGB port.  A SCART adapter or SCART cable is required for a SCART RGB input to the projector. For details, contact your dealer.                                                                                                                                                                 |

| Item         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Description                                                                                                                                                                                                                             |  |

|------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| RESOLUTION | The resolution for the COMPUTER IN1 and COMPUTER IN2 input signals can be set on this projector.  (1) In the INPUT menu select the RESOLUTION using the ▲/▼ buttons and press the ▶ button. The RESOLUTION menu will be displayed.  (2) In the RESOLUTION menu select the resolution you wish to display using the ▲/▼ buttons. Selecting AUTO will set a resolution appropriate to the input signal.  (3) Pressing the ▶ or ENTER button when selecting a STANDARD resolution will automatically adjust the horizontal and vertical positions, clock phase and horizontal size. The INPUT_INFORMATION dialog will be displayed.  (4) To set a custom resolution use the ▲/▼ buttons to select the CUSTOM and the RESOLUTION_CUSTOM box will be displayed.  Set the horizontal (HORZ) and vertical (VERT) resolutions using the ▲/▼/→/▶ buttons. This function may not support all resolutions.  (5) Move the cursor to OK on screen and press the ▶ or ENTER button. The message "ARE YOU SURE YOU WISH TO CHANGE RESOLUTION?" appears. To save the setting, press the ▶ button.  The horizontal and vertical positions, clock phase and horizontal size will be automatically adjusted. The INPUT_INFORMATION dialog will be displayed.  (6) To revert back to the previous resolution without saving changes, move the cursor to CANCEL on screen and press the ▼ or ENTER button.  The screen will then return to the RESOLUTION menu displaying the previous resolution.  ▼For some pictures, this function may not work well. |

# SETUP menu

From the SETUP menu, items shown in the table below can be performed.

Select an item using the  $\triangle/\nabla$  cursor buttons, and press the  $\triangleright$  cursor button or **ENTER** button to execute the item. Then perform it according to the following table.

| Item          | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| AUTO KEYSTONE | Selecting this item performs the Automatic keystone distortion correction. Projector automatically corrects vertical keystone distortion due to the (forward/backward) setup angle by itself. This function will be executed only once when selected in the menu. When the slant of the projector is changed, execute this function again.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|               | <ul> <li>The adjustable range of this function will vary among inputs. For some input, this function may not work well.</li> <li>When V:INVERT or H&amp;V:INVERT is selected to the MIRROR item in the SETUP menu, if the projector screen is inclined or angled downward, this function may not work correctly.</li> <li>When the zoom adjustment is set to the TELE (telephoto focus), this function may be excessive. This function should be used when the zoom adjustment is set to the full WIDE (wide-angle focus) whenever possible.</li> <li>When the projector is placed on the level (about ±4°), this function may not work.</li> <li>When the projector is inclined to near ±30 degree or over, this function may not work well.</li> <li>This function is unavailable when the TRANSITION DETECTOR (□74) is ON or the screen is adjusted by PERFECT FIT (□26).</li> </ul> |
|               | Using the ◄/▶ buttons corrects the vertical keystone distortion.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

|              | Using ▲/▼ buttons switches the standby mode setting between NORMAL and SAVING.  NORMAL ⇔ SAVING                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| STANDBY MODE | When SAVING is selected, the power consumption in the standby mode is lowered with some functional restriction as below:  • When SAVING is selected, the RS-232C communication control except to turn the projector on and the network function are disabled while the projector is in the standby mode. If the COMMUNICATION TYPE in the COMMUNICATION menu is set to NETWORK BRIDGE, all of the RS-232C commands are disabled (\$\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{\textstyle{ |
| MONITOR OUT  | While the image signal from the input port chosen in step (1) is projected, the image signal from the input port selected in step (2) is output to MONITOR OUT port.  (1) Choose a picture input port using ▲/▼ buttons.  Choose STANDBY to select the picture output in the standby mode.  (2) Select one of the COMPUTER IN ports using ◄/► buttons.  Select OFF to disable the MONITOR OUT port for the input port or standby mode chosen in the step (1).  • You cannot select COMPUTER IN1 in step (1) and COMPUTER IN2 in step (2) and vice versa.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

# AUDIO menu

From the AUDIO menu, items shown in the table below can be performed. Select an item using the ▲/▼ cursor buttons, and press the ▶ cursor button or the ENTER button to execute the item. Then perform it according to the following table.

| Item         | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| VOLUME       | Using the <b>◄/▶</b> buttons adjusts the volume.<br>Low ⇔ High                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| SPEAKER      | Using the ▲/▼ buttons turns on/off the built-in speaker.  ON ⇔ OFF  When OFF is selected, the built-in speaker does not work.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| AUDIO SOURCE | While the image signal from the input port chosen in step (1) is projected, the audio signal from the input port selected in step (2) is output to both the <b>AUDIO OUT</b> port and built-in speaker of this projector. However, the built-in speaker does not work when SPEAKER is set to OFF.  (1) Choose a picture input port using the ▲/▼ buttons.  Choose STANDBY to select the sound output in the standby mode.  (2) Select one of the <b>AUDIO IN</b> ports using ◀/▶ buttons.  Select ※ to mute the sound from the input port or in the standby mode chosen in the step (1).  In the AUDIO SOURCE window, "H" symbolizes the audio signal from the <b>HDMI</b> port. It can be selected only for the picture input from the <b>HDMI</b> port.  Even if the projector is in the standby mode, cooling fans may work and make noises when the built-in speaker is in operation.  C.C. (Closed Caption) is automatically activated when ※ is selected and an input signal containing C.C. is received. This function is available only when the signal is NTSC for <b>VIDEO</b> or <b>S-VIDEO</b> , or 480i@60 for <b>COMPONENT</b> , <b>COMPUTER IN1</b> or <b>COMPUTER IN2</b> , and when AUTO is selected for DISPLAY in the C.C. menu under the SCREEN menu (□53). |

| Item       | Description                                                                                                                                                                                                   |
|------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| HDMI AUDIO | Using the ▲/▼ buttons switches the mode for the HDMI audio. Check each of the two modes provided and select the suitable one for your HDMI audio device.  1 ⇔ 2                                               |
| MIC LEVEL  | Using the ▲/▼ buttons switches the input level to match that of the microphone connected to the MIC port.  HIGH ⇔ LOW  HIGH: for a microphone with an amplifier.  LOW: for a microphone without an amplifier. |
| MIC VOLUME | Using the <b>◄/▶</b> buttons adjusts the volume of the microphone connected to the <b>MIC</b> port.  Low ⇔ High                                                                                               |

### SCREEN menu

From the SCREEN menu, items shown in the table below can be performed.

Select an item using the ▲/▼ cursor buttons, and press the ▶ cursor button or **ENTER** button to execute the item. Then perform it according to the following table.

| Item          | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|---------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| LANGUAGE      | Using the ▲/▼/◀/▶ buttons switches the OSD (On Screen Display) language.  ENGLISH ⇔ FRANÇAIS ⇔ DEUTSCH ⇔ ESPAÑOL  □ (shown in the LANGUAGE dialog) □                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|               | Press the <b>ENTER</b> or <b>INPUT</b> button to save the language setting.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| MENU POSITION | Using the ▲/▼/◄/▶ buttons adjusts the menu position. To quit the operation, press the <b>MENU</b> button on the remote control or keep no operation for about 10 seconds.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| BLANK         | Using the ▲/▼ buttons switches the mode for the blank screen. The blank screen is a screen for the temporarily blanking feature (□28). It is displayed by pressing the BLANK button on the remote control.  MyScreen ⇔ ORIGINAL ⇔ BLUE ⇔ WHITE ⇔ BLACK   MyScreen : Screen can be registered by the MyScreen item (□49).  ORIGINAL : Screen preset as the standard screen.  BLUE, WHITE, BLACK : Plain screens in each color.  To avoid remaining as an afterimage, the MyScreen or ORIGINAL screen will change to the plain black screen after several minutes.                                                                                                                                   |
| START UP      | Using the ▲/▼ buttons switches the mode for the start-up screen. The start-up screen is a screen displayed when no signal or an unsuitable signal is detected.  MyScreen ⇔ ORIGINAL ⇔ OFF  MyScreen: Screen can be registered by the MyScreen item (□49).  ORIGINAL: Screen preset as the standard screen.  OFF: Plain black screen.  • To avoid remaining as an afterimage, the MyScreen or ORIGINAL screen will change to the BLANK screen (□above) after several minutes. If also the BLANK screen is the MyScreen or ORIGINAL, the plain black screen is instead used.  • When the ON is selected to the MyScreen PASSWORD item in the SECURITY menu (□72), the START UP is fixed to MyScreen. |

| Item     | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| MyScreen | This item allows you to capture an image for use as a MyScreen image which can be used as the BLANK screen and START UP screen. Display the image you want to capture before executing the following procedure.  1. Selecting this item displays a dialog titled "MyScreen". It will ask you if you start capturing an image from the current screen.  Please wait for the target image to be displayed, and press the ENTER or INPUT button when the image is displayed. The image will freeze and the frame for capturing will appear.  To stop performing, press the RESET button on the remote control.  2. Using the A/V/ IP buttons adjusts the frame position.  Please move the frame to the position of the image which you want to use. The frame may not be able to be moved for some input signals.  To start registration, press the ENTER or INPUT button on the remote control.  To restore the screen and return to the previous dialog, press the RESET button on the remote control.  Registration takes several minutes.  When the registration is completed, the registered screen and the following message is displayed for several seconds:  "MyScreen registration is finished."  If the registration failed, the following message is displayed:  "A capturing error has occurred. Please try again."  * This function cannot be selected when the ON is selected to the MyScreen PASSWORD item in SECURITY menu (172).  * This function is unavailable for a signal from the LAN, USB TYPE A, USB TYPE B or HDMI port. |

| Item | Description  Each input port for this projector can have a name applied to it.  (1) Use the ▲/▼ buttons on the SCREEN menu to select SOURCE NAME and press the ▶ or ENTER button. The SOURCE NAME menu will be displayed.  (2) Use the ▲/▼ buttons on the SOURCE NAME menu to select the port to be named and press the ▶ button. The SOURCE NAME dialog will be displayed. Right side of the menu is blank until a name is specified.  (3) Select an icon you'd like to assign to the port in the SOURCE NAME dialog. The name assigned to the port will also be automatically switched according to your |
|      | icon selection. Press the ➤ or ENTER button to determine your icon selection.  (4) Select a number you'd like to assign to the port along with the icon. You can select the number either from blank (no number assigned), 1, 2, 3, or 4.  (5) If you'd like to modify the name assigned to the port, select CUSTOM NAME and press the ➤ button.                                                                                                                                                                                                                                                           |

| SOURCE NAME<br>(Continued) | (6) The current name will be displayed on the first line. Use the ▲/▼/◄/▶ buttons and the ENTER or INPUT button to select and enter characters. To erase 1 character at one time, press the RESET button or press the ◀ and INPUT button at the same time. Also if you move the cursor to DELETE or ALL CLEAR on screen and press the ENTER or INPUT button, 1 character or all characters will be erased. The name can be a maximum of 16 characters.  (7) To change an already inserted character, press the ▲ button to move the cursor to the first line, and use the ◄/▶ buttons to move the cursor on the character to be changed.  After pressing the ENTER or INPUT button, the character is selected. Then, follow the same procedure as described at the item (6) above.  (8) To finish entering text, move the cursor to the OK on screen and press the ▶, ENTER or INPUT button. To revert to the previous name without saving changes, move the cursor to the CANCEL on screen and press the ◀, ENTER or INPUT button. |
| TEMPLATE                   | Using the ▲/▼ cursor buttons switches the mode for the template screen.  Press the ▶ cursor (or the ENTER) button to display the selected template, and press the ◀ cursor button to close the displayed screen.  The last selected template is displayed when the MY BUTTON allocated to the TEMPLATE function is pressed (♣58).  TEST PATTERN ⇔ DOT-LINE1 ⇔ DOT-LINE2 ⇔ DOT-LINE3     \$\frac{1}{3}\$  STACK ⇔ MAP2 ⇔ MAP1 ⇔ CIRCLE2 ⇔ CIRCLE1 ⇔ DOT-LINE4  You can turn a map upside down and scroll it horizontally when MAP1 or MAP2 is selected. To invert or scroll the map, display the guidance by pressing the RESET button on the remote three seconds or more when MAP1 or MAP2 appears.                                                                                                                                                                                                                                                                                                                                |

### **OPTION** menu

From the OPTION menu, items shown in the table below can be performed.

Select an item using the ▲/▼ cursor buttons, and press the ▶ cursor button or **ENTER** button to execute the item, except for the items LAMP TIME and FILTER TIME. Then perform it according to the following table.

| Item               | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |
|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| AUTO SEARCH        | Using the ▲/▼ buttons turns on/off the automatic signal search function.  ON ⇔ OFF                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |
|                    | When the ON is selected, detecting no signal automatically cycles through input ports in the following order. The search is started from the current port. Then when an input is found, the projector will stop searching and display the image.                                                                                                                                                                                                                                                                                                    |  |
|                    | COMPUTER IN1   COMPUTER IN2   LAN   USB TYPE A  VIDEO   COMPONENT   HDMI  USB TYPE B  It may take several seconds to project the images from the  USB TYPE B port.                                                                                                                                                                                                                                                                                                                                                                                  |  |
|                    | Using the ▲/▼ buttons turns on/off the automatic keystone function.  ON ⇔ OFF                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |
| AUTO<br>KEYSTONE   | ON: Automatic keystone distortion correction will be executed whenever changing the slant of the projector.  OFF: This function is disabled. Please execute the AUTO KEYSTONE (EXECUTE) in the SETUP menu for automatic keystone distortion correction.  • When the projector is suspended from the ceiling this feature will not function properly so select the OFF.  • This function will be unavailable when the Transition Detector is on (174).                                                                                               |  |
|                    | Using the ▲/▼ buttons turns on/off the DIRECT POWER ON function.  ON ⇔ OFF                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |
| DIRECT POWER<br>ON | When set to the ON, the lamp in projector will be automatically turned on without the usual procedure (□18), only when the projector is supplied with the power after the power was cut while the lamp was on.  • This function does not work as long as the power has been supplied to the projector while the lamp is off.  • After turning the lamp on by the DIRECT POWER ON function, if neither input nor operation is detected for about 30 minutes, the projector is turned off, even though the AUTO POWER OFF function (□55) is disabled. |  |

| Item              | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |
|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
|                   | Using the ▲/▼ buttons adjusts the time to count down to automatically turn the projector off.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |
| AUTO POWER<br>OFF | Long (max. 99 minutes)  Short (min. 0 minute = DISABLE)  When the time is set to 0, the projector is not turned off automatically. When the time is set to 1 to 99, and when the passed time with no-signal or an unsuitable signal reaches at the set time, the projector lamp will be turned off. If one of the projector's buttons or the remote control buttons is pressed or one of the commands (except get commands) is transmitted to the CONTROL port during the corresponding time, projector will not be turned off. Please refer to the section Turning off the power (18).                                                                                                                                                                                         |  |
| USB TYPE B        | Using the ▲/▼ buttons selects the function of <b>USB TYPE B</b> port. To use this function, you need to connect the <b>USB TYPE B</b> port of the projector and the type A USB port of a computer.  MOUSE ⇔ USB DISPLAY  MOUSE: The accessory remote control works as the simple mouse and keyboard of the computer.  USB DISPLAY: The port works as an input port that receives image signals from the computer (♠86).  It may take several seconds to project the images from the <b>USB TYPE B</b> port.  In the following cases, a message to notify you that <b>USB TYPE B</b> port is not available for picture input appears together with the USB TYPE B dialog:  This setting is switched to MOUSE while a picture input from the <b>USB TYPE B</b> port is projected. |  |
|                   | - The <b>USB TYPE B</b> port is projected.  - The <b>USB TYPE B</b> port is selected as the picture input source while this setting is set to MOUSE. Select USB DISPLAY in the dialog to project the picture input to the <b>USB TYPE B</b> port. In this case, you cannot use the simple mouse and keyboard function. Otherwise select other port for picture input.                                                                                                                                                                                                                                                                                                                                                                                                           |  |

### OPTION menu

| Item        | Description                                                                                                                                                                                                                                                                                                  |  |
|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| LAMP TIME   | The lamp time is the usage time of the lamp, counted after the last resetting. It is shown in the OPTION menu.  Pressing the <b>RESET</b> button on the remote control or the ▶ button of the projector displays a dialog.  To reset the lamp time, select the OK using the ▶ button.  CANCEL ⇒ OK           |  |
|             | <ul> <li>Please reset the lamp time only when you have replaced the lamp, for a suitable indication about the lamp.</li> <li>For the lamp replacement, see the section Replacing the lamp (□89).</li> </ul>                                                                                                  |  |
| FILTER TIME | The filter time is the usage time of the air filter, counted after the last resetting. It is shown in the OPTION menu.  Pressing the <b>RESET</b> button on the remote control or the ▶ button of the projector displays a dialog.  To reset the filter time, select the OK using the ▶ button.  CANCEL ⇒ OK |  |
|             | <ul> <li>Please reset the filter time only when you have cleaned or replaced the air filter, for a suitable indication about the air filter.</li> <li>For the air filter cleaning, see the section Cleaning and replacing the air filter (□91).</li> </ul>                                                   |  |

| MY BUTTON | This item is to assign one of the following functions to MY BUTTON 1/2 on the remote control (□6).  (1) Use the ▲/▼ buttons on the MY BUTTON menu to select a MY BUTTON - (1/2) and press the ▶ or ENTER button to display the MY BUTTON setup dialog.  (2) Then using the ▲/▼/√/▶ buttons sets one of the following functions to the chosen button. Press the ENTER or INPUT button to save the setting.  - LAN: Selects input from LAN port.  - USB TYPE A: Selects input from USB TYPE A port.  - USB TYPE B: Selects input from USB TYPE B port.  - HDMI: Selects input from HDMI port.  - COMPUTER IN1: Selects the input from COMPUTER IN1 port.  - COMPUTER IN2: Selects the input from COMPUTER IN2 port.  - COMPONENT: Selects the input from S-VIDEO port.  - VIDEO: Selects the input from VIDEO port.  - VIDEO: Selects the input from USB TYPE A, and starts a Slideshow.  - MY IMAGE: Displays the MY IMAGE menu (□67).  - MESSENGER: Turns the messenger text displayed on the screen on/off (□Messenger Function in the User's Manual - Network Guide).  When there is no transferred text data to display, the message  "NO MESSENGER DATA" appears.  - INFORMATION: Displays SYSTEM_INFORMATION, INPUT_INFORMATION (□63), NETWORK_INFORMATION (□70) or nothing.  - AUTO KEYSTONE: Performs automatic keystone distortion correction (□43).  - MY MEMORY: Loads one of adjustment data stored (□35).  When more than one data are saved, the adjustment changes every time the MY BUTTON is pressed.  When no data is saved in memory, the dialog "No saved data" appears.  - When the current adjustment is not saved to memory, the dialog as shown in the right appears.  If you want to keep the current adjustment, please press the ▶ button to exit. Otherwise loading a data will overwrite the current adjusted condition. |  |

|                                                                                                                                                                                                                                                                              | FAN SPEED Using the ▲/▼ buttons switches the rotation speed of the cooling fans. The HIGH is the mode for use at highlands etc. Note that the projector is noisier when the HIGH is selected.  HIGH ⇔ NORMAL                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |  |
|                                                                                                                                                                                                                                                                              | AUTO ADJUST  Using the ▲/▼ buttons to select one of the mode. When the DISABLE is selected, the automatic adjustment feature is disabled.  FINE ⇔ FAST ⇔ DISABLE     FINE: Finer tuning including H.SIZE adjustment.  FAST: Faster tuning, setting H.SIZE to prearranged data for the                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |  |
| input signal.  • Depending on conditions, such as input image, signal ca the projector, environment around the projector, etc., the a adjustment may not work correctly. In such a case, please choose DISABLE to disable the automatic adjustment, and adjustment manually. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |  |
|                                                                                                                                                                                                                                                                              | GHOST  1. Select a color element of ghost using the ◀/▶ buttons.  2. Adjust the selected element using the ▲/▼ buttons to disappear ghost.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |  |
|                                                                                                                                                                                                                                                                              | FILTER MESSAGE  Use the ▲/▼ button to set the timer for notifying by the message when to replace the filter unit  100h ⇔ 200h ⇔ 500h ⇔ 1000h ⇔ 2000h ⇔ 5000h ⇔ OFF  After choosing an item except OFF, the message "REMINDER ***  HRS PASSED" will appear after the timer reaches the interval time set by this feature (□96).  When the OFF is chosen, the message will not appear. Utilize this feature to keep the air filter clean, setting the suitable time according to your environment of this projector.  • Please take care of the filter unit periodically, even if there is no message. If the air filter becomes to be blocked by dust or other matter, the internal temperature will rise, which could cause malfunction, or reduce the lifetime of the projector.  • Please be careful with the operating environment of the projector and the condition of the filter unit. |  |  |

|                        | FACTORY RESET  Selecting OK using the ▶ button performs this function. By this function, all the items in all of menus will collectively return to the initial setting. Note that the items LAMP TIME, FILTER TIME, LANGUAGE, FILTER MESSAGE, NETWORK and SECURITY settings are not reset.  CANCEL ⇒ OK                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |

## NETWORK menu

Remember that incorrect network settings on this projector may cause trouble on the network. Be sure to consult with your network administrator before connecting to an existing access point on your network. Select "NETWORK" from the main menu to access the following functions.

Select an item using the ▲/▼ cursor buttons on the

projector or remote control, and press the ▶ cursor button on the projector or remote control, or **ENTER** button on the remote control to execute the item. Then perform it according to the following table.

See the User's Manual - Network Guide for details of NETWORK operation.

**NOTE** • If you are not utilizing SNTP ( Date/Time Settings in the User's Manual - Network Guide), then you must set the DATE AND TIME during the initial installation.

• The network communication control is disabled while the projector is in standby mode if the STANDBY MODE item of SETUP menu is set to SAVING. Please connect the network communication to the projector after setting the STANDBY MODE to NORMAL (445).

| Item                 |                    | Description                                                                                                                                                                                                                                                                          |
|----------------------|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                      | IP ADDRESS         | Use the ▲/▼/◄/▶ buttons to enter the IP ADDRESS.  This function can only be used when DHCP is set to OFF.  • The IP ADDRESS is the number that identifies this projector on the network. You cannot have two devices with the same IP ADDRESS on the same                            |
|                      |                    | network. • The IP ADDRESS "0.0.0.0" is prohibited.                                                                                                                                                                                                                                   |
|                      | SUBNET<br>MASK     | Use the ▲/▼/◀/▶ buttons to enter the same SUBNET MASK used by your computer. This function can only be used when DHCP is set to OFF.                                                                                                                                                 |
|                      |                    | The SUBNET MASK "0.0.0.0" is prohibited.                                                                                                                                                                                                                                             |
| SETUP<br>(continued) | DEFAULT<br>GATEWAY | Use the ▲/▼/◄/▶ buttons to enter the DEFAULT GATEWAY (a node on a computer network that serves as an access point to another network) address.  This function can only be used when DHCP is set to OFF.                                                                              |
|                      | DNS SERVER         | Use the ▲/▼/◄/▶ buttons to input the DNS server address.  The DNS server is a system to control domain names and IP addresses on the Network.                                                                                                                                        |
|                      | TIME<br>DIFFERENCE | Use the ▲/▼ buttons to enter the TIME DIFFERENCE. Set the same TIME DIFFERENCE as the one set on your computer. If unsure, consult your IT manager. Use the ▶ button to return to the menu after setting the TIME DIFFERENCE.                                                        |
|                      | DATE AND<br>TIME   | Use the ▲/▼/◄/▶ buttons to enter the Year (last two digits), Month, Date, Hour and Minute.  • The projector will override this setting and retrieve DATE AND TIME information from the Time server when SNTP is enabled. (☐ Date/Time Settings in the User's Manual - Network Guide) |

| PROJECTOR<br>NAME | (1) Use the ▲/▼ buttons on the NETWORK menu to select the PROJECTOR NAME and press the ▶ button. The PROJECTOR NAME will be displayed.  (2) The current PROJECTOR NAME will be displayed on the first 3 lines. Particular projector name is pre-assigned by default. Use the ▲/▼/◄/▶ buttons and the ENTER or INPUT button to select and enter characters.  To erase 1 character at one time, press the RESET button or press the ◄ and INPUT button at the same time. Also if you move the cursor to DELETE or ALL CLEAR on screen and push the ENTER or INPUT button, 1 character or all characters will be erased. The PROJECTOR NAME can be input up to 64 characters.  (3) To change an already inserted character, press the ▲/▼ button to move the cursor to one of the first 3 lines, and use the ◄/▶ buttons to move the cursor on the character to be changed. After pressing the ENTER or INPUT button, the character is selected. Then, follow the same procedure |
|                   | as described at the item (2) above.  (4) To finish entering text, move the cursor to the OK on screen and press the ▶, ENTER or INPUT button. To revert to the previous PROJECTOR NAME without saving changes, move the cursor to the CANCEL on screen and press the ◀, ENTER or INPUT button.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| Item                                  | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|---------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| MY IMAGE                              | Selecting this item displays the MY IMAGE menu.  To store images in the projector, the application software PJImg/Projector Image Tool that can be downloaded from our website is required.  Use the ▲/▼ buttons to select an item which is a still image by the MY IMAGE (□ My Image Function in the User's manual - Network Guide) and the ▶ or ENTER button to display the image.  • The item without image stored cannot be selected. • The image names are each displayed in 16 characters or less. |
|                                       | To switch the image displayed Use the ▲/▼ buttons.  To return to the menu Press the ◀ button on the remote control.                                                                                                                                                                                                                                                                                                                                                                                      |
|                                       | To erase the image displayed and its source file in the projector.  (1) Press the RESET button on the remote control while displaying an image to display the MY IMAGE DELETE menu.                                                                                                                                                                                                                                                                                                                      |
|                                       | (2) Press the ▶ button to perform to erase.  To stop erasing, press the ◀ button.                                                                                                                                                                                                                                                                                                                                                                                                                        |
| AMX D.D.<br>(AMX Device<br>Discovery) | Use the ▲/▼ buttons to turn the AMX Device Discovery on/off.  ON ⇔ OFF  When ON is selected, the projector can be detected by controllers of AMX connected to the same network. For the details of AMX Device Discovery, visit the AMX web site.  URL: http://www.amx.com/ (as of Aug. 2010)                                                                                                                                                                                                             |

|             | For the details of PASSCODE, see the section Selecting the network connection method in the User's manual – Network Guide.     Only the first 16 characters of the projector name are displayed.     When the voltage level of the battery for the built in clock decreases, the set time may become incorrect even though accurate date and time are input. Replace the battery suitably (□93).     IP ADDRESS, SUBNET MASK and DEFAULT GATEWAY indicate "0.0.0.0" when DHCP is ON and the projector has not gotten address from DHCP server. |
|             | Executing this item restarts and initializes the network functions. Choose the RESTART EXECUTE using the button ▶.                                                                                                                                                                                                                                                                                                                                                                                                                             |
| SERVICE     | ♣ SERVICE  NETWORK RESTART EXECUTE  • RETURN                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|             | Then use the button ► to execute.  & NETWORK RESTART  CANCEL  OK                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|             | Network will be once cut off when choose restart.  If DHCP is selected on, IP address may be changed.  After selecting RESTART EXECUTE, NETWORK menu may not be controlled approx. 30 seconds.                                                                                                                                                                                                                                                                                                                                                 |

## SECURITY menu

This projector is equipped with security functions. From the SECURITY menu, items shown in the table below can be performed.

To use SECURITY menu: User registration is required before using the security functions.

#### **Enter the SECURITY menu**

Use the ▲/▼ buttons on the SECURITY menu to select ENTER PASSWORD and press the ▶ button. The ENTER PASSWORD box will be displayed.

 Use the ▲/▼/◄/► buttons to enter the registered password. The factory default password is as follows.

CP-X4021N, CP-X5021N: 1700

CP-WX4021N: 0100

This password can be changed (**□below**). Move the cursor to the right side of the ENTER PASSWORD box and press the **▶** button to display the SECURITY menu.

- It is strongly recommended the factory default password to be changed as soon as possible.
- If an incorrect password is input, the ENTER PASSWORD box will be displayed again. If incorrect password is input 3 times, the projector will turn off. Afterwards the projector will turn off every time an incorrect password is input.
- 3. Items shown in the table below can be performed.

#### If you have forgotten your password

- (1) While the ENTER PASSWORD box is displayed, press and hold the RESET button on the remote control for about 3 seconds or press and hold the INPUT button for 3 seconds while pressing the ▶ button on the projector.
- (2) The 10 digit Inquiring Code will be displayed. Contact your dealer with the 10 digit Inquiring Code. Your password will be sent after your user registration information is confirmed.
- If there is no key input for about 55 seconds while the Inquiring Code is displayed, the menu will close. If necessary, repeat the process from (1).

|          | PIN LOCK is a function which prevents the projector from being used unless a registered Code is input.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| PIN LOCK | 1 Turning on the PIN LOCK  1-1 Use the ▲/▼ buttons on the SECURITY menu to select PIN LOCK and press the ▶ button or the ENTER button to display the PIN LOCK on/off menu.  1-2 Use the ▲/▼ buttons on the PIN LOCK on/ off menu to select ON and the Enter PIN Code box will be displayed.  1-3 Input a 4 part PIN code using the ▲/▼/◄/▶, COMPUTER or INPUT button.  The PIN Code again box will appear. Reenter the same PIN code. This will complete the PIN code registration.  • If there is no key input for about 55 seconds while the Enter PIN Code box or the PIN Code again box is displayed, the menu will close. If necessary, repeat the process from 1-1.  Afterwards, anytime the projector is restarted after AC power is turned off the Enter PIN Code box will be displayed. Enter the registered PIN code. The projector can be used after entering the registered PIN code. If an incorrect PIN code is input, the Enter PIN code box will be displayed again. If an incorrect PIN code is input 3 times, the projector will turn off. Afterwards the projector will also turn off if there is no key input for about 5 minutes while the Enter PIN code box is displayed.  This function will activate only when the projector is started after AC power is turned off.  • Please do not forget your PIN code.  2 Turning off the PIN LOCK  2-1 Follow the procedure in 1-1 to display the PIN LOCK on/off menu.  2-2 Use the ▲/▼ buttons to select OFF and the Enter PIN Code box will be displayed. Enter the registered PIN code is input 3 times, the menu will close.  3 If you have forgotten your PIN code |
|          | 3 If you have forgotten your PIN code 3-1 While the Enter PIN code box is displayed, press and hold the RESET button for three seconds or press and hold the INPUT button for 3 seconds while pressing the ▶ button on the projector.  The 10 digit Inquiring Code will be displayed.  If there is no key input for about 5 minutes while the Inquiring Code is displayed, the projector will turn off.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|          | 3-2 Contact your dealer with the 10 digit Inquiring Code. Your PIN code will be sent after your user registration information is confirmed.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| MY TEXT<br>DISPLAY    | (1) Use the ▲/▼ buttons on the SECURITY menu to select the MY TEXT DISPLAY and press the ▶ or ENTER button to display the MY TEXT DISPLAY on/off menu.  (2) Use the ▲/▼ buttons on the MY TEXT DISPLAY on/off menu to select on or off.  ON ⇔ OFF  When it is set ON, the MY TEXT will be displayed on the START UP screen and the INPUT_INFORMATION when the INFORMATION on the SERVICE menu is chosen.  • This function is available only when the MY TEXT PASSWORD function is set to the OFF.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| MY TEXT<br>WRITING    | (1) Use the ▲/▼ buttons on the SECURITY menu to select the MY TEXT WRITING and press the ▶ button. The MY TEXT WRITING dialog will be displayed.  (2) The current MY TEXT will be displayed on the first 3 lines. If not yet written, the lines will be blank.  Use the ▲/▼/◄/▶ buttons and the ENTER or INPUT button to select and enter characters. To erase 1 character at one time, press the RESET button or press the ◄ and INPUT button at the same time. Also if you move the cursor to DELETE or ALL CLEAR on screen and press the ENTER or INPUT button, 1 character or all characters will be erased. The MY TEXT can be input up to 24 characters on each line.  (3) To change an already inserted character, press the ▲/▼ buttons to move the cursor on the character to be changed.  After pressing the ENTER or INPUT button, the character is selected. Then, follow the same procedure as described at the item (2) above.  (4) To finish entering text, move the cursor to the OK on screen and press the ▶, ENTER or INPUT button. To revert to the previous MY TEXT without saving changes, move the cursor to the CANCEL on screen and press the ◄, ENTER or INPUT button.  • The MY TEXT WRITING function is available only when the MY TEXT PASSWORD function is set to OFF. |
| SECURITY<br>INDICATOR | Selecting this item displays the SECURITY INDICATOR dialog. Use the   ▲/▼ buttons to select ON or OFF.  ON ⇔ OFF  When ON is selected while PIN LOCK or TRANSITION DETECTOR is ON,                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| STACK LOCK            | the <b>SECURITY</b> indicator blinks in the standby state (\$\mathbb{Q}\$73, 74).  Selecting this item displays the STACK LOCK dialog. For more information about this menu, check our web site (\$\mathbb{Q}\$User's manual (concise)).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

## Presentation tools

The projector has the following two convenient tools that enable on-screen presentations easily and quickly:

- PC-LESS Presentation ( below)
- USB Display (486)

#### **PC-LESS Presentation**

The PC-LESS Presentation reads image data from storage media inserted into the **USB TYPE A** port and displays the image on the following modes.

The PC-LESS Presentation can be started by selecting the **USB TYPE A** port as the input source. This feature allows you to make your presentations without using your computer.

- Thumbnail mode ( 78)
- Full Screen mode (Q 82)
- Slideshow mode ( 83)

#### [Supported storage media]

• USB memory (USB memory type, USB hard disk and USB card reader type)

**NOTE** • USB readers (adapters) that have more than one USB slot may not work (if the adapter is acknowledged as multiple devices connected).

- USB hubs may not work.
- USB devices with security software may not work.
- Be careful when inserting or removing a USB device. (42, 80)

## [Supported format]

FAT12, FAT16 and FAT32

**NOTE** • NTFS is not supported.

### [Supported file format]

- JPEG (.jpeg, .jpg) \* Progressive is not supported.
- Bitmap (.bmp) \* 16bit mode and compressed bitmap is not supported.
- PNG (.png) \* Interlace PNG is not supported.
- GIF (.gif)

**NOTE** • Files with a resolution larger than the following are not supported.

CP-X4021N, CP-X5021N: 1024X768

CP-WX4021N: 1280 x 800

(\* Some computers may not support 1280 x 800.)

- Files with a resolution smaller than 36x36 are not supported.
- Files with a resolution smaller than 100x100 may not be displayed.
- Some supported files may not be displayed.
- Only a frame appears when the content of image data cannot be displayed in the Thumbnail mode.

#### Thumbnail mode

The Thumbnail mode displays the images stored in a USB storage device on the Thumbnail screen. Maximum 20 images are displayed in a screen.

If you wish, you can jump into the Full Screen mode or Slideshow mode, after you select some images in the Thumbnail mode.

The Thumbnail mode will be started as the primary function of the PC-LESS Presentation after selecting the **USB TYPE A** port as the input source.

## Operating by buttons or keys

You can control the images in the Thumbnail screen with the remote control or keypad or a web browser software. The following functions can be supported while the Thumbnail is displayed.

| The remote control   | The keypad on the projector | Web Remote in web browser software. | Functions                                                                                                                                                                                                                    |
|----------------------|-----------------------------|-------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

|       | SKIP   | Switch to ON to skip the selected image in the Slideshow. This setting information will be saved in the "playlist.txt" file (\$\subset\$85\$).                        |  |  |
|       | ROTATE | Press the ► cursor button or <b>ENTER</b> to rotate the selected image 90 degrees clockwise. This setting information will be saved in the "playlist.txt" file (□85). |  |  |

# Operating by the menu on the Thumbnail screen

You can also control the images by using the menu on the Thumbnail screen.

| Item        |           | Functions                                                                                                                                                                                                              |  |  |
|-------------|-----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|
| t.          |           | Moves to an upper folder.                                                                                                                                                                                              |  |  |
| SOF         | RT        | Allows you to sort files and folders as following.                                                                                                                                                                     |  |  |
|             | RETURN    | Press the ► cursor button or <b>ENTER</b> to return to the Thumbnail screen.                                                                                                                                           |  |  |
|             | NAME UP   | Sorts in ascending order by file name.                                                                                                                                                                                 |  |  |
|             | NAME DOWN | Sorts in descending order by file name.                                                                                                                                                                                |  |  |
|             | DATE UP   | Sorts in ascending order by file date.                                                                                                                                                                                 |  |  |
|             | DATE DOWN | Sorts in descending order.by file date.                                                                                                                                                                                |  |  |
| <b>◄/</b> ▶ | •         | Go to previous / next page.                                                                                                                                                                                            |  |  |
| SLIE        | DESHOW    | Configures and starts the Slideshow (483).                                                                                                                                                                             |  |  |
|             | RETURN    | Press the ▶ cursor button or <b>ENTER</b> to return to the Thumbnail screen.                                                                                                                                           |  |  |
|             | PLAY      | Press the ► cursor button or <b>ENTER</b> to start the Slideshow.                                                                                                                                                      |  |  |
|             | START     | Sets the beginning number of the Slideshow.                                                                                                                                                                            |  |  |
|             | STOP      | Sets the end number of the Slideshow.                                                                                                                                                                                  |  |  |
|             | INTERVAL  | Sets the interval time of the Slideshow.                                                                                                                                                                               |  |  |
|             | PLAY MODE | Selects the Slideshow mode.                                                                                                                                                                                            |  |  |
| INPU        | JT        | Switches the input port.                                                                                                                                                                                               |  |  |
| MEN         | NU        | Displays the menu.                                                                                                                                                                                                     |  |  |
| REMOVE USB  |           | Be sure to use this function before removing USB storage device from the projector. After that, the projector will not recognize a USB storage device until you insert it again into the <b>USB TYPE A</b> input port. |  |  |

**NOTE** • These operations are not accessible while the projector OSD is displayed.

- The Thumbnail mode shows 20 pictures in 1 page as maximum.
- It is not possible to change the input port by using the INPUT button when the Thumbnail screen, Slideshow, or Full Screen is displayed.
- Some error icons will be displayed in the Thumbnail.

- This file seems to be broken or not supported format.

A file that cannot be displayed on the thumbnail screen is indicated by a file format icon.

#### **Full Screen Mode**

The Full Screen mode shows a full display image. To display in Full Screen mode, select an image in the Thumbnail screen. Then press the **ENTER** button on the remote control or the **INPUT** button on the keypad, or click **[ENTER]** on the Web Remote Control.

The following functions can be supported in the Full Screen mode.

|                           | Button operati              |                                     |                             |
|---------------------------|-----------------------------|-------------------------------------|-----------------------------|
| The remote control        | The keypad on the projector | Web Remote in web browser software. | Functions                   |
| ▼<br>►<br>or<br>PAGE DOWN | or ►                        | DOWN, RIGHT<br>or<br>PAGE DOWN      | Shows the next picture.     |
| ▲ or PAGE UP              | <b>▲</b> or <b>◄</b>        | UP, LEFT<br>or<br>PAGE UP           | Shows the previous picture. |
| ENTER                     | INPUT                       | ENTER                               | Displays Thumbnail.         |

**NOTE** • These operations are not accessible while the projector OSD is displayed. • It is not possible to change the input port by using the **INPUT** button when the Thumbnail screen, Slideshow, or Full Screen is displayed.

#### Slideshow mode

The Slideshow mode displays images in full screen and switches the images at intervals set in INTERVAL on the Thumbnail screen menu (\$\omega78\$).

You can start this function from the Slideshow menu. To display the Slideshow menu, select the SLIDESHOW button in the Thumbnail mode and press the **ENTER** button on the remote control or **INPUT** button on the projector.

The following operations can be accessible while the Slideshow is displayed.

|                    | Button operation          |       |                    |
|--------------------|---------------------------|-------|--------------------|
| The remote control | I on the I in web prowser |       | Functions          |
| ENTER              | INPUT                     | ENTER | Displays thumbnail |

<sup>\*</sup> These operations are not accessible while the projector OSD is displayed.

 $\textbf{NOTE}\, \bullet \text{It}$  is not possible to change the input port by using the INPUT button when the Thumbnail screen, Slideshow, or Full Screen is displayed.

• When the Slideshow mode is set to ONE TIME, the last slide of the presentation will be held on screen till the **ENTER** button on the remote control or Web Remote Control, or **INPUT** button on the projector is pushed.

You can play the Slideshow at your desired configuration. Configure the Slideshow items in the Thumbnail.

1) RETURN : Returns to the thumbnail mode.

2) PLAY : Play the Slideshow.

3) START : Set the beginning number of the

Slideshow.

4) STOP : Set the end number of the Slideshow.

5) INTERVAL : Set the interval time of the Slideshow.

It is not recommend to set the interval time very short something like several seconds, because it may take more than several seconds to read and display an image file if it is stored in very deep layer directory or if so many files are stored in

the same directory.

6) PLAY MODE : Select the Slideshow mode.

ONE TIME: Play the Slideshow one

time.

ENDLESS: Play the Slideshow endless.

- The settings for the START, STOP, INTERVAL, and PLAY MODE are saved to the Playlist.
- If the storage media is under the write protection or the "playlist.txt" is the read only type file, it is impossible to change the settings of the Slideshow.

## **Playlist**

The Playlist is a DOS format text file, which decides the order of displayed still image files in the Thumbnail or Slideshow.

The playlist file name is "playlist.txt" and it can be edited on a computer. It is created in the folder that contains the selected image files when the PC-LESS Presentation is started or the Slideshow is configured.

[Example of "playlist.txt" files]

```
START setting : STOP setting : INTERVAL setting : PLAY MODE setting : img001 ing: : :
```

img001.jpg: : : : img002.jpg:600: : : img003.jpg:700:rot1: : img004.jpg: : :SKIP:

img005.jpg:1000:rot2:SKIP:

The "playlist.txt" file contains the following information.

Each piece of information requires to be separated by ":", and ":" at the end of each line.

1st line: START, STOP, INTERVAL and PLAY MODE settings (484).

2nd line and after: file name, interval time, rotation setting and skip setting.

interval time: It can be set from 0 to 999900 (ms) with an increment of 100 (ms).

rotation setting: "rot1" means a rotation at 90 degrees clockwise; "rot2" and

"rot3" increase another 90 degrees in order.

skip setting: "SKIP" means that the image will not be displayed in the Slideshow.

**NOTE** • The maximum length in a line on the "playlist.txt" file is 255 characters including linefeed. If any line exceeds the limit, the "playlist.txt" file becomes invalid.

 $\bullet$  Up to 999 files can be registered to the Playlist. However, if some folders exist in the same directory the limit number is decreased by the number of folders.

Any files over the limit will not be shown in the Slideshow.

- If the storage device is protected or does not have sufficient space, the "playlist.txt" file cannot be created.
- For the Slideshow settings, refer to the section **Slideshow mode** ( $\square$ 83).

# **USB Display**

The projector can display images transferred from a computer via an USB cable (110).

Hardware and software requirement for computer

• OS: One of the following. (32 bit version only)

Windows ® XP Home Edition / Professional Edition

Windows Vista <sup>®</sup> Home Basic /Home Premium /Business /Ultimate /Enterprise Windows <sup>®</sup> 7 Starter /Home Basic /Home Premium /Professional / Ultimate /Enterprise

• CPU: Pentium 4 (2.8 GHz or higher)

· Graphic card: 16 bit, XGA or higher

• Memory: 512 MB or higher

• Hard disk space: 30 MB or higher

USB Port

• USB cable : 1 piece

Select the USB DISPLAY for the USB TYPE B item in the OPTION menu. When you connect your computer to the **USB TYPE B** port on the projector using a USB cable, the projector will be recognized as a CD-ROM drive on your computer. Then, the software in the projector, "LiveViewerLiteUSB.exe", will run automatically and the application, "LiveViewer Lite for USB", will be ready on your computer for the USB Display. The application, "LiveViewer Lite for USB", will be automatically closed when the USB cable is unplugged.

**NOTE** • If the software does not start automatically (this is typically because CD-ROM autorun is disabled on your OS), follow the instructions below.

- (1) Click on the [Start] button on the toolbar and select the "Run"
- (2) Enter F:\LiveViewerLiteUSB.exe and then press the [OK]

If your CD-ROM drive is not drive F on your computer, you will need to replace F with the correct drive letter assigned to your CD-ROM drive.

- CD-ROM autorun is disabled while the screen saver is running.
- The image transmission from the computer is suspended while the password-protected screen saver is running. To resume the transmission, exit the screen saver.
- Check our web site for the latest version of the software and its manual. ( User's Manual (concise))

Follow the instructions that can be obtained at the site for updating.

This application will appear in the Windows notification area once it starts. You can quit the application from your computer by selecting "Quit" on the menu.

**NOTE** • The "LiveViewer" (refer to the **User's Manual** • **Network Guide**) and this application cannot be used at the same time. If you connect your computer to the projector by using a USB

cable while the "LiveViewer" is running, the following message will be displayed.

- If any application software having the firewall function is installed into your computer, make the firwall function invalid with following the user's manual.
- Some security software may block image transmission. Please change the security software setting to allow the use of "LiveViewer Lite for USB".

## USB Display (continued)

### Right-Click menu

The menu shown in the right will be displayed when you right-click the application icon in the Windows notification area.

Display: The Floating menu is displayed, and the icon disappears from the

Windows notification area.

Quit : The application is closed, and the icon disappears from the Windows

notification area.

**NOTE** • If you wish to restart the application, you need to unplug the USB cable and plug it again.

# Floating menu

If you select "Display" on the Right-Click menu, the Floating menu shown in the right will appear on your computer screen.

- ① Start capture button

  The transmission to the projector is started and the images will be displayed.
- ② Stop button
  The image transmission is stopped.
- 3 Hold button

The image on the projector's screen is temporally frozen. The last image before the button is clicked is remained on the screen. You can revise the image data on your computer without showing it on the projector's screen.

- ④ Option button The Options window is displayed.
- ⑤ Minimize button The Floating menu is closed, and the icon reappears in the Windows notification area.

**NOTE** • If you click the Start capture button and/or Stop button repeatedly, images may not be displayed on the screen.

#### USB Display (continued)

### **Options window**

If you select the Option button on the Floating menu, the Options window is displayed.

#### **Optimize Performance**

The "LiveViewer Lite for USB" captures screenshots in JPEG data and sends them to the projector. The "LiveViewer Lite for USB" has two options that have different compression rate of JPEG data.

### **Transmission speed**

Speed takes priority over Image quality.

It makes JPEG compression rate higher.

The screen on the projector is rewritten quicker because the transferred data is smaller, but the image quality is worse.

### Image quality

Image quality takes priority over Speed.

It makes JPEG compression rate lower.

The screen on the projector is rewritten slower because the transferred data is larger, but the image quality is better.

## **Keep PC resolution**

If you remove the check mark from the **[Keep PC resolution]** box, the screen resolution of your computer will be switched as follows, and the display speed may be faster.

CP-X4021N, CP-X5021N: 1024X768 (XGA)

CP-WX4021N: 1280 x 800

If your computer does not support the display resolution specified above, a smaller resolution that is the largest among the resolutions that are supported by the computer will be selected.

**NOTE** • When the resolution is changed, the arrangement of icons on computer desktop screen may be changed.

#### **About**

The version information of the "LiveViewer Lite for USB".

### Maintenance

# Replacing the lamp

A lamp has finite product life. Using the lamp for long periods of time could cause the pictures darker or the color tone poor. Note that each lamp has a different lifetime, and some may burst or burn out soon after you start using them. Preparation of a new lamp and early replacement are recommended. To prepare a new lamp, make contact with your dealer and tell the lamp type number.

Type number: DT01171

### Replacing the lamp

- 1. Turn the projector off, and unplug the power cord. Allow the projector to cool for at least 45 minutes.
- 2. Prepare a new lamp. If the projector is mounted on a ceiling, or if the lamp has broken, also ask the dealer to replace the lamp.

### In case of replacement by yourself, follow the following procedure.

- 3. Loosen the screw (marked by arrow) of the lamp cover and then slide and lift the lamp cover to the side to remove it.
- 4. Loosen the 3 screws (marked by arrow) of the lamp, and slowly pick up the lamp by the handles. Never loosen any other screws.
- 5. Insert the new lamp, and retighten firmly the 3 screws of the lamp that are loosened in the previous process to lock it in place.
- 6. While putting the interlocking parts of the lamp cover and the projector together, slide the lamp cover back in place. Then firmly fasten the screw of the lamp cover.
- 7. Turn the projector on and reset the lamp time using the LAMP TIME item in the OPTION menu.
  - (1) Press the **MENU** button to display a menu.
  - (2) Point at the ADVANCED MENU in the menu using the ▼/▲ button, then press the ▶ button.
  - (3) Point at the OPTION in the left column of the menu using the ▼/▲ button, then press the ▶ button.
  - (4) Point at the LAMP TIME using the ▼/▲ button, then press the ▶ button. A dialog will appear.
  - (5) Press the ▶ button to select "OK" on the dialog. It performs resetting the lamp time.

**NOTE** • Please reset the lamp time only when you have replaced the lamp, for a suitable indication about the lamp.

### Replacing the lamp (continued)

# Lamp warning

# A HIGH VOLTAGE

**► WARNING** ► The projector uses a high-pressure mercury glass lamp. The lamp can break with a loud bang, or burn out, if jolted or scratched, handled while hot, or worn over time. Note that each lamp has a different lifetime, and some may burst or burn out soon after you start using them. In addition, if the bulb bursts, it is possible for shards of glass to fly into the lamp housing, and for gas containing mercury and dust containing fine particles of glass to escape from the projector's vent holes.

▶ About disposal of a lamp: This product contains a mercury lamp; do not put it in a trash. Dispose of it in accordance with environmental laws.

- For lamp recycling, go to www.lamprecycle.org (in the US).
- For product disposal, consult your local government agency or www.eiae.org (in the US) or www.epsc.ca (in Canada).

For more information, call your dealer.

the plug

from the

power

outlet

 If the lamp should break (it will make a loud bang when it does). unplug the power cord from the outlet, and make sure to request a replacement lamp from your local dealer. Note that shards of glass could damage the projector's internals, or cause injury during handling, so please do not try to clean the projector or replace the lamp yourself.

• If the lamp should break (it will make a loud bang when it does), ventilate the Disconnect room well, and make sure not to inhale the gas or fine particles that come out from the projector's vent holes, and not to get them into your eyes or mouth.

 Before replacing the lamp, turn the projector off and unplug the power cord, then wait at least 45 minutes for the lamp to cool sufficiently. Handling the lamp while hot can cause burns, as well as damaging the lamp.

Never unscrew except the appointed (marked by an arrow) screws.

- Do not open the lamp cover while the projector is suspended from a ceiling. This is dangerous, since if the lamp's bulb has broken, the shards will fall out when the cover is opened. In addition, working in high places is dangerous, so ask your local dealer to have the lamp replaced even if the bulb is not broken.
- Do not use the projector with the lamp cover removed. At the lamp replacing, make sure that the screws are screwed in firmly. Loose screws could result in damage or injury.
- Use only the lamp of the specified type. Use of a lamp that does not meet the lamp specifications for this model could cause a fire, damage or shorten the life of this product.

- If the lamp breaks soon after the first time it is used, it is possible that there are electrical problems elsewhere besides the lamp. If this happens, consult your local dealer or a service representative.
- Handle with care: jolting or scratching could cause the lamp bulb to burst during use.
- Using the lamp for long periods of time, could cause it dark, not to light up or to burst. When the pictures appear dark, or when the color tone is poor, please replace the lamp as soon as possible. Do not use old (used) lamps; this is a cause of breakage.

# Cleaning and replacing the air filter

Please check and clean the air filter periodically. When the indicators or a message prompts you to clean the air filter, comply with it as soon as possible. The air filter of this projector consists of a filter cover and a filter unit with two types of filter. If one or both of the filters are damaged or heavily soiled, replace the filter unit with a new one.

Request for a filter unit with the following type number from your dealer when purchasing a new unit.

### Type number: MU06641 (Filter unit)

The specified filter unit also comes with a replacement lamp for this projector. Please replace the filter unit as well when you replace the lamp.

- 1. Turn the projector off, and unplug the power cord. Allow the projector to sufficiently cool down.
- 2. Use a vacuum cleaner on and around the filter cover.
- 3. Pick and pull up the filter cover knobs to take it off.
- 4. Press up slightly the bottom side knobs to unlock the bottom side of the filter unit. Pull the center knob to take the filter unit off.
- Use a vacuum cleaner for the filter vent of the projector and the outer side of the filter unit.
- 6. The filter unit consists of two parts. Press down around the interlocking parts to unlock, then separate the two parts.
- 7. Use a vacuum cleaner for the inner side of each part of the filter unit to clean them up. If the filters are damaged or heavily soiled, replace them with the new ones.
- 8. Combine the two parts to reassemble the filter unit.
- O Put the filter unit back into the projector.

### Cleaning and replacing the air filter (continued)

- 10 Put the filter cover back into the place.
- 11. Turn the projector on and reset the filter time using the FILTER TIME item in the EASY MENU.
  - (1) Press the MENU button to display a menu.
  - (2) Point at the FILTER TIME using the ▲/▼ cursor buttons, then press the ▶ cursor (or the ENTER / the RESET) button. A dialog will appear.
  - (3) Press the ▶ cursor button to select the "OK" on the dialog. It performs resetting the filter time.
- **★WARNING** ► Before taking care of the air filter, make sure the power cable is not plugged in, then allow the projector to cool sufficiently.
- ▶ Use only the air filter of the specified type. Do not use the projector without the air filter or the filter cover. It could result in a fire or malfunction to the projector.
- ▶ Clean the air filter periodically. If the air filter becomes clogged by dust or the like, internal temperatures rise and could cause a fire, a burn or malfunction to the projector.

**NOTE** • Please reset the filter time only when you have cleaned or replaced the air filter, for a suitable indication about the air filter.

• The projector may display the message such as the "CHECK THE AIR FLOW" or turn off the projector, to prevent the internal heat level rising.

# Replacing the internal clock battery

This projector has internal clock that uses a battery. When the clock of the network function does not work correctly, please try solution by replacement of the battery: **HITACHI MAXELL**, part number **CR2032** or **CR2032H**.

- 1. Turn the projector off, and unplug the power cord. Allow the projector to cool sufficiently.
- After making sure that the projector has cooled adequately, slowly turn over the projector, so that the bottom is facing.
- 3. There is a raised dot near the battery cover at the bottom of the projector. Turn the cover in the direction indicated **OPEN** to position one end of the slit on the cover with the dot, using a coin or the like. And then pick the cover up to remove it.
- 4. Pry up the battery using a flathead screwdriver or the like to take it out. While prying it up, put a finger lightly on the battery since it may pop out of the holder.
- 5. Replace with a new battery of the specified type. With the plus side facing up, slide the battery under the claw of the spring fitting. And press down on the battery until it snaps into place.
- 6. Replace the battery cover in place, then turn it in the direction indicated **CLOSE** to position the knob of the cover with the dot on the bottom case to fix the cover, using a coin or the like.

**NOTE** • The internal clock will be initialized by removing the battery. For setting the clock, see the **User's Manual - Network Guide**.

- Use only the specified and perfect battery. Do not use a battery with damage, such as a scratch, a dent, rust or leakage.
- When replacing the battery, replace it with a new battery.
- When a battery leaked, wipe the leakage out well with a waste cloth. If the leakage adhered to your body, immediately rinse it well with water. When a battery leaked in the battery holder, replace the batteries after wiping the leakage out.
- Make sure the plus and minus terminals are correctly aligned when loading a battery.
- Do not work on a battery; for example recharging or soldering.
- Keep a battery in a dark, cool and dry place. Never expose a battery to a fire or water.
- Keep a battery away from children and pets. Be careful for them not to swallow a battery. If swallowed consult a physician immediately for emergency treatment.

Obey the local laws on disposing a battery.

#### Other care

#### Inside of the projector

In order to ensure the safe use of your projector, please have it cleaned and inspected by your dealer about once every year.

#### Caring for the lens

If the lens is flawed, soiled or fogged, it could cause deterioration of display quality. Please take care of the lens, being cautious of handling.

- 1. Turn the projector off, and unplug the power cord. Allow the projector to cool sufficiently.
- 2. After making sure that the projector is cool adequately, lightly wipe the lens with a commercially available lens-cleaning wipe. Do not touch the lens directly with your hand.

#### Caring for the cabinet and remote control

Incorrect care could have adverse influence such as discoloration, peeling paint, etc.

- 1. Turn the projector off, and unplug the power cord. Allow the projector to cool sufficiently.
- 2. After making sure that the projector is cool adequately, lightly wipe with gauze or a soft cloth.
  - If the projector is extremely dirty, dip soft cloth in water or a neutral cleaner diluted in water, and wipe lightly after wringing well. Then, wipe lightly with a soft, dry cloth.
- ▲ **WARNING** ► Before caring, make sure the power cord is not plugged in, and then allow the projector to cool sufficiently. The care in a high temperature state of the projector could cause a burn and/or malfunction to the projector.
- ▶ Never try to care for the inside of the projector personally. Doing is so dangerous.
- ► Avoid wetting the projector or inserting liquids in the projector. It could result in a fire, an electric shock, and/or malfunction to the projector.
- Do not put anything containing water, cleaners or chemicals near the projector.
- Do not use aerosols or sprays.
- **△CAUTION** ► Please take right care of the projector according to the following. Incorrect care could cause not only an injury but adverse influence such as discoloration, peeling paint, etc.
- ▶ Do not use cleaners or chemicals other than those specified in this manual.
- ▶ Do not polish or wipe with hard objects.

**NOTICE** ► Do not directly touch the lens surface with hands.

# Troubleshooting

If an abnormal operation should occur, stop using the projector immediately.

▲ WARNING ► Never use the projector if abnormal operations such as smoke, strange odor, excessive sound, damaged casing or elements or cables, penetration of liquids or foreign matter, etc. should occur. In such cases, immediately disconnect the power plug from the power outlet. After making sure that the smoke or odor has stopped, contact to your dealer or service company.

Otherwise if a problem occurs with the projector, the following checks and measures are recommended before requesting repair.

If this does not resolve the problem, please contact your dealer or service company. They will tell you what warranty condition is applied.

# **Related messages**

When some message appears, check and cope with it according to the following table. Although these messages will be automatically disappeared around several minutes, it will be reappeared every time the power is turned on.

Please wait.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Blinking<br>In <b>Red</b>                      | (discre-<br>tionary)      | (discre-<br>tionary)      | The projector is cooling down. A certain error has been detected.  Please wait until POWER indicator finishes blinking, and then perform the proper measure using the item descriptions below.                                                                                                                                                                                                                                                                                                                                                                                   |
| Blinking<br>In Red<br>or<br>Lighting<br>In Red | Lighting<br>In Red        | Turned<br><b>off</b>      | The lamp does not light, and there is a possibility that interior portion has become heated.  Please turn the power off, and allow the projector to cool down at least 20 minutes. After the projector has sufficiently cooled down, please make confirmation of the following items, and then turn the power on again.  • Is there blockage of the air passage aperture?  • Is the air filter dirty?  • Does the peripheral temperature exceed 35°C?  If the same indication is displayed after the remedy, please change the lamp referring to the section Replacing the lamp. |
| Blinking<br>In Red<br>or<br>Lighting<br>In Red | Blinking<br>In <b>Red</b> | Turned <b>off</b>         | The lamp cover has not been properly fixed. Please turn the power off, and allow the projector to cool down at least 45 minutes. After the projector has sufficiently cooled down, please make confirmation of the attachment state of the lamp cover. After performing any needed maintenance, turn the power on again. If the same indication is displayed after the remedy, please contact your dealer or service company.                                                                                                                                                    |
| Blinking<br>In Red<br>or<br>Lighting<br>In Red | Turned<br><b>off</b>      | Blinking<br>In <b>Red</b> | The cooling fan is not operating. Please turn the power off, and allow the projector to cool down at least 20 minutes. After the projector has sufficiently cooled down, please make confirmation that no foreign matter has become caught in the fan, etc., and then turn the power on again.  If the same indication is displayed after the remedy, please contact your dealer or service company.                                                                                                                                                                             |

### Regarding the indicator lamps (continued)

| POWER indicator                                   | LAMP                                   | TEMP indicator     | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|---------------------------------------------------|----------------------------------------|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Blinking<br>In Red<br>or<br>Lighting<br>In Red    | Turned off                             | Lighting<br>In Red | There is a possibility that the interior portion has become heated.  Please turn the power off, and allow the projector to cool down at least 20 minutes. After the projector has sufficiently cooled down, please make confirmation of the following items, and then turn the power on again.  Is there blockage of the air passage aperture?  Is the air filter dirty?  Does the peripheral temperature exceed 35°C?  If the same indication is displayed after the remedy, please set FAN SPEED of SERVICE item in OPTION menu to HIGH (159). |
| Lighting<br>In Green                              | Simultaneous<br>blinking in <b>Red</b> |                    | It is time to clean the air filter.  Please immediately turn the power off, and clean or change the air filter referring to the section Cleaning and replacing the air filter. After cleaning or changing the air filter, please be sure to reset the filter timer.  After the remedy, reset the power to ON.                                                                                                                                                                                                                                    |
| Lighting<br>In Green                              | Alternative blinking in Red            |                    | There is a possibility that the interior portion has become overcooled.  Please use the unit within the usage temperature parameters (5°C to 35°C).  After the treatment, reset the power to ON.                                                                                                                                                                                                                                                                                                                                                 |
| Blinking In<br>Green for<br>approx. 3<br>seconds. | Turned <b>off</b>                      | Turned <b>off</b>  | At least 1 Power ON schedule is saved to the projector. Please refer to Schedule Settings section of User's Manual - Network Guide.                                                                                                                                                                                                                                                                                                                                                                                                              |

**NOTE** • When the interior portion has become overheated, for safety purposes, the projector is automatically shut down, and the indicator lamps may also be turned off. In such a case, disconnect the power cord, and wait at least 45 minutes. After the projector has sufficiently cooled down, please make confirmation of the attachment state of the lamp and lamp cover, and then turn the power on again.

# Shutting the projector down

Only when the projector can not be turned off by usual procedure (\$\sum 18\$), please push the shutdown switch using a pin or similar, and disconnect the power plug from the power outlet. Before turning it on again, wait at least 10 minutes to make the projector cool down enough.

# **Resetting all settings**

When it is hard to correct some wrong settings, the FACTORY RESET function of SERVICE item in OPTION menu (\$\subseteq\$63\$) can reset all settings (except settings such as LANGUAGE, LAMP TIME, FILTER TIME, FILTER MESSAGE, SECURITY and NETWORK) to the factory default.

# Phenomena that may be easy to be mistaken for machine defects

About the phenomenon confused with a machine defect, check and cope with it according to the following table.

| Phenomenon                                       | Cases not involving a machine defect                                                                                                                                                                                                                                                                                                                                                                  |                |
|--------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| Power does not come on.                          | The electrical power cord is not plugged in. Correctly connect the power cord.                                                                                                                                                                                                                                                                                                                        |                |
|                                                  | The main power source has been interrupted during operation such as by a power outage (blackout), etc. Please disconnect the power plug from the power outlet, and allow the projector to cool down at least 10 minutes, then turn the power on again.                                                                                                                                                | 15             |
|                                                  | Either there is no lamp and/or lamp cover, or either of these has not been properly fixed.  Please turn the power off and disconnect the power plug from the power outlet, and allow the projector to cool down at least 45 minutes. After the projector has sufficiently cooled down, please make confirmation of the attachment state of the lamp and lamp cover, and then turn the power on again. | 89             |

| When the projector is connected to the network, it powers off and on as described below. Powers off   POWER indicator blinks in orange a few times  Goes into standby mode | Disconnect the LAN cable and check that the projector is working properly.  If this phenomenon occurs after connecting to the network, there may be a loop between two Ethernet switching hubs within the network, as explained below.  - There are two or more Ethernet switching hubs in a network.  - Two of the hubs are doubly connected by LAN cables.  - This double connection forms a loop between the two hubs.  Such a loop may have an adverse effect on the projector as well as the other network devices.  Check the network connection and remove the loop by disconnecting the LAN cables such that there is only one connecting cable between two hubs. | -              |

# User's Manual (detailed) Network Guide

# Thank you for purchasing this product.

This manual is intended to explain only the network function. For proper use of this product, please refer to this manual and the other manuals for this product.

**△WARNING** ► Before using this product, be sure to read all manuals for this product. After reading them, store them in a safe place for future reference.

#### **Features**

This projector has the network function that brings you the following main features.

- ✓ Network Presentation : allows the projector to project computer images transmitted through a network. (□37)
- ✓ Web Control : allows you to monitor and control the projector through a network from a computer. (☐45)
- ✓ My Image : allows the projector to store up to four still images and project them. (□70)
- ✓ Messenger: allows the projector to display text sent from a computer through a network.
   (□72)
- ✓ Network Bridge: allows you to control an external device through the projector from a computer. (□74)

**NOTE** • The information in this manual is subject to change without notice.

- The manufacturer assumes no responsibility for any errors that may appear in this manual.
- The reproduction, transfer or copy of all or any part of this document is not permitted without express written consent.

# 1. Connection to the network

# 1.1 System requirements

#### 1.1.1 Required equipment preparation

The following equipments are required to connect the projector to your computer through the network.

- ✓ Projector
- ✓ LAN cable (to connect the projector to a network): CAT-5 or greater
- ✓ Computer (minimum 1 set): equipped with the network feature (100Base-TX or 10Base-T)

# 1.1.2 Hardware and software requirement for computer

The "LiveViewer" software needs to be installed on all the computers to connect to the projector through a network. To use the "LiveViewer" your computer needs to meet the following requirements.

✓ OS: One of the following.

Windows ® XP Home Edition /Professional Edition (32 bit version only)

Windows Vista <sup>®</sup> Home Basic /Home Premium /Business /Ultimate /Enterprise (32 bit version only)

Windows ® 7 Starter /Home Basic /Home Premium /Professional /Ultimate / Enterprise (32 bit version only)

- ✓ **CPU**: Pentium 4 (2.8 GHz or higher)
- ✓ Graphic card: 16 bit, XGA or higher
- \* When using the "LiveViewer" it is recommended that the display resolution of your computer is set to 1024 x 768.
- ✓ Memory: 512 MB or higher
- √ Hard disk space: 100 MB or higher
- ✓ **Web browser**: Internet Explorer ® 6.0 or higher
- √ CD-ROM drive
  - **NOTE** The network communication control is disabled while the projector is in standby mode if the STANDBY MODE item is set to SAVING. Please connect the network communication to the projector after setting the STANDBY MODE to NORMAL. (
    SETUP menu in the User's Manual Operating Guide)
  - You can get the latest version of the "LiveViewer" and the latest information for this product from our website. ( 17)
  - Depending on the specification of your computer, the computer may slow down due to high CPU usage when the "LiveViewer" is running.
  - The "LiveViewer" does not work on Windows Vista® that is not updated to Service Pack 1 or later. Please install the latest Service Pack on your Windows Vista®.

# 1.1 System requirements (continued)

**NOTE** • Referring to the manual of your computer or Windows, select the following or a smaller display resolution for the computer.

CP-X4021N, CP-X5021N: 1024 x 768 (XGA)

CP-WX4021N: 1280 x 800

When a resolution larger than the specified resolution is selected, the projector will convert and display in the specified resolution, and the display speed may become faster. If your computer does not support the display resolution specified above, a smaller resolution that is the largest among the resolutions that are supported by the computer will be selected.

• Images might not been transmitted, caused by OS version or the driver software for Network Adapter on your computers. It is highly recommended that OS and the driver should be updated to the latest.

# 1.2 Installing the "LiveViewer"

# 1.2.1 Installing the "LiveViewer"

The "LiveViewer" software needs to be installed on all the computers to connect to the projector through a network.

You need to log in as an administrator user to install the software.

- 1) Turn on the computer.
- 2) Shut down all applications.
- 3) Insert the accompanying CD-ROM into the computer's CD-ROM drive.

**NOTE** • After sequence 3), the User Account Control (UAC) dialog will appear (if you are using Windows Vista or Windows <sup>®</sup> 7). Please click the **[Allow]** to continue installation.

4) After a moment, the Choose Setup Language dialog will appear as shown on the right. Select what you like to use in the list, and click the **[OK]**.

**NOTE** • If the Choose Setup Language dialog doesn't appear, proceed as follows:

- (1) Click on the [Start] button on the toolbar and select the "Run".
- (2) Enter E:\software\setup.exe and then press the [OK].

If your CD-ROM drive is not drive E on your computer, you will need to replace E with the correct drive letter assigned to your CD-ROM drive.

If the software has been already installed, Uninstallation will be done. Click the **[Cancel]** button, then uninstallation will be canceled. If you uninstalled the software by miss-operation, please re-install the software from first procedure.

5) After a moment, the Welcome dialog will appear as shown on the right. Press the **[Next]**.

# 1.2 Installing the "LiveViewer" (continued)

- 6) The License Agreement dialog appears. If you accept it, select "I accept the terms of the license agreement" and press the [Next].
- 7) The Choose Destination Location dialog appears. Press the **[Next]**.

**NOTE** • The C:\Program Files\Projector Tools\LiveViewer folder will be created and the program will be installed into that folder. If you wish to install to a different folder, click the **[Browse]** and select another folder.

- 8) Confirm the program folder name. If "Projector Tools" is okay, press the [Next] to continue. If not, enter the desired folder name and then press the [Next].
- 9) The Hardware Installation dialog appears. Press Continue Anyway.

**NOTE** • After sequence 8), the Windows Security dialog will appear if you are using Windows Vista or Windows <sup>®</sup> 7. Please click the **[Install this driver software anyway]** and continue installation.

- 10) After a moment, installation will complete and the Setup Complete dialog will appear as shown on the right. Click the [Finish]. This completes the software installation. Then your computer automatically restarts.
  - (1) To confirm that the software has been properly installed, press the [Start] button on the toolbar, select All Programs and then select the Projector Tools folder.
  - (2) The "LiveViewer" will appear in that folder if the installation was successful.

# LiverViewer - Installshield Wizard License Agreement Please med it having license agreement carefully. License Agreement Mash Consume Declaration. In the Customer Declaration. # 1.2.2 Updating the "LiveViewer"

Please check and get the latest version at Hitachi Web site.

http://www.hitachi-america.us/digitalmedia or http://www.hitachidigitalmedia.com Some functions explained in this manual require the "LiveViewer" Version 4.xx. (In the version information a number between 00 and 99 will replace the xx.)

# 1.3 Process to connect the network

Before connecting your computer and projector via a network, make sure that the **LAN** port is selected as the input source on the projector. ( **Operating in the User's Manual – Operating Guide**) Otherwise a connection cannot be established.

#### 1.3.1 Process overview

An overview of the process to connect your computer and the projector via a network is shown below.

The "LiveViewer" allows you to skip some of the steps below to establish a network connection quickly and easily.

**NOTE** • Wireless LAN can be selected only when an access point to convert wireless LAN to wired LAN exists between your computer and the projector.

• Up to 30 computers can be simultaneously connected to the projector through a network.

# 1.3 Process to connect the network (continued)

# 1.3.2 Starting the "LiveViewer"

Start the "LiveViewer" in your computer, taking one of the followings.

- 1) Double click the "LiveViewer" icon on the Desktop in your computer
- 2) Select "Start" → "All Programs" → "Projector Tools" → "LiveViewer" on Windows menu.

Then, proceed to item 1.4 Selecting the network connection mode. (410)

# 1.4 Selecting the network connection mode

After starting the "LiveViewer", the "Select the Network Connection" screen comes up. Select the network connection that you would like to use. There are 3 options in the menu.

- Wireless LAN
- Wired I AN
- My Connection

If you select either the wireless LAN or wired LAN, proceed to item 1.4.1 Selecting either the wireless LAN or wired LAN. (\(\subseteq\) below)

If you select My Connection, jump to item 1.4.2 Selecting My Connection. (412)

**NOTE** • This dialog will not be displayed if the computer has just one network adapter and no My Connection is registered. Proceed to item **1.5 Selecting the network connection method**. (114)

• Select Wireless LAN only when you connect the computer and the access point via wireless network and connect the access point and the projector via wired network, since the projector doesn't have wireless LAN function.

#### 1.4.1 Selecting either the wireless LAN or wired LAN

If you select either the wireless LAN or wired LAN, a list of the network adapters in your computer is shown in the menu.

Select what you like to use in the list, and click the **[Next]**.

Then, proceed to item 1.5 Selecting the network connection method. (414)

**NOTE** • If you select the wireless LAN, the wireless LAN adapters in your computer are shown in the list.

• If the wired LAN is selected, the wired LAN adapters in your computer are shown.

# [Troubleshooting]

■ Are you sure that you want to turn on the network adapter?

The screen is displayed in the case that the selected network adapter is invalid.

- To turn it on, click the **[Yes]**, and then proceed to item **1.5**. (**11**)
- Not to turn it on, click the [No], and then the screen is back to the previous one to select another network adapter. If no more adapter in your computer, the "LiveViewer" will be closed.

A network connection was not established.

The screen is displayed in the case that the projector is not connected with a LAN cable to your computer when the wired LAN is selected.

Be sure that the projector is connected with a LAN cable to your computer.

Click the **[OK]**, then the screen is back to the previous one to select the network connection mode.

■ Windows firewall is enabled (On).

The screen is displayed in the case that the firewall setting is activated, and the "LiveViewer" is blocked by the firewall.

- To turn it disabled (Off), click the [Yes].
- Not to turn it disabled (Off), click the [No], but the projector may not be able to communicate with your computer through the network.

 If you put a check mark in the [Allow communication with LiveViewer by adding it to the Exceptions list] box, the "LiveViewer" will never be blocked by Windows firewall.

Proceed to item 1.5 Selecting the network connection method. (414)

**NOTE** • If you click the **[Yes]**, the network access by the "LiveViewer" is temporally permitted by Windows firewall, until the "LiveViewer" is closed.
• If any application software having the firewall function is installed into you computer, make the firewall function invalid with following the user's manual.

#### 1.4.2 Selecting My Connection

Select the [My Connection] and click the [Connect].

If you select the My Connection, the computer is connected to the projector through the network by using the profile data that is preassigned to My Connection. (435) When you select the My Connection, the computer immediately starts the connection to the projector.

Proceed to item 1.8 Confirming the connection to your destination. (430)

**NOTE** • If the DHCP is set on in the projector, the network connection between the projector and computer may not be established since IP address may be varied. If you like to use the My Connection, set the DHCP off in the projector.

• If no profile data is assigned to the My Connection, it can't be used.

# [Troubleshooting]

■ A network connection could not be established.

Windows prevented network configuration changes.

You may log in the Windows under User authority.

Click the **[OK]** to return to the screen to select the network connection mode. (**10**)

Consult to the network administrator and log in again under the Administrator authority. After that, please resume at item **1.3.2 Starting the "LiveViewer"**. (199)

■ Are you sure you want to connect the selected projector?

The message is appeared when the wireless adapter you selected is already used for another network connection.

- To connect, click the [Yes]. Proceed to item 1.8 Confirming the connection to your destination. (430)
- Not to connect, click the [No] to return to the screen to select the network connection mode. (10)

# 1.5 Selecting the network connection method

There are some options to connect to the network.

- Enter PassCode
- · Configure Manually
- Select From List

Select one of them to meet your requirement.

#### **Enter PassCode**

If you want to use the Passcode for network connection, select the **[Enter PassCode]** and click the **[Next]**.

The Passcode is given by the projector on screen. And you simply input the Passcode to the "LiveViewer" to connect the network.

Proceed to item 1.5.1 Passcode connection. (415)

#### **Configure Manually**

Select the [Configure Manually] and click the [Next].

Then, proceed to item 1.6 Manual Configuration. (423)

#### Select From List

Before selecting this item, your computer and the projectors need to be connected to the same network.

If the connection is already established, select the [Select From List].

From the list of the projectors connected to the network, select which projector you would like to send your images. Proceed to **1.8 Confirming the connection to your destination**. (430)

#### 1.5.1 Passcode connection

The unique Passcode system brings you very quick and simple connection to the network.

The Passcode is a code that expresses the network setting in the projector. If you input the code in the "LiveViewer" in your computer, the network setting in the projector and computer can be matched and the connection will be established immediately. The section is intended to explain how to use the Passcode.

### (1) Getting the Passcode

The Passcode is 12-digit code consisting of alphanumeric characters ("1-9" and "A-Z").

Example: PASSCODE 1234-5678-9ABC

The Passcode is given on the projector when the **LAN** port is selected as input source.

**NOTE** • The Passcode system does not work under the condition below. If such is the case, establish the connection manually.

1) Subnet mask is not Class A or B or C.

The Passcode system accepts Class A, B and C only. Class A:(255.0.0.0), Class B:(255.255.0.0), Class C:(255.255.255.0.0)

There are two methods to get the Passcode from the projector

#### Method 1

- 1) Turn on the projector, and make sure that the projector image is on screen.
- 2) Press the **COMPUTER** button on the remote control or **INPUT** button on the projector to select the LAN as input port.

If there is no signal on the **LAN** port, you can find the Passcode on screen.

#### Method 2

- 1) Turn on the projector, and make sure that the projector image is on screen.
- 2) Press the **MENU** button on the remote control or the **△**/**▼**/**◄**/**▶** buttons on the projector to show the menu on screen.
- 3) Use the ▲/▼ cursor buttons to select the Go to Advanced Menu..., and use the ▶ cursor button to enter the item.
- 4) Use the ▲/▼ cursor buttons to select the NETWORK, and use the ▶ cursor button to enter the item.
- 5) Use the ▲/▼ cursor buttons to select the INFORMATION, and use the ► cursor button to display the INFORMATION.
- 6) The Passcode appears in the INFORMATION window.

**NOTE** • Take the method 2 when you project your computer image by the "LiveViewer", or when the **LAN** port is not selected as input source.

• If no communication between the projector and computer in 5 minutes, the Passcode will be changed.

# (2) Entering the Passcode

If you select **[Enter PassCode]** at item **1.5**, the "Please enter the PassCode" screen is displayed. Please enter the Passcode divided 4-digit each in 3 boxes (total 12-digit).

Example PASSCODE: 1234 - 5678 - 9ABC

After entering the Passcode, click the **[Connect]** to start the connection to the projector.

Proceed to item 1.8 Confirming the connection to your destination. (430)

If you click the [Back], the screen is back to item 1.5 Selecting the network connection method. (414)

**NOTE** • When entering the Passcode, capital and small letters are not distinguished.

• If you are using a Subnet mask other than Class A, B or C, you will have to establish the connection manually.

If the manual setting screen is displayed, please follow item 1.5.1 (3). (421)

# [Troubleshooting]

Incorrect PassCode.

The incorrect Passcode was input.

Click the **[Back]** to return to the "Please enter the PassCode" screen.

Check the PassCode on the projector screen (1215) and enter the code again.

■ A network connection could not be established.

Windows prevented network configuration changes.

You may log in the Windows under User authority.

Click the **[OK]**, then the "LiveViewer" main menu is displayed even though the network is not established. Click on the main and go back to item **1.5 Selecting the network connection method**. (414)

Consult to the network administrator. Log in the Windows under Administrator authority. After that, please resume at item **1.3.2 Starting the "LiveViewer"**. (199)

If you need to add a Network configuration on your computer to connect to the projector.

This dialog will be displayed when you need to add a Network configuration on your computer to connect to the projector. Confirm with your network administrator if the Network configuration displayed on the dialog is OK, and then click the **[Yes]**.

Click the **[NO]**, then the "LiveViewer" main menu is displayed even though the network is not established. Click  $\frac{1}{2}$  on the main menu and go back to item **1.5** Selecting the network connection method. ( $\frac{1}{2}$ 14)

If you put a check mark in the box "Not displaying confirmation dialog for adding Network settings", the projector memorizes current configuration and this dialog is not displayed again. To display this dialog again, click Option \(\mathbb{\infty}\) icon in the "LiveViewer" main menu and remove the check mark in the box "Not displaying confirmation dialog for adding Network settings".

If you want to change the Network configuration to add, click the **[Change]**. A dialog for changing the Network configuration as shown to the right will be displayed. Enter IP address and subnet mask, then click the **[OK]**. Procedure to connect to the projector will start.

Proceed to item 1.8 Confirming the connection to your destination. (\$\square\$30\$) If you click the [Cancel], you will return to the dialog for adding a Network configuration.

If the entered IP address and projector's IP address are the same, a warning dialog shown to the right will be displayed.

Click the **[OK]**, and then enter a different IP address from the projector's one in the dialog for changing Network configuration.

If the connection is not available with the entered Network configuration, a warning dialog shown to the right will be displayed. Click the **[OK]** to return to the dialog for changing the Network configuration, and then enter appropriate configuration.

**NOTE** • If a Network configuration to connect to the projector has been added on the computer, the added Network configuration will be erased once the application software is closed.

■ Are you sure you want to connect the selected projector?

The message is appeared when the wireless adapter you selected is already used for another network connection.

- To connect, click the [Yes]. Proceed to item
   1.8 Confirming the connection to your destination. (□30)
- Not to connect, click the [No] then the "LiveViewer" main menu is displayed even though the network is not established. Click and on the main menu to go back to item 1.5 Selecting the network connection method. (414)

# (3) Configuring manually

After entering the Passcode (\$\toplus\$17), you are required to enter the network configuration manually if you use a Subnet mask other than Class A, B or C. (\$\toplus\$15) If you use the wired LAN, go to (\$\toplus\$22).

#### Wireless LAN

The projector is required to be connected to an access point by a LAN cable.

1) The setting on the access point. \*1 Enter the following information.

SSID : WirelessAccessPoint (example) Encryption: WEP64bit (example) Encryption key \*2: \*\*\*\*\*\*\*\*\*\*\*\*\* (example)

2) The setting on the projector. \*3
Enter the following information.
Subnet mask \*4: 255.255.255.128
(example)

- 3) Click the [Connect].
- 4) The wireless connection will be established.

  Proceed to item 1.8 Confirming the connection to your destination. (430)
- \*1 Contact the network administrator to find out the setting on the access point.
- \*2 If you use an encryption, you need to set it. Contact the network administrator to check the encryption key that is set in the projector.

  The encryption key is always shown as "\*\*\*\*\*\*\*\*\*."
- \*3 To find the network setting on the projector, refer to the NOTE. (422)
- \*4 If you use Subnet mask except Class A/B/C, please set it.

#### Wired LAN

1) Enter the following information for the projector.

Subnet mask \*1: 255.255.255.128 (example)

- 2) Click the [Connect].
- 3) The network connection will be established. Proceed to item 1.8 Confirming the connection to your destination. (□30)

\*1 If you use a Subnet mask other than Class A, B or C, this screen appears.

**NOTE** • If you require the network setting information on the projector, take the following procedure to find it out.

- 1) Turn on the projector, and make sure that the projector image is on screen.
- 2) Press the **MENU** button on the remote control or the **△**/**▼**/**◄**/**▶** buttons on the projector to show the menu on screen.
- 3) Use the ▲/▼ cursor buttons to select the Go to Advanced Menu..., and use the ▶ cursor button to enter the item.
- 4) Use the ▲/▼ cursor buttons to select the NETWORK, and use the ► cursor button to enter the item.
- Use the ▲/▼ cursor buttons to select the INFORMATION, and push the ► cursor button.
- 6) The setting will be displayed in the NETWORK INFORMATION-box.

# 1.6 Manual configuration

There are 3 options for the manual configuration.

- Profile ( below)
- History (**24**)
- Configure Network Settings Manually (425)

If you select Configure Network Settings Manually, proceed to item **1.7 Configuring the network settings manually**. (425)

#### Select the manual connection method you would like to use · Profile Profile name Date created 11/30/2009 3:19:46 PM 11/30/2009 3:19:41 PM New Edit Delete My Connection History Projector name IP address Last connected Projector-2 Projector-2 192.168.1.101 192.168.1.102 11/30/2009 3:23:24 PM 11/30/2009 3:22:24 PM 11/30/2009 3:21:24 PM Projector-3 192.168.1.103 Register to profile Configure Network Settings Manually. < Back Connect Exit

#### 1.6.1 Profile connection

Selecting a profile data connect the network with the projector.

It is required to store the profile data in advance. (\$\subset\$33)

- 1) Select the [Profile].
- 2) Choose a profile data listed in the window.
- 3) Click the [Connect].
- 4) The network connection will be established. Proceed to item 1.8 Confirming the connection to your destination. (\$\to\$30\$)

**NOTE** • To check the setting in a profile data, follow the process below.

- 1) Choose a profile data that you want to check.
- 2) Move the mouse cursor to the profile data, and click the right button on the mouse to display a pop-up menu.
- 3) Select the "Property" in the pop-up menu, and click the left button on the mouse.
- 4) The setting information of the selected profile data is shown.
- If the DHCP is set on in the projector, the network connection between the projector and computer may not be established since IP address may be varied. If you like to use the Profile connection, set the DHCP off in the projector.

#### 1.6 Manual configuration (continued)

# 1.6.2 History connection

The "LiveViewer" can memory the network settings when connecting to the projector as a history record. After that, selecting a history record can quickly connect the network with the projector.

- 1) Select the [History].
- 2) Choose a history record listed in the window.
- 3) Click the [Connect].

If you want to copy a history record to a profile data, select one of the history record and click the **[Register to profile]**. The profile data cannot be erased automatically.

**NOTE** • The number of the history record is maximum 10 for each network adapter. When the 11th data is stored, the oldest record among the 10 will be overwritten.

- The date & time information in each history record is renewed when the network is connected by using the history record.
- If the DHCP is set on in the projector, the network connection between the projector and computer may not be established since IP address may be varied.
- Even if you use the profile connection, it will be memorized as a history record.

# 1.7 Configuring the network settings manually

All setting for the network connection between the projector and computer is input manually.

Select the [Configure Network Settings Manually].

The information to be input manually is different, depending on how you want to connect the projector and computer.

#### Wireless LAN

The projector is required to be connected to an access point by a LAN cable. Go to  $(\square 26)$ .

#### Wired LAN

If you use the wired LAN, go to ( $\square$ 27).

#### Wireless LAN

1) The setting on the access point. \*1 Enter the following information.

Mode: INFRASTRUCTURE

- 2) Click the [Next].
- 3) Enter the following information that is set in the projector. \*3

IP address: 192.168.1.10 (example) Subnet mask: 255.255.255.0 (example)

- 4) Click the [Connect].
- 5) The wireless connection will be established.

  Proceed to item 1.8 Confirming the connection to your destination. (430)
- \*1 Contact the network administrator to find out the setting on the access point.
- \*2 If you use an encryption, you need to set it. Contact the network administrator to check the encryption key that is set in the projector.

  The encryption key is always shown as "\*\*\*\*\*\*\*\*\*."
- \*3 To find the network setting on the projector, refer to the NOTE. (Q22)

#### Wired LAN

1) Enter the following information for the projector. \*1

IP address: 192.168.1.10 (example) Subnet mask: 255.255.255.0 (example)

- 2) Click the [Connect].
- 3) The network connection will be established.

  Proceed to item 1.8 Confirming the connection to your destination. (430)
- \*1 To find the network setting on the projector, refer to the NOTE. (422)

# [Troubleshooting]

■ A network connection could not be established.

Windows prevented network configuration changes.

You may log in the Windows under User authority.

Click the **[OK]**, then the "LiveViewer" main menu is displayed even though the network is not established. Click on the main menu and go back to item **1.5 Selecting the network connection method**. (114)

Consult to the network administrator. Log in the Windows under Administrator authority. After that, please resume at item **1.3.2 Starting the "LiveViewer"**. (199)

If you need to add a Network configuration on your computer to connect to the projector.

This dialog will be displayed when you need to add a Network configuration on your computer to connect to the projector. Confirm with your network administrator if the Network configuration displayed on the dialog is OK, and then click the **[Yes]**.

Click the **[NO]**, then the "LiveViewer" main menu is displayed even though the network is not established. Click  $\blacksquare$  on the main menu and go back to item **1.5** Selecting the network connection method. ( $\square$ 14)

If you put a check mark in the box "Not displaying confirmation dialog for adding Network settings", the projector memorizes current configuration and this dialog is not displayed again. To display this dialog again, click Option \(\mathbb{\infty}\) icon in the "LiveViewer" main menu and remove the check mark in the box "Not displaying confirmation dialog for adding Network settings".

If you want to change the Network configuration to add, click the **[Change]**. A dialog for changing the Network configuration as shown to the right will be displayed. Enter IP address and subnet mask, then click the **[OK]**. Procedure to connect to the projector will start.

Proceed to item 1.8 Confirming the connection to your destination. (\$\square\$30\$) If you click the [Cancel], you will return to the dialog for adding a Network configuration.

If the entered IP address and projector's IP address are the same, a warning dialog shown to the right will be displayed.

Click the **[OK]**, and then enter a different IP address from the projector's one in the dialog for changing Network configuration.

If the connection is not available with the entered Network configuration, a warning dialog shown to the right will be displayed. Click the **[OK]** to return to the dialog for changing the Network configuration, and then enter appropriate configuration.

**NOTE** • If a Network configuration to connect to the projector has been added on the computer, the added Network configuration will be erased once the application software is closed.

■ Are you sure you want to connect the selected projector?

The message is appeared when the wireless adapter you selected is already used for another network connection.

- To connect, click the [Yes]. Proceed to item
   1.8 Confirming the connection to your destination. (□30)
- Not to connect, click the [No] then the "LiveViewer" main menu is displayed even though the network is not established. Click and on the main menu to go back to item 1.5 Selecting the network connection method. (414)

# 1.8 Confirming the connection to your destination

#### 1.8.1 Connection and transmission

When the network connection is established, the "Connection to Projector successful" screen is displayed.

Make sure that the right projector that you want to send your image to is selected, by checking the projector name and IP address shown in the screen.

- To send images to the projector, click the [Yes]. The transmission will be started.
   To display the transmitted images, select the LAN port as input source on the projector.
- Not to send, click the **[No]**, then the "LiveViewer" main menu is displayed in stand-by mode. (Stand-by mode is the state where there is no image transmission, although the network connection is established.)

  The transmission can be started, if you click or button on the "LiveViewer" main menu.

If you wish to use the current connection setting as a profile data for My Connection, check in the box for the [Register this setting to My Connection].

# [Troubleshooting]

■ This projector is currently in use (Presenting) by another user.

The projector you want to send your images to is occupied by another computer in the Presenter mode.

Click the **[OK]**, then the "LiveViewer" main menu is displayed in stand-by mode. Retry to send your images, after the Presenter mode is off.

# 1.8 Confirming the connection to your destination (continued)

■ A Slideshow is currently running on the projector that you are trying to display to.

The projector you want to send your images to is in the Slideshow mode in the PC-LESS Presentation

- Click the [Yes], then the projector will stop the Slideshow and switch the input source to the LAN port.
- Click the [No], then the projector is remained in the Slideshow mode, and the "LiveViewer" main menu is displayed in stand-by mode on your computer.

■ Are you sure you want to change the input channel of the Projector to LAN?

The projector is not set to the LAN as an input signal.

- Click the [Yes], then the projector is switched to the LAN.
- Click the [No], then the projector is remained as it is, and the "LiveViewer" main menu is displayed in stand-by mode on your computer.

# 1.8 Confirming the connection to your destination (continued)

#### 1.8.2 Connection error

When the connection to the projector could not be established, an error message, "Network Connection not established", will come up.

Click the **[OK]** then the "LiveViewer" main menu is displayed even though the network is not established. Click and on the main menu to go back to item **1.5 Selecting the network connection method**. (414)

**NOTE** • If My Connection is selected and the connection could not be established, the "LiveViewer" main menu will not be displayed. Check the network setting in the projector, and retry the connection from item **1.3.2** Staring the "LiveViewer". ( 9)

### 1.9 Profile data

#### 1.9.1 Outline of Profile data

The network setting to connect the projector and computer can be stored as a profile data. Once the data is stored, all you need to do is to select the data to connect to the network. It is recommended when the same network connection is often used.

#### 1.9.2 Making Profile data

The profile data is made on the Manual Configuration screen. (423) Up to 10 profile data can be stored for each network adapter.

- 1) Select the [Profile] and click the [New].
- 2) The "Create new profile" will come up. If you have already made 10 profile data, you cannot make a new one, until you delete a stored data.

Input all information required for your network connection.

If you want to clear the information you input, click the [Clear].

- 3) Click the **[OK]**, after all information is set. If you don't want to store it, click the **[Cancel]**.
- 4) The new profile data is shown in the profile list, if you click the **[OK]**.
  - **NOTE** When you make a new profile data, it is strongly recommended to check that the new dada can work properly by selecting the data at the Profile connection. ( 23)
- If you change a network adapter on your computer, make a new profile data for the adapter.

#### 1.9 Profile data (continued)

#### 1.9.3 Editing Profile data

If necessary, the profile data can be edited on the Manual Configuration screen. (\$\subset\$23)

- Select the [Profile], and select one of the data listed in the window.
- 2) Click the [Edit].
- 3) The "Edit profile" screen will come up.
- Edit the information required to be revised.
   If you want to clear all information in the window, click the [Clear].
- 5) Click the **[OK]**, after the editing is completed. If you don't want to store it, click the **[Cancel]**.
- 6) The edited profile data is stored and shown in the profile list with the new date created information, if you click the **[OK]**.

**NOTE** • When you edit a profile data, it is strongly recommended to check that the edited data can work properly by selecting the data at the Profile connection. (☐23)

### 1.9 Profile data (continued)

#### 1.9.4 Registering My Connection

One of the profile data, which is often used, can be registered as the My Connection profile data. Once the data is registered, all you need to do is to select the My Connection to connect to the network. ( 12)

- 1) Click the [My Connection].
- 2) The "Add My Connection" screen will come up.

The currently selected profile data for the My Connection is shown with a check mark in the list

- Select one of the profile data listed in the window and put a mark in the check box. The data selected before is turned unmarked.
- 4) Click the **[OK]**, then the window is closed. If you don't want to select a new one, click the **[Cancel]**.

**NOTE** • If you don't want to use the My Connection, mark no data listed in the window, and click the **[OK]**.

• In the list, all profile data are shown no matter which network adapter is selected. You can register a profile data that is not for currently selected network adapter as the My Connection profile data.

#### 1.9 Profile data (continued)

Also, you can register a profile data to My Connection, when the network connection is established. When it is established, the "Connection to Projector successful" screen is displayed. (430)

If you wish to use the current connection setting for My Connection, check in the box for the [Register this setting to My Connection]. And then, if it is okay to overwrite the present data for My Connection, click the [OK]. A new profile data will be created and it is registered as My Connection profile data.

**NOTE** • If there are already 10 profile data, the check box cannot be checked. Please erase one of the existing profile data.

• The profile name for the stored data is assigned by the "LiveViewer" automatically. The name will be shown at the right side of the check box.

### 2. Network Presentation

### 2.1 Using the "LiveViewer"

When you get the connection between your projector and computer, the "LiveViewer" main menu will be shown on the computer screen.

On the main menu you can configure settings and operate functions to send your images to the projector.

#### 2.1.1 Main menu and Operating buttons

### 1) Menu Type

There are 2 type of the main menu, Easy type and Advanced type, which can be switched on screen.

- When the "LiveViewer" is started, the last used type will be on screen.
- When the network connection is not established, the Advanced type will be on screen.

### 2) Operating buttons

### ① Starting Capture button

The transmission to the projector is started and the images will be displayed. The Display mode will be the Single PC mode at first. After that, the last Display mode will be applied.

### **② Stop button**

The image transmission is stopped.

**NOTE** • The images may not be displayed on screen, if the Start/Stop buttons are clicked repeatedly.

• The primary image is displayed in multi-display environment.

#### **3 Hold button**

The image on screen is temporally frozen.

The last image before the button is clicked is remained on screen.

You can revise the image data on your computer without showing it on the projector's screen.

### **④ Display mode button (□40**)

The button switches the Single PC mode and Multi PC mode.

#### **5** Connect button

The screen to select the connection mode is displayed. Go to item **1.5**. (**114**)

**6** Option button

The option screen is displayed.

### ② Web control button

Starts the Web browser on your computer and displays Web control screen to control the projector and change various settings for the projector. (45)

#### **® Information button**

The version of the "LiveViewer" is displayed.

#### 9, 10 Close button

The network is disconnected and the "LiveViewer" is closed.

#### **11) Minimize button**

The main menu is closed, and the "LiveViewer" icon is displayed on the task tray in your computer. The displayed icon changes as shown below depending on the status of the "LiveViewer". If the icon is double-clicked, the last type of the main menu will be shown on screen.

## 2.1.2 Displaying the status

### 1) Indicator

The indicator shows the following status.

| Indicator | Status        | Note                                                                                                  |
|-----------|---------------|-------------------------------------------------------------------------------------------------------|
|           | Not connected | The network connection to the projector is not established yet.                                       |
|           | Hold          | The network connection is established, but the image transmissions on hold.                           |
|           | Connected     | The network connection is established and the images on the computer are being sent to the projector. |
|           | Disconnected  | The network connection to the projector is disconnected.                                              |

### 2) Status Display in Multi PC mode

The icon is displayed at the right end of the Display mode buttons. One of the following icons to inform which quarter screens are used will be shown.

| Status                         | Status icon |
|--------------------------------|-------------|
| No computer is on screen       |             |
| One computer is on screen.     | 東東東         |
| Two computers are on screen.   | 東東東東東       |
| Three computers are on screen. | 東東東         |
| Four computers are on screen.  | 東           |

**NOTE** • The status display is refreshed in every 3 seconds.

• If the status cannot be gotten from the projector, it will not be displayed.

## 2.1.3 Switching the display mode

The "LiveViewer" has the Single PC mode and Multi PC mode. The modes can be switched on the main menu.

1) Click the 🗔 button on the main menu. The buttons below are displayed.

6:Status Display

- 2) Select from ① to ⑤ buttons, and click it.
  - ① Switching to the Single PC mode : Your image is displayed on full screen.
  - ②-⑤ Switching to the Multi PC mode : Your image is displayed on a quarter screen identified in the button.
- 3) The projector screen is switched to the mode selected above, and the transmission of your computer image will be started to display your image on the screen.
- 4) The icon on the main menu is replaced by the icon you selected.
  - **NOTE** The image transmission will be stopped, when you click the Single mode button while the projector is in the Single PC mode or you click one of the Multi mode buttons that shows the quarter screen which is currently displaying your computer images in the Multi PC mode.
  - If the Multi PC mode is selected, the projector screen is automatically divided to 4 zones.
  - If the Presenter mode is set on in the computer whose image is currently on screen in the Single PC mode, the 🖵 button cannot be clicked on other computers.
  - If you select the button of the quarter screen displaying images from another computer, the image transmission from that computer will be stopped.

The display mode can be set also by using the MULTI PC MODE in the PRESENTATION item in the NETWORK menu. The last setting made will take effect regardless of the setting method.

(Refer to **METWORK** menu in the User's Manual – Operating Guide for the function on the projector.)

#### 2.1.4 Option menu

Clicking the Option button displays the option menu on screen.

① "Not displaying confirmation dialog for adding Network settings" This setting allows you to choose to display or not the confirmation dialog for adding a Network configuration (219, 28) when you connect your computer to the projector. It is turned off by default.

### **② Optimize Performance**

The "LiveViewer" captures computer screen in JPEG data and sends the JPEG data to the projector. The "LiveViewer" has two options that have different compression rate of JPEG data.

### Transmission speed

Speed takes priority over Image quality.

It makes JPEG compression rate higher.

The screen on the projector is rewritten quicker because the transferred data is smaller, but the image quality is worse.

### Image quality

Image quality takes priority over Speed.

It makes JPEG compression rate lower.

The screen on the projector is rewritten slower because the transferred data is larger, but the image quality is better.

#### **3 Presenter Mode**

In the Single PC mode, the projector can be occupied by one computer and can block an access from any other computer, if the Presenter mode is selected in the "LiveViewer".

While making your presentation, you don't need to worry that the image on screen is unexpectedly switched to an image sent by another computer. If you want to turn it on, put a check mark in the check box.

**NOTE** • If the Multi PC mode is selected, the setting for the Presenter mode is invalid.

- When switching from the Multi PC mode to the Single PC mode, the Presenter mode setting of the computer is valid.
- The Presenter Mode is set valid in factory default setting.
- In addition to using the software menu on the computer on which Presenter Mode is turned on, you can cancel this function by using the projector's OSD menu QUIT PRESENTER MODE EXECUTE of the PRESENTATION item in the NETWORK menu.

### **4** Display User Name

A "User Name" that is up to 20 letters can be input by using alphanumeric characters.

The user name can be displayed on the projector screen, so you can find out whose image is currently on the screen.

(Refer to **METWORK** menu in the User's Manual – Operating Guide) If the check box is not marked, the information is not sent to the projector.

## 2.2 Starting the Network Presentation

This chapter explains the Network Presentation feature with which you can project computer images transmitted through a network.

The "LiveViewer" allows you to project images from one or multiple computers by connecting the projector to an existing network without using computer cables.

This Network Presentation feature helps you to smoothly make your presentations and conduct conferences.

To start the Network Presentation, select the **LAN** port as the input source on the projector and click the Starting Capture button on the "LiveViewer".

### 2.2.1 Display mode

Two display modes, Single PC mode and Multi PC mode, are available for the Network Presentation.

Single PC mode
 The projector displays images sent by one computer.

#### 2.2 Starting the Network Presentation (continued)

#### 2) Multi PC mode

The projector screen is divided to 4 zones. The projector displays images in one zone sent by a computer, so that the projector can display images sent by up to 4 computers at the same time.

#### 2.2.2 Presenter mode

In the Single PC mode, the projector can be occupied by one computer and can block an access from any other computer, if the Presenter mode is selected in the "LiveViewer".

While making your presentation, you don't need to worry that the image on screen is unexpectedly switched to an image sent by another computer.

The Presenter mode can be set on the Option menu in the "LiveViewer" main menu. ( 41)

### 2.2.3 Display User Name

A "User Name" can be input in the "LiveViewer", which is displayed on screen by operating the menu on the projector. So, it can be found out whose image is currently displayed on screen. (41)

### 3. Web Control

You can adjust or control the projector via a network from a web browser on a computer that is connected to the same network.

**NOTE** • Internet Explorer 6.0 or later is required.

- If JavaScript is disabled in your web browser configuration, you must enable JavaScript in order to use the projector web pages properly. See the Help files for your web browser for details on how to enable JavaScript.
- It is recommended that all web browser updates are installed.

## 3.1 Logon

To use the Web Control function, you need to logon with your user name and password. (447)

Refer to the following for configuring or controlling the projector via a web browser.

**Example**: If the IP address of the projector is set to **192.168.1.10**:

- Display the logon window as shown on the right.
   There are two options to display this window.
  - ① Using the "LiveViewer"

    Connect your computer and the projector via Network using the "LiveViewer". ( 9)

    Then click the Web Control button on the "LiveViewer" main menu ( 137) to start the Web browser software.
  - ② Using Web browser software Make sure that your computer and the projector is connected via network, and then start Web browser.

Enter the projector's IP address into URL

input box of the Web browser as the example below, and then press the Enter key or → button.

Example: If the IP address of the projector is set to 192.168.1.10:

Enter "http://192.168.1.10/" into the address bar of the web browser and press the Enter key or click → button.

2) Enter your user name and password, and then click the **[OK]**.

**NOTE** • The language used on the Web Control screen is the same as that of the OSD on the projector. If you want to change it, you need to change the OSD language on the projector. ( SCREEN menu in the User's Manual – Operating Guide)

## 3.1 Logon (Continued)

Below are the factory default settings for user name and password.

| User name     | Password        |
|---------------|-----------------|
| Administrator | <blank></blank> |

If you logon successfully, the screen below will be displayed.

3) Click the desired operation or configuration item on the main menu.

## 3.2 Network Information

Displays the projector's current network configuration settings.

| Item               | Description                               |
|--------------------|-------------------------------------------|
| Projector Name     | Displays the projector name settings.     |
| DHCP               | Displays the DHCP configuration settings. |
| IP Address         | Displays the current IP address.          |
| Subnet Mask        | Displays the subnet mask.                 |
| Default Gateway    | Displays the default gateway.             |
| DNS Server Address | Displays the DNS server address.          |
| MAC Address        | Displays the ethernet MAC address.        |

## 3.3 Network Settings

Displays and configures network settings.

| Item                               |                 | Description                                                                                                                                                                                                                                                                   |
|------------------------------------|-----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| ΙP                                 | Configuration   | Configures network settings.                                                                                                                                                                                                                                                  |
|                                    | DHCP ON         | Enables DHCP.                                                                                                                                                                                                                                                                 |
|                                    | DHCP OFF        | Disables DHCP.                                                                                                                                                                                                                                                                |
|                                    | IP Address      | Configures the IP address when DHCP is disabled.                                                                                                                                                                                                                              |
|                                    | Subnet Mask     | Configures the subnet mask when DHCP is disabled.                                                                                                                                                                                                                             |
|                                    | Default Gateway | Configures the default gateway when DHCP is disabled.                                                                                                                                                                                                                         |
| Projector Name                     |                 | Configures the name of the projector.  The length of the Projector Name can be up to 64 alphanumeric characters. Only alphabets, numbers and following symbols can be used. !"#\$%&'()*+,/:;<=>?@[\]^_`{ }~ and space.  Particular projector name is pre-assigned by default. |
| sysLocation (SNMP)                 |                 | Configures the location to be referred to when using SNMP. The length of the sysLocation can be up to 255 alphanumeric characters. Only numbers '0-9' and alphabet 'a-z', 'A-Z' can be used.                                                                                  |
| sysContact (SNMP)                  |                 | Configures the contact information to be referred to when using SNMP. The length of the sysContact can be up to 255 alphanumeric characters. Only numbers '0-9' and alphabet 'a-z', 'A-Z' can be used.                                                                        |
| DNS Server Address                 |                 | Configures the DNS server address.                                                                                                                                                                                                                                            |
| AMX D.D.<br>(AMX Device Discovery) |                 | Configures the AMX Device Discovery setting to detect the projector from the controllers of AMX connected to the same network. For the details of AMX Device Discovery, visit the AMX web site. <u>URL: http://www.amx.com</u>                                                |

Click the [Apply] button to save the settings.

**NOTE** • The new configuration settings are activated after restarting the network connection. When the configuration settings are changed, you must restart the network connection. You can restart the network connection by clicking the **[Network Restart]** on the main menu.

• If you connect the projector to an existing network, consult a network administrator before setting server addresses.

# **3.4 Port Settings**

Displays and configures communication port settings.

| Item                               |                                     | Description                                                                        |
|------------------------------------|-------------------------------------|------------------------------------------------------------------------------------|
| Network Control Port1<br>(Port:23) |                                     | Configures command control port 1 (Port:23).                                       |
|                                    | Port open                           | Click the [Enable] check box to use port 23.                                       |
|                                    | Authentication                      | Click the <b>[Enable]</b> check box when authentication is required for this port. |
| 1                                  | twork Control Port2<br>ort:9715)    | Configures command control port 2 (Port:9715).                                     |
|                                    | Port open                           | Click the [Enable] check box to use port 9715.                                     |
|                                    | Authentication                      | Click the <b>[Enable]</b> check box when authentication is required for this port. |
| 1                                  | Link <sup>™</sup> Port<br>ort:4352) | Configures the PJLink <sup>™</sup> port (Port:4352).                               |
|                                    | Port open                           | Click the [Enable] check box to use port 4352.                                     |
|                                    | Authentication                      | Click the <b>[Enable]</b> check box when authentication is required for this port. |
|                                    | Image Port<br>ort:9716)             | Configures the My Image Port (Port:9716).                                          |
|                                    | Port open                           | Click the [Enable] check box to use port 9716.                                     |
|                                    | Authentication                      | Click the <b>[Enable]</b> check box when authentication is required for this port. |
|                                    | essenger Port<br>ort:9719)          | Configures the Messenger Port (Port:9719).                                         |
|                                    | Port open                           | Click the [Enable] check box to use port 9719.                                     |
|                                    | Authentication                      | Click the <b>[Enable]</b> check box when authentication is required for this port. |

### 3.4 Port Settings (Continued)

|                     | Item              | Description                                                                                                                                                                                                                                                   |
|---------------------|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| SNMP Port           |                   | Configures the SNMP port.                                                                                                                                                                                                                                     |
|                     | Port open         | Click the [Enable] check box to use SNMP.                                                                                                                                                                                                                     |
|                     | Trap address      | Configures the destination of the SNMP Trap in IP format.  • The address allows not only IP address but also domain name if the valid DNS server is setup in the <b>Network Settings</b> . The maximum length of host or domain name is up to 255 characters. |
|                     | Download MIB file | Downloads a MIB file from the projector.                                                                                                                                                                                                                      |
| Network Bridge Port |                   | Configures the Bridge port number.                                                                                                                                                                                                                            |
|                     | Port Number       | Input the port number. Except for 9715, 9716, 9719, 9720, 5900, 5500, 4352 between 1024 and 65535 can be set up. It is set to 9717 as the default setting.                                                                                                    |

Click the [Apply] button to save the settings.

**NOTE** • The new configuration settings are activated after restarting the network connection. When the configuration settings are changed, you must restart the network connection. You can restart the network connection by clicking the **[Network Restart]** on the main menu.

## 3.5 Mail Settings

Displays and configures e-mail addressing settings.

| Item                     | Description                                                                                                                                                                                                                                                 |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Send Mail                | Click the <b>[Enable]</b> check box to use the e-mail function. Configure the conditions for sending e-mail under the <b>Alert Settings</b> .                                                                                                               |
| SMTP Server Address      | Configures the address of the mail server in IP format.  • The address allows not only IP address but also domain name if the valid DNS server is setup in the <b>Network Settings</b> . The maximum length of host or domain name is up to 255 characters. |
| Sender E-mail address    | Configures the sender e-mail address.  The length of the sender e-mail address can be up to 255 alphanumeric characters.                                                                                                                                    |
| Recipient E-mail address | Configures the e-mail address of up to five recipients. You can also specify the <b>[TO]</b> or <b>[CC]</b> for each address. The length of the recipient e-mail address can be up to 255 alphanumeric characters.                                          |

Click the [Apply] button to save the settings.

**NOTE** • You can confirm whether the mail settings work correctly using the **[Send Test Mail]** button. Please enable Send mail setting before clicking the **[Send Test Mail]**.

• If you connect the projector to an existing network, consult a network administrator before setting server addresses.

## 3.6 Alert Settings

Displays and configures failure & alert settings.

| Item                      | Description                                                                                                                                                                                                                                                                                                                                                                |
|---------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Cover Error               | The lamp cover has not been properly fixed.                                                                                                                                                                                                                                                                                                                                |
| Fan Error                 | The cooling fan is not operating.                                                                                                                                                                                                                                                                                                                                          |
| Lamp Error                | The lamp does not light, and there is a possibility that interior portion has become heated.                                                                                                                                                                                                                                                                               |
| Temp Error                | There is a possibility that the interior portion has become heated.                                                                                                                                                                                                                                                                                                        |
| Air Flow Error            | The internal temperature is rising.                                                                                                                                                                                                                                                                                                                                        |
| Cold Error                | There is a possibility that the interior portion has become overcooled.                                                                                                                                                                                                                                                                                                    |
| Filter Error              | Filter time over.                                                                                                                                                                                                                                                                                                                                                          |
| Other Error               | Other error.  If displaying this error, please contact your dealer.                                                                                                                                                                                                                                                                                                        |
| Schedule Execution Error  | Schedule Execution error. (455)                                                                                                                                                                                                                                                                                                                                            |
| Lamp Time Alarm           | Lamp time over Alarm Time setting.                                                                                                                                                                                                                                                                                                                                         |
| Filter Time Alarm         | Filter time over Alarm Time setting.                                                                                                                                                                                                                                                                                                                                       |
| Transition Detector Alarm | Transition Detector Alarm. (QOPTION menu in the User's Manual – Operating Guide)                                                                                                                                                                                                                                                                                           |
| Cold Start                | When the projector is supplied with the power, it works as below.  • If the STANDBY MODE is set to the NORMAL:the projector's power status changes from "OFF" to "Standby state".  • If the STANDBY MODE is set to the SAVING:the projector's power status changes from "Standby state" to "ON (lamp is turned on)".  ( SETUP menu in the User's Manual – Operating Guide) |
| Authentication Failure    | The SNMP access is detected from the invalid SNMP community.                                                                                                                                                                                                                                                                                                               |

Refer to "Troubleshooting" in the User's Manual – Operating Guide for further detailed explanation of Error except Other Error and Schedule Execution Error.

### 3.6 Alert Settings (Continued)

The Alert Items are shown below.

| Item         | Description                                                                                                                                                                                                                                                                                 |
|--------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Alarm Time   | Configures the time to alert. (Only Lamp Time Alarm and Filter Time Alarm.)                                                                                                                                                                                                                 |
| SNMP Trap    | Click the [Enable] check box to enable SNMP Trap alerts.                                                                                                                                                                                                                                    |
| Send Mail    | Click the [Enable] check box to enable e-mail alerts. (Except Cold Start and Authentication Failure.)                                                                                                                                                                                       |
| Mail Subject | Configures the subject line of the e-mail to be sent. The length of the subject line can be up to 100 alphanumeric characters. (Except Cold Start and Authentication Failure.)                                                                                                              |
| Mail Text    | Configures the text of the e-mail to be sent.  The length of the text can be up to 1024 alphanumeric characters, but if you are using some of special characters below the length may be shorter.  Special characters "': & , % \ and space (Except Cold Start and Authentication Failure.) |

Click the [Apply] button to save the settings.

**NOTE** • The trigger of **Filter Error** e-mail is depending on the FILTER MESSAGE setting in the SERVICE item of the OPTION menu which defines the period until the filter message is displayed on the projector screen. An e-mail will be sent when the usage time of the filter exceeds the time limit that is set. No notification e-mail will be sent if the FILTER MESSAGE is set to TURN OFF. (**QOPTION menu in the User's Manual – Operating Guide**)

- Lamp Time Alarm is defined as a threshold for e-mail notification (reminder) of the lamp timer. When the lamp hour exceeds this threshold that is configured through the Web page, the e-mail will be sent out.
- Filter Time Alarm is defined as a threshold for e-mail notification (reminder) of the filter time. When the filter hour exceeds this threshold that is configured in the Web page, the e-mail will be sent out.

# **3.7 Schedule Settings**

Displays and configures schedule settings.

| Item               | Description                                   |
|--------------------|-----------------------------------------------|
| Daily              | Configures the daily schedule.                |
| Sunday             | Configures the Sunday schedule.               |
| Monday             | Configures the Monday schedule.               |
| Tuesday            | Configures the Tuesday schedule.              |
| Wednesday          | Configures the Wednesday schedule.            |
| Thursday           | Configures the Thursday schedule.             |
| Friday             | Configures the Friday schedule.               |
| Saturday           | Configures the Saturday schedule.             |
| Specific date No.1 | Configures the specific date (No.1) schedule. |
| Specific date No.2 | Configures the specific date (No.2) schedule. |
| Specific date No.3 | Configures the specific date (No.3) schedule. |
| Specific date No.4 | Configures the specific date (No.4) schedule. |
| Specific date No.5 | Configures the specific date (No.5) schedule. |

### 3.7 Schedule Settings (Continued)

The schedule settings are shown below.

| Item             | Description                                                                                     |
|------------------|-------------------------------------------------------------------------------------------------|
| Schedule         | Click the [Enable] check box to enable the schedule.                                            |
| Date (Month/Day) | Configures the month and date. This item appears only when Specific date (No. 1-5) is selected. |

Click the [Apply] button to save the settings.

The current event settings are displayed on the schedule list. To add additional functions and events, set the following items.

| Item                   |              | Description                                                           |
|------------------------|--------------|-----------------------------------------------------------------------|
| Time                   |              | Configures the time to execute commands.                              |
| Command<br>[Parameter] |              | Configures the commands to be executed.                               |
|                        | Power        | Configures the parameters for power control.                          |
|                        | Input Source | Configures the parameters for input switching.                        |
|                        | My Image     | Configures the parameters for My Image data display. (\$\square\$170) |
|                        | Messenger    | Configures the parameters for Messenger data display. (4172)          |
|                        | Slideshow    | Configures the Start/Stop parameters for the Slideshow.               |

Click the [Register] button to add new commands to the schedule list.

Click the [Delete] button to delete commands from the schedule list.

Click the [Reset] button to delete all commands and reset the schedule settings from the schedule list.

### 3.7 Schedule Settings (Continued)

**NOTE** • After the projector is moved, check the date and time set for the projector before configuring the schedules. Strong shock may make the date and time settings (\$\omega\$58\$) get out of tune.

- Events "My Image" and "Messenger" will not be executed appropriately but result in "schedule execution error" status in case lamp does not light or/and display data are not stored in the projector at the scheduled event execution time.
- Events "Input Source" and "My Image" will not be executed if security feature is enabled and the projector is locked due to the feature.
- Certain error state in the projector (such as temperature error, lamp error) will prevent the projector from appropriate execution of scheduled functions/events.
- If no USB memory device is inserted to the projector or no image data for display exists at the scheduled event time, a schedule execution error occurs against the scheduled Slideshow event.
- When you start the Slideshow, input source will be automatically switched to the **USB TYPE A** port.
- Image files stored in the root directory of the USB memory device will be displayed for the scheduled Slideshow.
- Please refer to ""Troubleshooting" in the User's Manual Operating Guide in case scheduled functions/events are not executed appropriately as you've set.

# 3.8 Date/Time Settings

Displays and configures the date and time settings.

| Item                  |         |         | Description                                                                                      |
|-----------------------|---------|---------|--------------------------------------------------------------------------------------------------|
| Current Date          |         |         | Configures the current date in year/month/day format.                                            |
| Curre                 | nt Time |         | Configures the current time in hour:minute:second format.                                        |
| Daylight Savings Time |         | ıs Time | Click the <b>[ON]</b> check box to enable daylight savings time and set the following items.     |
| St                    | art     |         | Configures the date and time daylight savings time begins.                                       |
|                       | Month   |         | Configures the month daylight savings time begins (1~12).                                        |
|                       |         |         | Configures the week of the month daylight savings time begins (First, 2, 3, 4, Last).            |
|                       | Day     |         | Configures the day of the week daylight savings time begins (Sun, Mon, Tue, Wed, Thu, Fri, Sat). |
|                       | Time    | hour    | Configures the hour daylight savings time begins (0 ~ 23).                                       |
|                       | Time    | minute  | Configures the minute daylight savings time begins (0 ~ 59).                                     |
| Er                    | nd      |         | Configures the date and time daylight savings time ends.                                         |
|                       | Month   |         | Configures the month daylight savings time ends (1 ~ 12).                                        |
|                       | Week    |         | Configures the week of the month daylight savings time ends (First, 2, 3, 4, Last).              |
|                       | Day     |         | Configures the day of the week daylight savings time ends (Sun, Mon, Tue, Wed, Thu, Fri, Sat).   |
|                       | Time    | hour    | Configures the hour daylight savings time ends (0 ~ 23).                                         |
|                       | Time    | minute  | Configures the minute daylight savings time ends (0 ~ 59).                                       |

### 3.8 Date/Time Settings (Continued)

| Item            |                     | Description                                                                                                                                                                                                                                          |
|-----------------|---------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Time difference |                     | Configures the time difference. Set the same time difference as the one set on your computer. If unsure, consult your IT manager.                                                                                                                    |
| SN              | ITP                 | Click the <b>[ON]</b> check box to retrieve Date and Time information from the SNTP server and set the following items.                                                                                                                              |
|                 | SNTP Server Address | Configures the SNTP server address in IP format.  • The address allows not only IP address but also domain name if the valid DNS server is setup in the <b>Network Settings</b> . The maximum length of host or domain name is up to 255 characters. |
|                 | Cycle               | Configures the interval at which to retrieve Date and Time information from the SNTP server (hour:minute).                                                                                                                                           |

Click the [Apply] button to save the settings.

**NOTE** • The new configuration settings are activated after restarting the network connection. When the configuration settings are changed, you must restart the network connection. You can restart the network connection by clicking the **[Network Restart]** on the main menu.

- If you connect the projector to an existing network, consult a network administrator before setting server addresses.
- To enable the SNTP function, the time difference must be set.
- The projector will retrieve Date and Time information from the time server and override time settings when SNTP is enabled.
- The internal clock's time may not remain accurate. Using SNTP is recommended to maintain accurate time.

## 3.9 Security Settings

Displays and configures passwords and other security settings.

|    | Item                                   | Description                                                                                             |
|----|----------------------------------------|---------------------------------------------------------------------------------------------------------|
| Us | er Account                             | Configures the user name and password.                                                                  |
|    | User name                              | Configures the user name. The length of the text can be up to 32 alphanumeric characters.               |
|    | Password                               | Configures the password. The length of the text can be up to 255 alphanumeric characters.               |
|    | Re-enter Password                      | Reenter the above password for verification.                                                            |
| Ne | twork Control                          | Configures the Authentication password for the command control.                                         |
|    | Authentication Password                | Configures the Authentication password. The length of the text can be up to 32 alphanumeric characters. |
|    | Re-enter<br>Authentication<br>Password | Reenter the above password for verification.                                                            |
| SN | IMP                                    | Configures the community name if SNMP is used.                                                          |
|    | Community name                         | Configures the community name. The length of the text can be up to 64 alphanumeric characters.          |

Click the [Apply] button to save the settings.

**NOTE** • The new configuration settings are activated after restarting the network connection. When the configuration settings are changed, you must restart the network connection. You can restart the network connection by clicking the **[Network Restart]** on the main menu.

• Only numbers '0-9' and alphabet 'a-z', 'A-Z' can be used.

# 3.10 Projector Control

The items shown in the table below can be performed using the Projector Control menu. Select an item with the mouse.

Most of the items have a submenu. Refer to the table below for details.

**NOTE** • The setting value may not match with the actual value if the user changes the value manually. In that case, please refresh the page by clicking the [Refresh] button.

### Controls the projector.

| Item |                    | Description                                                                                                                                 |
|------|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------|
| MA   | AIN                |                                                                                                                                             |
|      | POWER              | Turns the power on/off.                                                                                                                     |
|      | INPUT SOURCE       | Selects the input source.                                                                                                                   |
|      | PICTURE MODE       | Selects the picture mode setting.                                                                                                           |
|      | BLANK ON/OFF       | Turns Blank on/off.                                                                                                                         |
|      | MUTE               | Turns Mute on/off.                                                                                                                          |
|      | FREEZE             | Turns Freeze on/off.                                                                                                                        |
|      | MAGNIFY            | Controls the magnify setting. In some input signal sources, it might stop "Magnify" even though it does not reach to maximum setting value. |
|      | MAGNIFY POSITION V | Adjusts the vertical magnify position.                                                                                                      |
|      | MAGNIFY POSITION H | Adjusts the horizontal magnify position.                                                                                                    |
|      | TEMPLATE           | Turns template on/off.                                                                                                                      |
|      | MY IMAGE           | Selects MY IMAGE data.                                                                                                                      |
|      | MY IMAGE DELETE    | Deletes MY IMAGE data.                                                                                                                      |

| Item       |                             | Description                                        |
|------------|-----------------------------|----------------------------------------------------|
| PICT       | TURE                        |                                                    |
| В          | BRIGHTNESS                  | Adjusts the brightness setting.                    |
| С          | CONTRAST                    | Adjusts the contrast setting.                      |
| G          | AMMA                        | Selects the gamma setting.                         |
| С          | COLOR TEMP                  | Selects the color temperature setting.             |
| С          | COLOR                       | Adjusts the color setting.                         |
| T          | INT                         | Adjusts the tint setting.                          |
| S          | SHARPNESS                   | Adjusts the sharpness setting.                     |
| Α          | ACTIVE IRIS                 | Selects the active iris setting.                   |
| M          | MYMEMORY SAVE               | Saves the MyMemory data.                           |
| M          | MYMEMORY RECALL             | Recalls the MyMemory data.                         |
| IMAG       | GE                          | ,                                                  |
| Α          | ASPECT                      | Selects the aspect setting.                        |
| 0          | OVER SCAN                   | Adjusts the over scan setting.                     |
| V          | POSITION                    | Adjusts the vertical position.                     |
| Н          | POSITION                    | Adjusts the horizontal position.                   |
| Н          | I PHASE                     | Adjusts the horizontal phase.                      |
| Н          | I SIZE                      | Adjusts the horizontal size.                       |
|            | AUTO ADJUST<br>EXECUTE      | Performs the automatic adjustment.                 |
| INPU       | JT                          |                                                    |
| Р          | PROGRESSIVE                 | Selects the progressive setting.                   |
| V          | IDEO NR                     | Selects the video noise reduction setting.         |
|            | COLOR SPACE                 | Selects the color space.                           |
| С          | COMPONENT                   | Selects the <b>COMPONENT</b> port setting.         |
| S          | S-VIDEO FORMAT              | Selects the s-video format setting.                |
| С          | C-VIDEO FORMAT              | Selects the video format setting.                  |
| H          | IDMI FORMAT                 | Selects the HDMI format setting.                   |
| <u>  H</u> | IDMI RANGE                  | Selects the HDMI range setting.                    |
| 1 —        | COMPUTER IN1                | Selects the <b>COMPUTER IN1</b> input signal type. |
| I —        | COMPUTER IN2                | Selects the <b>COMPUTER IN2</b> input signal type. |
| 1 1        | RAME LOCK -<br>COMPUTER IN1 | Turns the FRAME LOCK-COMPUTER IN1 function on/off. |
| 1 1 - 1    | RAME LOCK -<br>COMPUTER IN2 | Turns the FRAME LOCK-COMPUTER IN2 function on/off. |
| F          | RAME LOCK - HDMI            | Turns the FRAME LOCK-HDMI function on/off.         |

| Item  |                               | Description                                                                         |
|-------|-------------------------------|-------------------------------------------------------------------------------------|
| SETUP |                               |                                                                                     |
| I I   | AUTO KEYSTONE EXECUTE         | Performs the automatic keystone distortion setting.                                 |
|       | KEYSTONE V                    | Adjusts the vertical keystone distortion setting.                                   |
|       | KEYSTONE H                    | Adjusts the horizontal keystone distortion setting.                                 |
|       | PERFECT FIT                   | Adjusts the shape of the projected image in each of the corners and sides.          |
|       | AUTO ECO MODE                 | Turns on/off the automatic eco mode function.                                       |
|       | ECO MODE                      | Selects the eco mode.                                                               |
|       | MIRROR                        | Selects the mirror status.                                                          |
|       | STANDBY MODE                  | Selects the standby mode.                                                           |
|       | MONITOR OUT -<br>COMPUTER IN1 | Assigns the <b>MONITOR OUT</b> when the <b>COMPUTER IN1</b> input port is selected. |
|       | MONITOR OUT -<br>COMPUTER IN2 | Assigns the <b>MONITOR OUT</b> when the <b>COMPUTER IN2</b> input port is selected. |
|       | MONITOR OUT - LAN             | Assigns the <b>MONITOR OUT</b> when the <b>LAN</b> input port is selected.          |
|       | MONITOR OUT - USB<br>TYPE A   | Assigns the <b>MONITOR OUT</b> when the <b>USB TYPE A</b> input port is selected.   |
|       | MONITOR OUT - USB<br>TYPE B   | Assigns the <b>MONITOR OUT</b> when the <b>USB TYPE B</b> input port is selected.   |
|       | MONITOR OUT -<br>HDMI         | Assigns the <b>MONITOR OUT</b> when the <b>HDMI</b> input port is selected.         |

|    | AUTO SEARCH           | Turns the automatic signal search function on/off.                                      |
|    | AUTO KEYSTONE         | Turns the automatic keystone distortion correction function on/off.                     |
|    | DIRECT POWER ON       | Turns the direct power on function on/off.                                              |
|    | AUTO POWER OFF        | Configures the timer to shut off the projector when no signal is detected.              |
|    | USB TYPE B            | Selects the USB TYPE B setting.                                                         |
|    | MY BUTTON-1           | Assigns the functions for the <b>MY BUTTON-1</b> button on the included remote control. |
|    | MY BUTTON-2           | Assigns the functions for the <b>MY BUTTON-2</b> button on the included remote control. |
|    | MY SOURCE             | Selects the My Source setting.                                                          |
|    | REMOTE FREQ<br>NORMAL | Turns the remote control signal frequency normal function on/off.                       |
|    | REMOTE FREQ<br>HIGH   | Turns the remote control signal frequency high function on/ off.                        |

The items shown in the table below can be performed using the **Projector Control** menu. Click the **[QUIT PRESENTER MODE]**.

| Item    |                        | Description                                |
|---------|------------------------|--------------------------------------------|
| SERVICE |                        |                                            |
|         | QUIT PRESENTER<br>MODE | Quit compulsorily from the Presenter mode. |

#### 3.11 Remote Control

You can use your Web browser to control the projector.

• Do not attempt to control the projector with the projector's remote control and via your Web browser at the same time. It may cause some operational errors in the projector.

The functions on the bundled remote control are assigned to the Web Remote Control screen.

| Item        | Description                                             |
|-------------|---------------------------------------------------------|
| POWER       | Assigned the same operation as STANDBY/ON button.       |
| COMPUTER    | Assigned the same operation as <b>COMPUTER</b> button.  |
| VIDEO       | Assigned the same operation as <b>VIDEO</b> button.     |
| BLANK       | Assigned the same operation as <b>BLANK</b> button.     |
| FREEZE      | Assigned the same operation as FREEZE button.           |
| MUTE        | Assigned the same operation as <b>MUTE</b> button.      |
| MENU        | Assigned the same operation as <b>MENU</b> button.      |
| <b>A</b>    | Assigned the same operation as ▲ button.                |
| ▼           | Assigned the same operation as ▼ button.                |
| ◀           | Assigned the same operation as ◀ button.                |
| <b>&gt;</b> | Assigned the same operation as ▶ button.                |
| ENTER       | Assigned the same operation as <b>ENTER</b> button.     |
| RESET       | Assigned the same operation as <b>RESET</b> button.     |
| PAGE UP     | Assigned the same operation as <b>PAGE UP</b> button.   |
| PAGE DOWN   | Assigned the same operation as <b>PAGE DOWN</b> button. |
| SLIDESHOW   | Starts the Slideshow.                                   |

**NOTE** • The Web Remote Control does not support repeat function that performs an action while holding a button clicked down.

- Since the repeat function is not available, click the button repeatedly as many times as you require.
- Even if you hold the button clicked down for a while, the Web Remote Control sends your request command one time only. Release the button, then click it again.
- When the **[POWER]** button is pushed, a message window comes up to confirm the operation. To control the power, push **[OK]**, otherwise push **[Cancel]**.
- The **[PAGE DOWN]** and **[PAGE UP]** buttons on the Web Remote Control cannot be used as mouse emulation function of the projector.

# **3.12 Projector Status**

Displays and configures the current projector status.

| Item         | Description                                     |
|--------------|-------------------------------------------------|
| Error Status | Displays the current error status               |
| Lamp Time    | Displays the usage time for the current lamp.   |
| Filter Time  | Displays the usage time for the current filter. |
| Power Status | Displays the current power status.              |
| Input Status | Displays the current input signal source.       |
| Blank On/Off | Displays the current Blank on/off status.       |
| Mute         | Displays the current Mute on/off status.        |
| Freeze       | Displays the current Freeze status.             |

### 3.13 Network Restart

Restarts the projector's network connection.

| Item Description |                                                                                              |
|------------------|----------------------------------------------------------------------------------------------|
| Restart          | Restarts the projector's network connection in order to activate new configuration settings. |

**NOTE** • Restarting requires you to re-log on in order to further control or configure the projector via a web browser. Wait 30 seconds or more after clicking the [Restart] button to log on again.

# 4. My Image Function

The projector can display still images that are transferred via the network.

MY IMAGE transmission requires an exclusive application for your computer. "PJImg/Projector Image Tool" is necessary to use MY IMAGE transmission. It can be downloaded from the Hitachi web site (http://www.hitachi-america.us/digitalmedia or http://www.hitachidigitalmedia.com). Refer to the manual for the application for instructions.

To display the transferred image, select the MY IMAGE item in the NETWORK menu. For more information, please see the description of the MY IMAGE item of the NETWORK menu. ( **NETWORK menu in User's Manual – Operating Guide**)

**NOTE** • It is possible to allocate the image file up to 4 in the maximum.

- Using **MY BUTTON** that registered MY IMAGE can display transferred image. (**QPTION** menu in the User's Manual Operating Guide)
- The image file also can be displayed by using schedule function from the web browser. Refer to item **7.3 Event Scheduling** ( $\square$ 81) in detail.
- If you display MY IMAGE data on screen while you are using the USB Display function, the application for the USB Display will be closed. To restart the application, exit the MY IMAGE function, and then the software in the projector, LiveViewerLiteUSB.exe, will run again. ( USB Display in the User's Manual Operating Guide)

#### 4. My Image Function (Continued)

Configure the following items from a web browser when MY IMAGE function is used.

**Example**: If the IP address of the projector is set to **192.168.1.10**:

- 1) Enter "http://192.168.1.10/" into the address bar of the web browser.
- 2) Enter your user name and password, and then click the **[OK]**.
- 3) Click the [Port Settings] on the main menu.
- 4) Click the [Enable] check box to open the My Image Port (Port: 9716). Click the [Enable] check box for the [Authentication] setting when authentication is required, otherwise clear the check box.
- 5) Click the **[Apply]** button to save the settings.

When the authentication setting is enabled, the following settings are required.

- 6) Click the [Security Settings] on the main menu.
- 7) Select the [Network Control] and enter the desired authentication password.
- 8) Click the [Apply] button to save the settings.

**NOTE** • The Authentication Password will be the same for **Network Control** Port1 (Port: 23), Network Control Port2 (Port: 9715), PJLink™ Port (Port: 4352), My Image Port (Port: 9716) and Messenger Port (Port: 9719).

• The new configuration settings are activated after restarting the network connection. When the configuration settings are changed, you must restart the network connection. You can restart the network connection by clicking the **[Network Restart]** on the main menu.

## 5. Messenger Function

The projector can display the text data transferred via the network on the screen. The text data can be displayed on the screen in two ways that displays the text transferred from the computer on real time, and the other chooses and displays the text data from the ones once stored in the projector.

Messenger function requires an exclusive application for your computer. To edit, transfer and display the text data, use the application. You can download it from the Hitachi web site (http://www.hitachi-america.us/digitalmedia or http://www.hitachidigitalmedia.com). Refer to the manual for the application for the details of Messenger function and instructions of the application.

**NOTE** • It is possible to store the text data up to 12 in the maximum.

- Using **MY BUTTON** that registered MESSENGER can turn the displaying messenger text on/off. (**QOPTION** menu in the User's Manual Operating Guide)
- The text file also can be displayed by using schedule function via the web browser. Refer to item **7.3 Event Scheduling** ( **381**) for the detail.

#### 5. Messenger Function (Continued)

Configure the following items from a web browser when Messenger function is used.

**Example**: If the IP address of the projector is set to **192.168.1.10**:

- 1) Enter "http://192.168.1.10/" into the address bar of the web browser.
- 2) Enter your user name and password, and then click the **[OK]**.
- 3) Click the [Port Settings] on the main menu.
- 4) Click the [Enable] check box to open the Messenger Port (Port: 9719). Click the [Enable] check box for the [Authentication] setting when authentication is required, otherwise clear the check box.
- 5) Click the **[Apply]** button to save the settings.

When the authentication setting is enabled, the following settings are required.

- 6) Click the [Security Settings] on the main menu.
- 7) Select the [Network Control] and enter the desired authentication password.
- 8) Click the [Apply] button to save the settings.

• The Authentication Password will be the same for Network Control Port1 (Port: 23), Network Control Port2 (Port: 9715), PJLink™ Port (Port: 4352), My Image Port (Port: 9716) and Messenger Port (Port: 9719).

• The new configuration settings are activated after restarting the network connection. When the configuration settings are changed, you must restart the network connection. You can restart the network connection by clicking the **[Network Restart]** on the main menu.

## 6. Network Bridge Function

This projector is equipped with the NETWORK BRIDGE function to perform mutual conversion of a network protocol and a serial interface.

Using the NETWORK BRIDGE function, a computer that is connected with this projector by Ethernet communication can control an external device that is connected with this projector by RS-232C communication as a network terminal.

## **6.1 Connecting devices**

- 1) Connect the projector's **LAN** port and the computer's LAN port with a LAN cable, for Ethernet communication.
- 2) Connect the projector's **CONTROL** port and the device's RS-232C port with an RS-232C cable, for RS-232C communication.

**NOTE** • Before connecting the devices, read the manuals for the devices to ensure the connection.

For RS-232C connection, check the specifications of each port and use the suitable cable. ( "Connection to the ports" in the User's Manual – Operating Guide (Technical))

# **6.2 Communication setup**

To configure the setup of the communication using NETWORK BRIDGE for the projector, use items in the COMMUNICATION menu. Open the menu of the projector and select the OPTION - SERVICE - COMMUNICATION menu. ( OPTION menu - SERVICE - COMMUNICATION in the User's Manual - Operating Guide)

- 1) Using the COMMUNICATION TYPE menu, select the NETWORK BRIDGE for the **CONTROL** port.
- Using the SERIAL SETTINGS menu, select the proper baud rate and parity for the CONTROL port, according to the specification of the RS-232C port of the connected device.

| Item        | Condition                         |
|-------------|-----------------------------------|
| BAUD RATE   | 4800bps/9600bps/19200bps/38400bps |
| PARITY      | NONE/ODD/EVEN                     |
| Data length | 8 bit (fixed)                     |
| Start bit   | 1 bit (fixed)                     |
| Stop bit    | 1 bit (fixed)                     |

3) Using the TRANSMISSION METHOD menu, set up the proper method for the **CONTROL** port according to your use.

**NOTE** • The OFF is selected for the COMMUNICATION TYPE as the default setting.

- Using the COMMUNICATION menu, set up the communication. Remember that an unsuitable setup could cause malfunction of communication.
- When COMMUNICATION TYPE is set to NETWORK BRIDGE, the **CONTROL** port doesn't accept RS-232C commands.

## **6.3 Communication port**

For the NETWORK BRIDGE function, send the data from the computer to the projector with using the **Network Bridge Port** that is configured in the "Port Settings" of web browser. (\$\omega\$50)

**NOTE** • Except for 9715, 9716, 9719, 9720, 5900, 5500, 4352 between 1024 and 65535 can be set up as the **Network Bridge Port** number. It is set to 9717 as the default setting.

#### 6.4 Transmission method

The transmission method can be selected from the menus, only when the NETWORK BRIDGE is selected for the COMMUNICATION TYPE.

( OPTION menu – SERVICE – COMMUNICATION in the User's Manual – Operating Guide)

HALF-DUPLEX ↔ FULL-DUPLEX

#### 6.4.1 HALF-DUPLEX

This method lets the projector make two way communication, but only one direction, either transmitting or receiving data, is allowed at a time.

The method does not allow the projector to receive the data from the computer while waiting for response data from an external device. After the projector receives the response data from an external device or the response limit time is past, the projector can receive the data from the computer.

That means that the projector controls transmitting and receiving the data to synchronize the communication.

To use the HALF-DUPLEX method, set up the RESPONSE LIMIT TIME following the instructions below.

Using the RESPONSE LIMIT TIME menu, set the waiting time for response data from an external device. (QOPTION menu – SERVICE – COMMUNICATION in the User's Manual – Operating Guide)

OFF 
$$\leftrightarrow$$
 1s  $\leftrightarrow$  2s  $\leftrightarrow$  3s ( $\leftrightarrow$  OFF)

#### 6.4 Transmission method (Continued)

**NOTE** • With using the HALF-DUPLEX method, the projector can send out 254 byte data as maximum at once.

• If it is not required to monitor the response data from an external device and the RESPONSE LIMIT TIME is set to OFF, the projector can receive the data from the computer and send it out to an external device continuously. The OFF is selected as the default setting.

#### 6.4.2 FULL-DUPLEX

This method lets the projector make two way communication, transmitting and receiving data at the same time, without monitoring response data from an external device.

With using this method, the computer and an external device will send the data out of synchronization. If it is required to synchronize them, set the computer to make the synchronization.

**NOTE** • In case that the computer controls to synchronize transmitting and receiving the data, it may not be able to control an external device well depending on the processing status of the projector.

## 7. Other Functions

### 7.1 E-mail Alerts

The projector can automatically send an alert message to the specified e-mail addresses when the projector detects a certain condition that is requiring maintenance or detected an error.

**NOTE** • Up to five e-mail addresses can be specified.

• The projector may be not able to send e-mail if the projector suddenly loses power.

#### Mail Settings (<sup>□</sup>52)

To use the projector's e-mail alert function, please configure the following items through a web browser.

**Example**: If the IP address of the projector is set to **192.168.1.10**:

- 1) Enter "http://192.168.1.10/" into the address bar of the web browser.
- 2) Enter your user name and password, and then click the [OK].
- 3) Click the **[Mail Settings]** and configure each item. Refer to item **3.5 Mail Settings** (\$\subset\$ **52**) for further information.
- 4) Click the [Apply] button to save the settings.

**NOTE** • Click the **[Send Test Mail]** button in the **[Mail Settings]** to confirm that the e-mail settings are correct. The following mail will be delivered to the specified addresses.

Subject line :Test Mail <Projector name>

Text :Send Test Mail

Date <Testing date>
Time <Testing time>

#### 7.1 E-mail Alerts (Continued)

- 5) Click the **[Alert Settings]** on the main menu to configure the E-mail Alerts settings.
- 6) Select and configure each alert item. Refer to item **3.6 Alert Setting** (**\$\subseteq\$53**) for further information.
- 7) Click the [Apply] button to save the settings.

Failure/Warning e-mails are formatted as follows:

Subject line: <Mail title> <Projector name>

Text : <Mail text>

Date <Failure/Warning date>
Time <Failure/Warning time>
IP Address <Projector IP address>
MAC Address <Projector MAC address>

## 7.2 Projector Management using SNMP

The SNMP (Simple Network Management Protocol) enables to manage the projector information, which is a failure or warning status, from the computer on the network. The SNMP management software will be required on the computer to use this function.

**NOTE** • It is recommended that SNMP functions be carried out by a network administrator.

• SNMP management software must be installed on the computer to monitor the projector via SNMP.

## **SNMP Settings (**\$\omega\$50\$)

Configure the following items via a web browser to use SNMP.

**Example**: If the IP address of the projector is set to 192.168.1.10:

- 1) Enter "http://192.168.1.10/" into the address bar of the web browser.
- 2) Enter your user name and password, and then click the [OK].
- 3) Click the [Port Settings] on the main menu.
- 4) Click the [Download MIB file] to download a MIB file.

**NOTE** • To use the downloaded MIB file, specify the file by your SNMP manager.

5) Click the **[Enable]** check box to open the **SNMP Port**. Set the IP address to send the SNMP trap to when a Failure/Warning occurs.

**NOTE** • A Network Restart is required after the **SNMP Port** configuration settings have been changed. Click the **[Network Restart]** and configure the following items.

- 6) Click the [Security Settings] on the main menu.
- 7) Click the **[SNMP]** and set the community name on the screen that is displayed.

**NOTE** • A Network Restart is required after the **Community name** has been changed. Click the **[Network Restart]** and configure the following items.

- 8) Configure the settings for Trap transmission of Failures/Warnings. Click the **[Alert Settings]** on the main menu and select the Failure/Warning item to be configured.
- 9) Click the **[Enable]** check box to send out the SNMP trap for Failures/Warnings. Clear the **[Enable]** check box when SNMP trap transmission is not required.
- 10) Click the [Apply] button to save the settings.

## 7.3 Event Scheduling

The scheduling function enables to setup scheduled events including power on / power off. It enables to be "self-management" projector.

**NOTE** • You can schedule the following control events: Power, Input Source, My Image, Messenger, Slideshow. (\$\omega\$56)

- The power on / off event has the lowest priority among the all events that are defined at the same time.
- There are 3 types of Scheduling, 1) daily 2) weekly 3) specific date. (455)
- The priority for scheduled events is as follows 1) specific date 2) weekly 3) daily.
- Up to five specific dates are available for scheduled events. Priority is given to those with the lower numbers when more than one event has been scheduled for the same date and time (e.g., 'Specific date No. 1' has priority over 'Specific date No. 2' and so on.
- Be sure to set the date and time before enabling scheduled events. (☐58)

#### 7.3 Event Scheduling(Continued)

#### Schedule Settings (455)

Schedule settings can be configured from a web browser.

**Example**: If the IP address of the projector is set to **192.168.1.10**:

- 1) Enter "http://192.168.1.10/" into the address bar of the web browser.
- 2) Enter your user name and password, and then click the **[OK]**.
- 3) Click the **[Schedule Settings]** on the main menu and select the required schedule item. For example, if you want to perform the command every Sunday, please select the **[Sunday]**.
- 4) Click the [Enable] check box to enable scheduling.
- 5) Enter the date (month/day) for specific date scheduling.
- 6) Click the [Apply] button to save the settings.
- 7) After configure the time, command and parameters, click the **[Register]** to add the new event.
- 8) Click the [Delete] button when you want to delete a schedule.

There are three types of scheduling.

- 1) Daily: Perform the specified operation at a specified time every day.
- 2) Sunday ~ Saturday: Perform the specified operation at the specified time on a specified day of the week.
- 3) Specific date: Perform the specified operation on the specified date and time.

**NOTE** • In standby mode, the **POWER** indicator will flash green for approx. 3 seconds when at least 1 "Power ON" schedule is saved.

• When the schedule function is used, the power cord must be connected to the projector and the outlet. The schedule function does not work when the breaker in a room is tripped. The power indicator will lights orange or green when the projector is receiving AC power.

#### 7.3 Event Scheduling(Continued)

## Date/Time Settings (4958)

The Date/Time setting can be adjusted via a web browser.

**Example**: If the IP address of the projector is set to **192.168.1.10**:

- 1) Enter "http://192.168.1.10/" into the address bar of the web browser.
- 2) Enter your user name and password, and then click the [OK].
- 3) Click the **[Date/Time Settings]** on the main menu and configure each item. Refer to item **3.8 Date/Time Settings** (\$\omega\$58) for further information.
- 4) Click the [Apply] button to save the settings.

**NOTE** • The battery for the built in clock may be dead if the clock loses time even when the date and time have been set correctly. Replace the battery by following the instructions on replacing the battery.

( Replacing the internal clock battery in the User's Manual (concise)

• The internal clock's time may not remain accurate. Using SNTP is recommended to maintain accurate time.

#### 7.4 Command Control via the Network

You can configure and control the projector via the network using RS-232C commands.

#### **Communication Port**

The following two ports are assigned for the command control.

TCP #23 (Network Control Port1 (Port: 23))
TCP #9715 (Network Control Port2 (Port: 9715))

**NOTE** • Command control is available only via the specified port above.

#### **Command Control Settings (**\$\omega\$50**)**

Configure the following items from a web browser when command control is used.

**Example**: If the IP address of the projector is set to **192.168.1.10**:

- 1) Enter "http://192.168.1.10/" into the address bar of the web browser.
- 2) Enter your user name and password, and then click the [OK].
- 3) Click the **[Port Settings]** on the main menu.

- 4) Click the [Enable] check box to open Network Control Port1 (Port: 23) to use TCP #23. Click the [Enable] check box for the [Authentication] setting when authentication is required, otherwise clear the check box.
- 5) Click the **[Enable]** check box to open **Network Control Port2 (Port: 9715)** to use TCP #9715. Click the **[Enable]** check box for the **[Authentication]** setting when authentication is required, otherwise clear the check box.
- 6) Click the [Apply] button to save the settings.

When the authentication setting is enabled, the following settings are required.  $(\mbox{$\square$}60)$ 

- 7) Click the [Security Settings] on the main menu.
- 8) Click the **[Network Control]** and enter the desired authentication password.

  \* See NOTE.
- 9) Click the [Apply] button to save the settings.

**NOTE** • The Authentication Password will be the same for **Network Control** Port1 (Port: 23), Network Control Port2 (Port: 9715), PJLink™ Port (Port: 4352), My Image Port (Port: 9716) and Messenger Port (Port: 9719).

• The new configuration settings are activated after restarting the network connection. When the configuration settings are changed, you must restart the network connection. You can restart the network connection by clicking the **[Network Restart]** on the main menu.

#### **Command Format**

Command formats differ among the different communication ports.

#### • TCP #23

You can use the RS-232C commands without any changes. The reply data format is the same as the RS-232C commands. ( "RS-232C Communication" in the User's Manual – Operating Guide (Technical)) However, the following reply will be sent back in the event of authentication failure when authentication is enabled.

<Reply in the event of an authentication error>

| Reply | Error code |      |
|-------|------------|------|
| 0x1F  | 0x04       | 0x00 |

#### • TCP #9715

#### Send Data format

The following formatting is added to the header (0 x 02), Data length (0 x 0D), Checksum (1 byte) and Connection ID (1 byte) of the RS-232C commands.

| Header | Data length | RS-232Ccommand | Check Sum | Connection ID |
|--------|-------------|----------------|-----------|---------------|
| 0x02   | 0x0D        | 13 bytes       | 1 byte    | 1 byte        |

Header

Data length

RS-232C commands byte length (0x0D, Fixed)

RS-232C commands that start with 0xBE 0xEF

(13 bytes)

Check Sum

→ This is the value to make zero on the addition of the lower 8 bits from the header to the checksum.

Connection ID

→ Random value from 0 to 255 (This value is attached to the reply data)

## **Reply Data format**

The connection ID (the data is same as the connection ID data on the sending data format) is attached to the RS-232C commands reply data.

#### <ACK reply>

| Reply | Connection ID |
|-------|---------------|
| 0x06  | 1 byte        |

### <NAK reply>

| Reply | Connection ID |
|-------|---------------|
| 0x15  | 1 byte        |

#### <Error reply>

| Reply | Error code | Connection ID |
|-------|------------|---------------|
| 0x1C  | 2 bytes    | 1 byte        |

## <Data reply>

| Reply | Data    | Connection ID |
|-------|---------|---------------|
| 0x1D  | 2 bytes | 1 byte        |

### <Projector busy reply>

| Reply | Status code | Connection ID |
|-------|-------------|---------------|
| 0x1F  | 2 bytes     | 1 byte        |

## <Authentication error reply>

| Reply | Authentication<br>Error code |      | Connection ID |
|-------|------------------------------|------|---------------|
| 0x1F  | 0x04                         | 0x00 | 1 byte        |

#### **Automatic Connection Break**

The TCP connection will be automatically disconnected after there is no communication for 30 seconds after being established.

#### **Authentication**

The projector does not accept commands without authentication success when authentication is enabled. The projector uses a challenge response type authentication with an MD5 (Message Digest 5) algorithm.

When the projector is using a LAN, a random 8 bytes will be returned if authentication is enabled. Bind this received 8 bytes and the Authentication Password and digest this data with the MD5 algorithm and add this in front of the commands to send.

Following is a sample if the Authentication Password is set to "password" and the random 8 bytes are "a572f60c".

- 1) Select the projector.
- 2) Receive the random 8 bytes "a572f60c" from the projector.
- 3) Bind the random 8 bytes "a572f60c" and the Authentication Password "password" and it becomes "a572f60cpassword".
- 4) Digest this bind "a572f60cpassword" with MD5 algorithm. It will be "e3d97429adffa11bce1f7275813d4bde".
- 5) Add this "e3d97429adffa11bce1f7275813d4bde" in front of the commands and send the data.
  - Send "e3d97429adffa11bce1f7275813d4bde"+command.
- 6) When the sending data is correct, the command will be performed and the reply data will be returned. Otherwise, an authentication error will be returned.

**NOTE** • As for the transmission of the second or subsequent commands, the authentication data can be omitted when the same connection.

# **User's Manual (concise)**

Thank you for purchasing this projector.

Please read through this manual before using this product, in order to use safely and utilize well the product.

**△WARNING** ► Before using this product, be sure to read all manuals for this product. After reading them, store them in a safe place for future reference.

- ▶ Heed all the warnings and cautions in the manuals or on the product.
- ▶ Follow all the instructions in the manuals or on the product.

**NOTE** • In this manual, unless any comments are accompanied, "the manuals" means all the documents provided with this product, and "the product" means this projector and all the accessories came with the projector.

**ENGLISH** 

#### First of all

#### **Entries and graphical symbols explanation**

The following entries and graphical symbols are used for the manuals and the product as follows, for safety purpose. Please know their meanings beforehand, and heed them.

**△WARNING** This entry warns of a risk of serious personal injury or even death.

**△CAUTION** This entry warns of a risk of personal injury or physical damage.

**NOTICE** This entry notices of fear of causing trouble.

#### Important safety instruction

The followings are important instructions for safely using the product. Be sure to follow them always when handling the product. The manufacturer assumes no responsibility for any damage caused by mishandling that is beyond normal usage defined in these manuals of this projector.

**△WARNING** ► Never use the product in or after an abnormality (ex. giving off smoke, smelling strange, took a liquid or an object inside, broken, etc.) If an abnormality should occur, unplug the projector urgently.

- ► Situate the product away from children and pets.
- ▶ Do not use the product when there is fear of a thunderbolt.
- ▶ Unplug the projector from the power outlet if the projector is not used for the time being.
- ▶ Do not open or remove any portion of the product, unless the manuals direct it. For internal maintenance, leave it to your dealer or their service personnel.
- ▶ Use only the accessories specified or recommended by the manufacturer.
- ▶ Do not modify the projector or accessories.
- ▶ Do not let any things or any liquids enter to the inside of the product.
- ▶ Do not wet the product.
- ▶ Do not place the projector where any oils, such as cooking or machine oil, are used. Oil may harm the product, resulting in malfunction, or falling from the mounted position.
- ▶ Do not apply a shock or pressure to this product.
- Do not place the product on an unstable place such as the uneven surface or the leaned table.
- Do not place the product unstably. Place the projector so that it does not protrude from the surface where the projector is placed on.
- Remove all the attachments including the power cord and cables, from the projector when carrying the projector.
- ▶ Do not look into the lens and the openings on the projector, while the lamp is on.
- ▶ Do not approach the lamp cover and the exhaust vents, while the projection lamp is on. Also after the lamp goes out, do not approach them for a while, since too hot.

## Regulatory notices

#### **About Electro-Magnetic Interference**

#### In CANADA

This Class B digital apparatus complies with Canadian ICES-003.

# In the US, and other places where the FCC regulations are applicable

#### **Declaration of Conformity**

Trade name HITACHI

Model Number CP-X4021N, CP-X5021N, CP-WX4021N

Responsible Party Hitachi America, Ltd.

Address 900 Hitachi way, Chula Vista, CA 91914-3556 U.S.A.

Telephone Number +1 -800-225-1741

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**INSTRUCTIONS TO USERS:** This equipment complies with the requirements of FCC (Federal Communication Commission) equipment provided that the following conditions are met. Some cables have to be used with the core set. Use the accessory cable or a designated-type cable for the connection. For cables that have a core only at one end, connect the core to the projector.

**CAUTION:** Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

#### Regulatory notices (continued)

#### **About Waste Electrical and Electronic Equipment**

The mark is in compliance with the Waste Electrical and Electronic Equipment Directive 2002/96/EC (WEEE).

The mark indicates the requirement NOT to dispose the equipment including any spent or discarded batteries or accumulators as unsorted municipal waste, but use the return and collection systems available. If the batteries or accumulators included with this equipment, display the chemical symbol Hg, Cd, or Pb, then it means that the battery has a heavy metal content of more than 0.0005% Mercury or more than, 0.002% Cadmium, or more than 0.004% Lead.

## **Contents of package**

Your projector should come with the items shown below. Check that all the items are included. Require of your dealer immediately if any items are missing.

- (1) Remote control with two AA batteries
- (2) Power cord
- (3) Computer cable
- (4) Lens cover
- (5) User's manuals (Book x1, CD x1)
- (6) Security label
- (7) Application CD

**NOTE** • Keep the original packing materials for future reshipment. Be sure to use the original packing materials when moving the projector. Use special caution for the lens.

• The projector may make a rattling sound when tilted, moved or shaken, since a flap to control the air flow inside of the projector has moved. Be aware that this is not a failure or malfunction.

## **Preparations**

#### Loading batteries into the remote control

Please insert the batteries into the remote control before using it. If the remote control starts to malfunction, try to replace the batteries. If you will not use the remote control for long period, remove the batteries from the remote control and store them in a safe place.

- Holding the hook part of the battery cover, remove it.
- Align and insert the two AA batteries
   (HITACHI MAXELL, Part No.LR6 or
   R6P) according to their plus and minus
   terminals as indicated in the remote
   control.

**3.** Replace the battery cover in the direction of the arrow and snap it back into place.

**△WARNING** ► Always handle the batteries with care and use them only as directed. Improper use may result in battery explosion, cracking or leakage, which could result in fire, injury and/or pollution of the surrounding environment.

- When replacing the batteries, replace both of the batteries with new batteries of the same type. Do not use a new battery with a used battery.
- Be sure to use only the batteries specified. Do not use batteries of different types at the same time. Do not mix a new battery with used one.
- Make sure the plus and minus terminals are correctly aligned when loading a battery.
- Keep a battery away from children and pets.
- Do not recharge, short circuit, solder or disassemble a battery.
- Do not place a battery in a fire or water. Keep batteries in a dark, cool and dry place.
- If you observe battery leakage, wipe out the leakage and then replace a battery.
   If the leakage adheres to your body or clothes, rinse well with water immediately.
- Obey the local laws on disposing the battery.

## **Arrangement**

Refer to tables **T-1** and **T-2** at the back of this manual as well as the following to determine the screen size and projection distance.

⊕× ♥: Screen size

a: Projection distance (from the projector's end)

(b), (c): Screen height

**△WARNING** ► Install the projector where you can access the power outlet easily.

- ▶ Do not subject the projector to unstable conditions. Install the projector in a stable horizontal position.
- Do not use any mounting accessories except the accessories specified by the manufacturer. Read and keep the manuals of the accessories used.
- For special installation such as ceiling mounting, be sure to consult your dealer beforehand. Specific mounting accessories and services may be required.
- ▶ Do not install the projector near thermally conductive or flammable things.
- ▶ Do not place the projector where any oils, such as cooking or machine oil, are used.
- ▶ Do not place the projector in a place where it may get wet.

**△CAUTION** ► Place the projector in a cool place with sufficient ventilation.

- Keep a space of 30 cm or more between a side of the projector and other objects such as walls.
- Do not stop up, block nor cover the projector's vent holes.
- Do not place the projector at places that are exposed to magnetic fields, doing so can cause the cooling fans inside the projector to malfunction.
- ► Avoid placing the projector in smoky, humid or dusty place.
- Do not place the projector near humidifiers. Especially for an ultrasonic humidifier, chlorine and minerals contained in tap water are atomized and could be deposited in the projector causing image degradation or other problems.

**NOTICE** • Position the projector to prevent light from directly hitting the projector's remote sensor.

• Do not place the product in a place where radio interference may be caused.

## **Connecting with your devices**

Before connecting the projector to a device, consult the manual of the device to confirm that the device is suitable for connecting with this projector and prepare the required accessories, such as a cable in accord with the signal of the device. Consult your dealer when the required accessory did not come with the product or the accessory is damaged.

After making sure that the projector and the devices are turned off, perform the connection, according to the following instructions. Refer to figures **F-1** to **F-4** at the back of this manual.

For details, see **User's Manual - Operating Guide**. Before connecting the projector to a network system, be sure to read **User's Manual - Network Guide** too.

- **△WARNING** ► Use only the appropriate accessories. Otherwise it could cause a fire or damage the projector and devices.
- Use only the accessories specified or recommended by the projector's manufacturer. It may be regulated under some standard.
- Neither disassemble nor modify the projector and the accessories.
- Do not use the damaged accessory. Be careful not to damage the accessories. Route a cable so that it is neither stepped on nor pinched out.
- △CAUTION ► For a cable with a core at only one end, connect the end with the core to the projector. That may be required by EMI regulations.
- ▶ Before connecting the projector to a network system be sure to obtain the consent of the administrator of the network.
- ▶ Do not connect the **LAN** port to any network that might have the excessive voltage.
- ▶ Before removing the USB storage device from the port of the projector, be sure to use the REMOVE USB function on the thumbnail screen to secure your data.
- **NOTE** Do not turn on or off the projector while connected to a device in operation, unless that is directed in the manual of the device.
- Some input ports are selectable in the use. For details, see **User's Manual Operating Guide.**
- Be careful not to mistakenly connect a connector to a wrong port.
- If an oversized USB storage device blocks the **LAN** port, use a USB extension cable to connect the USB storage device.
- If a loud feedback noise is produced from the speaker, move the microphone away from the speaker.
- This projector doesn't support plug-in power for the microphone.

# **Connecting power supply**

- 1 Put the connector of the power cord into the AC IN (AC inlet) of the projector.
- 2. Firmly plug the power cord's plug into the outlet. In a couple of seconds after the power supply connection, the **POWER** indicator will light up in steady orange.

**△WARNING** ► Please use extra caution when connecting the power cord, as incorrect or faulty connections may result in fire and/or electrical shock.

- Only use the power cord that came with the projector. If it is damaged, consult your dealer to get a new one.
- Only plug the power cord into an outlet whose voltage is matched to the power cord. The power outlet should be close to the projector and easily accessible.
   Remove the power cord for complete separation.
- Never modify the power cord.

## **Turning on the power**

- Make sure that the power cord is firmly and correctly connected to the projector and the outlet.
- Make sure that the **POWER** indicator is steady orange. Then remove the lens cover.
- 3. Press the **STANDBY/ON** button on the projector or the remote control.

The projection lamp will light up and the **POWER** indicator will begin blinking in green. When the power is completely on, the indicator will stop blinking and light in steady green.

**△WARNING** ► A strong light is emitted when the projector's power is on. Do not look into the lens of the projector or look inside of the projector through any of the projector's openings.

**NOTE** • Please power on the projector prior to the connected devices.

• The projector has the DIRECT POWER ON function, which can make the projector automatically turn on. For more information, please see **User's Manual - Operating Guide**.

When the place to put the projector is slightly uneven to the left or right, use the elevator feet to place the projector horizontally. Using the feet can also tilt the projector in order to project at a suitable angle to the screen, elevating the front side of the projector within 12 degrees. This projector has 2 elevator feet and 2 elevator buttons. An elevator foot is adjustable while pushing the elevator button on the same side as it.

- 1 Holding the projector, push the elevator buttons to loose the elevator feet.
- 2. Position the front side of the projector to the desired height.
- 3. Release the elevator buttons in order to lock the elevator feet.
- After making sure that the elevator feet are locked, put the projector down gently.
- If necessary, the elevator feet can be manually twisted to make more precise adjustments. Hold the projector when twisting the feet.

△CAUTION ► Do not handle the elevator buttons without holding the projector, since the projector may drop down.

▶ Do not tilt the projector other than elevating its front within 12 degrees using the adjuster feet. A tilt of the projector exceeding the restriction could cause malfunction or shortening the lifetime of consumables, or the projector itself.

## Displaying the picture

- 1. Activate your signal source. Turn the signal source on, and make it send the signal to the projector.
- Use the VOLUME + / VOLUME buttons to adjust the volume.
   To have the projector silent, press the MUTE button on the remote control.
- 3. Press the INPUT button on the projector. Each time you press the button, the projector switches its input port in turn. You can also use the remote control to select an input signal. Press the VIDEO button for selecting an input signal from the HDMI, COMPONENT (Y, Cb/Pb, Cr/Pr), S-VIDEO or VIDEO port, or the COMPUTER button for selecting an input signal from the COMPUTER IN1, COMPUTER IN2, LAN, USB TYPE A or USB TYPE B port.
- 4. Press the **ASPECT** button on the remote control. Each time you press the button, the projector switches the mode for aspect ratio in turn.
- 5. Use the **ZOOM** ring to adjust the screen size.
- 6 Use the **FOCUS** ring to focus the picture.
- 7. Turn the **VERTICAL** adjuster fully counter clockwise. Then turn it clockwise and adjust the vertical lens position upward.
- 8. Turn the LOCK counter clockwise to loosen the lock of the HORIZONTAL adjuster.
- 9. Turn the **HORIZONTAL** adjuster clockwise or counter clockwise to adjust the horizontal lens position.
- 10. Turn the LOCK fully clockwise to tighten it and lock the horizontal lens position.

(continued on next page)

#### Displaying the picture (continued)

**△CAUTION** ► If you wish to have a blank screen while the projector's lamp is on, use one of methods below.

- Use the supplied lens cover.
- Use the BLANK function (see User's Manual Operating Guide).

Taking any other action may cause the damage on the projector.

**NOTE** • The **ASPECT** button does not work when no proper signal is inputted.

• For the details of how to adjust the picture, please see **User's Manual - Operating Guide**.

## **Turning off the power**

- 1. Press the **STANDBY/ON** button on the projector or the remote control. The message "Power off?" will appear on the screen for about 5 seconds.
- 2. Press the **STANDBY/ON** button again while the message appears.

  The projector lamp will go off, and the **POWER** indicator will begin blinking in orange. Then the **POWER** indicator will stop blinking and light in steady orange when the lamp cooling is complete.
- 3. Attach the lens cover, after the **POWER** indicator turns in steady orange.

Do not turn the projector on for about 10 minutes or more after turning it off. Also, do not turn the projector off shortly after turning it on. Such operations might cause the lamp to malfunction or shorten the lifetime of some parts including the lamp.

**△WARNING** ► Do not touch around the lamp cover and the exhaust vents during use or just after use, since it is too hot.

▶ Remove the power cord for complete separation. The power outlet should be close to the projector and easily accessible.

**NOTE** • Please power off the projector after any connected devices are powered off.

• This projector has the AUTO OFF function that can make the projector turn off automatically. For more information, please see **User's Manual - Operating Guide**.

## Replacing the lamp

A lamp has finite product life. Using the lamp for long periods of time could cause the pictures darker or the color tone poor. Note that each lamp has a different lifetime, and some may burst or burn out soon after you start using them. Preparation of a new lamp and early replacement are recommended. To prepare a new lamp, make contact with your dealer and tell the lamp type number.

## Type number: DT01171

- 1. Turn the projector off, and unplug the power cord. Allow the projector to cool for at least 45 minutes.
- 2. Prepare a new lamp. If the projector is mounted on a ceiling, or if the lamp has broken, also ask the dealer to replace the lamp.

In case of replacement by yourself, follow the following procedure.

- 3. Loosen the screw (marked by arrow) of the lamp cover and then slide and lift the lamp cover to the side to remove it.
- 4 Loosen the 3 screws (marked by arrow) of the lamp, and slowly pick up the lamp by the handles. Never loosen any other screws.
- 5. Insert the new lamp, and retighten firmly the 3 screws of the lamp that are loosened in the previous process to lock it in place.
- 6. While putting the interlocking parts of the lamp cover and the projector together, slide the lamp cover back in place. Then firmly fasten the screw of the lamp cover.
- 7. Turn the projector on and reset the lamp time using the LAMP TIME item in the OPTION menu.
- (1) Press the **MENU** button to display a menu.
- (2) Point at the ADVANCED MENU in the menu using the ▼/▲ button, then press the ▶ button.
- (3) Point at the OPTION in the left column of the menu using the ▼/▲ button, then press the ▶ button.
- (4) Point at the LAMP TIME using the ▼/▲ button, then press the ▶ button. A dialog will appear.
- (5) Press the ▶ button to select "OK" on the dialog. It performs resetting the lamp time.

**△CAUTION** ► Do not touch any inner space of the projector, while the lamp is taken out.

**NOTE** • Please reset the lamp time only when you have replaced the lamp, for a suitable indication about the lamp.

6

# M HIGH VOLTAGE M HIGH TEMPERATURE M HIGH PRESSURE

**△WARNING** ► The projector uses a high-pressure mercury glass lamp. The lamp can break with a loud bang, or burn out, if jolted or scratched, handled while hot, or worn over time. Note that each lamp has a different lifetime, and some may burst or burn out soon after you start using them. In addition, if the bulb bursts, it is possible for shards of glass to fly into the lamp housing, and for gas containing mercury and dust containing fine particles of glass to escape from the projector's vent holes.

- ▶ About disposal of a lamp: This product contains a mercury lamp; do not put it in a trash. Dispose of it in accordance with environmental laws.
- For lamp recycling, go to www.lamprecycle.org (in the US).
- For product disposal, consult your local government agency or www.eiae.org (in the US) or www.epsc.ca (in Canada).

For more information, ask your dealer.

• If the lamp should break (it will make a loud bang when it does), unplug the power cord from the outlet, and make sure to request a replacement lamp from your local dealer. Note that shards of glass could damage the projector's internals, or cause injury during handling, so please do not try to clean the projector or replace the lamp yourself.

the plua from the

power

outlet

- Disconnect If the lamp should break (it will make a loud bang when it does), ventilate the room well, and make sure not to inhale the gas or fine particles that come out from the projector's vent holes, and not to get them into your eyes or mouth.
  - Before replacing the lamp, turn the projector off and unplug the power cord, then wait at least 45 minutes for the lamp to cool sufficiently. Handling the lamp while hot can cause burns, as well as damaging the lamp.
  - Never unscrew except the appointed (marked by an arrow) screws.

- Do not open the lamp cover while the projector is suspended from a ceiling. This is dangerous, since if the lamp's bulb has broken, the shards will fall out when the cover is opened. In addition, working in high places is dangerous, so ask your local dealer to have the lamp replaced even if the bulb is not broken.
- Do not use the projector with the lamp cover removed. At the lamp replacing, make sure that the screws are screwed in firmly. Loose screws could result in damage or injury.
- Use only the lamp of the specified type. Use of a lamp that does not meet the lamp specifications for this model could cause a fire, damage or shorten the life of this product.

- If the lamp breaks soon after the first time it is used, it is possible that there are electrical problems elsewhere besides the lamp. If this happens, consult your local dealer or a service representative.
- Handle with care: jolting or scratching could cause the lamp bulb to burst during use.
- Using the lamp for long periods of time, could cause it dark, not to light up or to burst. When the pictures appear dark, or when the color tone is poor, please replace the lamp as soon as possible. Do not use old (used) lamps; this is a cause of breakage.

# Cleaning and replacing the air filter

Please check and clean the air filter periodically. When the indicators or a message prompts you to clean the air filter, comply with it as soon as possible. The air filter of this projector consists of a filter cover and a filter unit with two types of filter. If one or both of the filters are damaged or heavily soiled, replace the filter unit with a new one.

Request for a filter unit with the following type number from your dealer when purchasing a new unit.

#### Type number : MU06641 (Filter unit)

The specified filter unit also comes with a replacement lamp for this projector. Please replace the filter unit as well when you replace the lamp.

- Turn the projector off, and unplug the power cord. Allow the projector to sufficiently cool down.
- 2. Use a vacuum cleaner on and around the filter cover.
- 3. Pick and pull up the filter cover knobs to take it off.
- Press up slightly the bottom side knobs to unlock the bottom side of the filter unit. Pull the center knob to take the filter unit off.
- Use a vacuum cleaner for the filter vent of the projector and the outer side of the filter unit.
- 6. The filter unit consists of two parts. Press down around the interlocking parts to unlock, then separate the two parts.
- 7. Use a vacuum cleaner for the inner side of each part of the filter unit to clean them up. If the filters are damaged or heavily soiled, replace them with the new ones.
- 8. Combine the two parts to reassemble the filter unit.
- 9 Put the filter unit back into the projector.

(continued on next page)

#### Cleasning and replacing the air filter (continued)

- 10 Put the filter cover back into the place.
- Turn the projector on and reset the filter time using the FILTER TIME item 11. in the EASY MENU.

  - In the EASY MENU.

    (1) Press the **MENU** button to display a menu.
    (2) Point at the FILTER TIME using the ▲/▼ cursor buttons, then press the ≝ ▶ cursor (or the **ENTER** / the **RESET**) button. A dialog will appear.
  - (3) Press the ► cursor button to select the "OK" on the dialog. It performs resetting the filter time.
  - **↑ WARNING** ► Before taking care of the air filter, make sure the power cable is not plugged in, then allow the projector to cool sufficiently.
  - ► Use only the air filter of the specified type. Do not use the projector without the air filter or the filter cover. It could result in a fire or malfunction to the projector.
  - ▶ Clean the air filter periodically. If the air filter becomes clogged by dust or the like, internal temperatures rise and could cause a fire, a burn or malfunction to the projector.

**NOTE** • Please reset the filter time only when you have cleaned or replaced the air filter, for a suitable indication about the air filter.

• The projector may display the message such as the "CHECK THE AIR FLOW" or turn off the projector, to prevent the internal heat level rising.

# Replacing the internal clock battery

This projector has internal clock that uses a battery. When the clock of the network function does not work correctly, please try solution by replacement of the battery: **HITACHI MAXELL**, part number **CR2032** or **CR2032H**.

- 1. Turn the projector off, and unplug the power cord. Allow the projector to cool sufficiently.
- 2. After making sure that the projector has cooled adequately, slowly turn over the projector, so that the bottom is facing.
- 3. There is a raised dot near the battery cover at the bottom of the projector. Turn the cover in the direction indicated OPEN to position one end of the slit on the cover with the dot, using a coin or the like. And then pick the cover up to remove it.
- Pry up the battery using a flathead screwdriver or the like to take it out. While prying it up, put a finger lightly on the battery since it may pop out of the holder.
- 5. Replace with a new battery of the specified type. With the plus side facing up, slide the battery under the claw of the spring fitting. And press down on the battery until it snaps into place.
- 6. Replace the battery cover in place, then turn it in the direction indicated **CLOSE** to position the knob of the cover with the dot on the bottom case to fix the cover, using a coin or the like.

**NOTE** • The internal clock will be initialized by removing the battery. For setting the clock, see the **User's Manual - Network Guide**.

**⚠WARNING** ► Be careful of handling a battery, as a battery can cause explosion, cracking or leakage, which could result in a fire, an injury, and environment pollution.

- Use only the specified and perfect battery. Do not use a battery with damage, such as a scratch, a dent, rust or leakage.
- When replacing the battery, replace it with a new battery.
- When a battery leaked, wipe the leakage out well with a waste cloth. If the leakage adhered to your body, immediately rinse it well with water. When a battery leaked in the battery holder, replace the batteries after wiping the leakage out.
- Make sure the plus and minus terminals are correctly aligned when loading a battery.
- Do not work on a battery; for example recharging or soldering.
- Keep a battery in a dark, cool and dry place. Never expose a battery to a fire or water.
- Keep a battery away from children and pets. Be careful for them not to swallow a battery. If swallowed consult a physician immediately for emergency treatment.
- Obey the local laws on disposing a battery.

# **Using the CD manual**

The other manuals for this product are written into the included CD-ROM titled "User's Manual (detailed)". Before using the CD-ROM, please read the following to ensure the proper use.

## **■** System requirements

The system for using the CD-ROM requires the following.

Windows<sup>®</sup>: OS:Microsoft<sup>®</sup> Windows<sup>®</sup> 98, Windows<sup>®</sup> 98SE,

Windows NT®4.0, Windows® Me, Windows® 2000/Windows® XP or later

CPU:Pentium® processor 133MHz / Memory:32MB or more

Macintosh®: OS:Mac OS® 10.2 or later

CPU:PowerPC® / Memory:32MB or more

CD-ROM drive: 4x CD-ROM drive

**Display:** 256 color / 640x480 dots resolution **Applications:** Microsoft® Internet Explorer®4.0 and Adobe® Acrobat® Reader® 4.0 or later

#### ■ How to use the CD

1. Insert CD into computer's CD-ROM drive.

Windows®: In a while, Web browser automatically starts. Start up

window comes up.

**Macintosh**<sup>®</sup>: (1) Double-click on the "Projectors" icon appeared on the

desktop screen.

(2) When "main.html" file is clicked, Web browser will start

and Initial window will appear.

2. Click the model name of your projector first, and then click language you want from the displayed list. The User's manual (detailed) will open.

△CAUTION ► Only use the CD-ROM in a computer CD drive. The CD-ROM is designed for computer use only. NEVER INSERT THE CD-ROM INTO A NON-COMPUTER CD PLAYER! Inserting the CD-ROM into an incompatible CD drive may produce a loud noise, which in turn MAY RESULT IN EAR AND SPEAKER DAMAGE!

 After using CD-ROM, please put it into CD case and keep it. Please keep the CD neither in direct sunlight nor in a high temperature and high humidity environment.

**NOTE** • The information in the CD-ROM is subject to change without notice. Please check our website where you may find the latest information for this projector.  $(\Box 19)$ 

- No responsibility is taken for any obstacle and defect to hardware and software of your computer as a result of the use of the CD-ROM.
- All or Any part of the information in the CD-ROM must not be copied, reproduced or republished without notice to our company.

# **Specifications**

| Item                           | Specification                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

## **Troubleshooting - Warranty and after-service**

If an abnormal operation (such as smoke, strange odor or excessive sound) should occur, stop using the projector immediately.

Otherwise if a problem occurs with the projector, first refer to "Troubleshooting" of **User's Manual - Operating Guide**, **Instant Stack Guide** and **Network Guide**, and run through the suggested checks.

If this does not resolve the problem, please consult your dealer or service company. They will tell you what warranty condition is applied.

Please check the following web address where you may find the latest information for this projector.

**NOTE** • Be sure to check jack type, signal level, timing and resolution before connecting this projector to a PC.

- Some PCs may have multiple display screen modes. Use of some of these modes will not be possible with this projector.
- Depending on the input signal, full-size display may not be possible in some cases. Refer to the number of display pixels above.
- Although the projector can display signals with resolution up to UXGA (1600x1200), the signal will be converted to the projector's panel resolution before being displayed. The best display performance will be achieved if the resolutions of the input signal and projector panel are identical.
- Automatic adjustment may not function correctly with some input signals.
- The image may not be displayed correctly when the input sync signal is a composite sync or a sync on G.

# Initial set signals

The following signals are used for the initial settings. The signal timing of some computer models may be different. In such case, adjust the items V POSITION and H POSITION in the IMAGE menu.

| Resolution  | Horizo | ntal sig | nal timii | ng (µs) | Vertica | al signa | (lines) | Signal mode |                      |
|-------------|--------|----------|-----------|---------|---------|----------|---------|-------------|----------------------|
| (H x V)     | (A)    | (B)      | (C)       | (D)     | (a)     | (b)      | (c)     | (d)         | Signal mode          |
| 720 x 400   | 2.0    | 3.0      | 20.3      | 1.0     | 3       | 42       | 400     | 1           | TEXT                 |

# To input SCART RGB signal;

ex.

To input SCART RGB signal to the projector, use a SCART to RCA cable. Connect the plugs refer to above ex.. For more reference, please consult your dealer.

#### RS-232C Communication

When the projector connects to the computer by RS-232C communication, the projector can be controlled with RS-232C commands from the computer.

For details of RS-232C commands, refer to RS-232C Communication / Network command table (117).

#### Connection

- 1 Turn off the projector and the computer.
- 2. Connect the projector's **CONTROL** port and the computer's RS-232C port with a RS-232C cable (cross). Use the cable that fulfills the specification shown in figure
- $\boldsymbol{3.}$  Turn the computer on, and after the computer has started up turn the projector on.
- 4. Set the COMMUNICATION TYPE to OFF. ( OPTION menu SERVICE COMMUNICATION in the User's Manual Operating Guide)

#### [Header code] [Packet] [Data size]

Set [BEh, EFh, 03h, 06h, 00h] to byte number 0~4.

### [CRC flag]

For byte number 5, 6, refer to RS-232C Communication / Network command table (117).

## [Action]

Set functional code to byte number 7, 8.

<SET> = [01h, 00h], <GET> = [02h, 00h], <INCREMENT> = [04h, 00h]

<DECREMENT> = [05h, 00h], <EXECUTE> = [06h, 00h]

Refer to the Communication command table ( above).

## [Type] [Setting code]

For byte number  $9 \sim 12$ , refer to RS-232C Communication / Network command table ( $\square 17$ ).

#### 3. Response code / Error code ("h" shows hexadecimal)

#### (1) ACK reply: 06h

When the projector receives the Set, Increment, Decrement or Execute command correctly, the projector changes the setting data for the specified item by [Type], and it returns the code.

#### (2) NAK reply: 15h

When the projector cannot understand the received command, the projector returns the error code.

In such a case, check the sending code and send the same command again.

#### (3) Error reply: 1Ch + 0000h

When the projector cannot execute the received command for any reasons, the projector returns the error code.

In such a case, check the sending code and the setting status of the projector.

#### (4) Data reply : 1Dh + xxxxh

When the projector receives the GET command correctly, the projector returns the responce code and 2 bytes of data.

**NOTE** • For connecting the projector to your devices, please read the manual for each device and connect them correctly with suitable cables.

- Operation cannot be guaranteed when the projector receives an undefined command or data.
- Provide an interval of at least 40ms between the response code and any other code.
- The projector outputs test data when the power supply is switched ON and when the lamp is lit. Ignore this data.
- Commands are not accepted during warm-up.
- When the data length is greater than indicated by the data length code, the projector ignore the excess data code. Conversely when the data length is shorter than indicated by the data length code, the projector returns the error code to the computer.

## Command Control via the Network

When the projector connects network, the projector can be controlled with RS-232C commands from the computer with web browser.

For details of RS-232C commands, refer to RS-232C Communication / Network command table (17).

## **Connection**

- 1 Turn off the projector and the computer.
- 2. Connect the projector's **LAN** port and the computer's LAN port with a LAN cable. Use the cable that fulfills the specification shown in figure (Use CAT-5 or greater LAN Cable when LAN ports are used )
- 3. Turn the computer on and after the computer has started up turn the projector on.

# **Communication Port**

The following two ports are assigned for the command control.

TCP #23 TCP #9715

Configure the following items form a web browser when command control is used.

| Po | ort Settings                        |                |                                                                                                                                            |
|----|-------------------------------------|----------------|--------------------------------------------------------------------------------------------------------------------------------------------|
|    | Nativouk Control                    | Port open      | Click the <b>[Enable]</b> check box to open <b>[Network Control Port1 (Port: 23)]</b> to use TCP #23. Default setting is "Enable".         |
|    | Network Control<br>Port1 (Port: 23) | Authentication | Click the <b>[Enable]</b> check box for the <b>[Authentication]</b> setting when authentication is required. Default setting is "Disable". |
|    | Network Control                     | Port open      | Click the <b>[Enable]</b> check box to open <b>[Network Control Port2 (Port: 9715)]</b> to use TCP #9715. Default setting is "Enable".     |
|    | Port2 (Port: 9715)                  | Authentication | Click the [Enable] check box for the [Authentication] setting when authentication is required. Default setting is "Enable".                |

When the authentication setting is enabled, the following settings are required.

| Se | curity Settings |                                        |                                                                                               |
|----|-----------------|----------------------------------------|-----------------------------------------------------------------------------------------------|
|    |                 | Authentication<br>Password             | Enter the desired authentication password. This setting will be the same for [Network         |
|    | Network Control | Re-enter<br>Authentication<br>Password | Control Port1 (Port: 23)] and [Network Control Port2 (Port: 9715)]. Default setting is blank. |

# **Command control settings**

#### [TCP #23]

#### 1. Command format

Same as RS-232C communication, refer to RS-232C Communicaton command format.

#### 2. Response code / Error code ("h" shows hexadecimal)

Four of the response / error code used for TCP#23 are the same as RS-232C Communication (1)~(4). One authentication error reply (5) is added.

#### (1) ACK reply: 06h

Refer to RS-232C communication (410).

#### (2) NAK reply: 15h

Refer to RS-232C communication (410).

#### (3) Error reply: 1Ch + 0000h

Refer to RS-232C communication ( $\square$ 10).

#### (4) Data reply: 1Dh + xxxxh

Refer to RS-232C communication (410).

#### (5) Authentication error reply: 1Fh + 0400h

When authentication error occurred, the projector returns the error code.

## [TCP #9715]

#### 1. Command format

The commands some datum are added to the head and the end of the ones of TCP#9715 are used.

| Header | Data length | RS-232C command | Check sum | Connection ID |
|--------|-------------|-----------------|-----------|---------------|
| 0×02   | 0×0D        | 13 bytes        | 1 byte    | 1 byte        |

#### [Header]

02, Fixed

## [Data Length]

RS-232C commands byte length (0×0D, Fixed)

## [RS-232C commands]

Refer to RS-232C Communication command format (410).

#### [Check Sum]

This is the value to make zero on the addition of the lower 8 bits from the header to the checksum.

## [Connection ID]

Random value from 0 to 255 (This value is attached to the reply data).

**NOTE** • Operation cannot be guaranteed when the projector receives an undefined command or data.

- Provide an interval of at least 40ms between the response code and any other code.
- · Commands are not accepted during warm-up.

#### 2. Response code / Error code ("h" shows hexadecimal)

The connection ID is attached for the TCP#23's response / error codes are used. The connection ID is same as the sending command format.

(1) ACK reply: 06h + ××h (××h : connection ID)

(2) NAK reply : 15h + ××h

(3) Error reply: 1Ch + 0000h + ××h (4) Data reply: 1Dh + xxxxh + ××h

(5) Authentication error reply: 1Fh + 0400h + ××h

(6) Projector busy reply: 1Fh + ××××h + ××h

When the projector is too busy to receives the command, the projector returns the error code.

In such a case, check the sending code and send the same command again.

#### **Automatic Connection Break**

The TCP connection will be automatically disconnected after there is no communication for 30 seconds after being established.

#### **Authentication**

The projector does not accept commands without authentication success when authentication is enabled. The projector uses a challenge response type authentication with an MD5 (Message Digest 5) algorithm. When the projector is using a LAN, a random 8 bytes will be returned if authentication is enabled. Bind this received 8 bytes and the authentication password and digest this data with the MD5 algorithm and add this in front of the commands to send.

Following is a sample if the authentication password is set to "password" and the random 8 bytes are "a572f60c".

- 1) Select the projector.
- 2) Receive the random 8 bytes "a572f60c" from the projector.
- 3) Bind the random 8 bytes "a572f60c" and the authentication password "password" and it becomes "a572f60cpassword".
- 4) Digest this bind "a572f60cpassword" with MD5 algorithm. It will be "e3d97429adffa11bce1f7275813d4bde".
- 5) Add this "e3d97429adffa11bce1f7275813d4bde" in front of the commands and send the data.
  - Send "e3d97429adffa11bce1f7275813d4bde"+command.
- 6) When the sending data is correct, the command will be performed and the reply data will be returned. Otherwise, an authentication error will be returned.

**NOTE** • As for the transmission of the second or subsequent commands, the authentication data can be omitted when the same connection.

## Network Bridge Communication

This projector is equipped with NETWORK BRIDGE function.

When the projector connects to the computer by LAN communication, an external device that is connected with this projector by RS-232C communication can be controlled from the computer as a network terminal.

For details, see the 3.7 Controlling the external device via the projector(using the NETWORK BRIDGE function) - Network Guide.

#### Connection

- 1. Connect the computer's LAN port and the projector's **LAN** port with a LAN cable.
- 2. Connect the projector's **CONTROL** port and the RS-232C port of the devices that you want to control with a RS-232C cable.
- ${\bf 3.}\,$  Turn the computer on and after the computer has started up turn the projector on.
- 4. Set the COMMUNICATION TYPE to NETWORK BRIDGE. ( OPTION menu SERVICE COMMUNICATION in the User's Manual Operating Guide)

# **Communication settings**

For communication setting, use the OPTION - SERVICE - COMMUNICATION menu. ( OPTION menu - SERVICE - COMMUNICATION in the User's Manual - Operating Guide)

| Item                | Condition                               |
|---------------------|-----------------------------------------|
| BAUD RATE           | 4800bps / 9600bps / 19200bps / 38400bps |
| Data length         | 8 bit (fixed)                           |
| PARITY              | NONE/ODD/EVEN                           |
| Start bit           | 1 bit (fixed)                           |
| Stop bit            | 1 bit (fixed)                           |
| Transmission method | HALF-DUPLEX/FULL-DUPLEX                 |

**NOTE** • For connecting the projector to your devices, please read the manual for each device and connect them correctly with suitable cables.

- Turn off (the power of ) both the projector and other devices and unplug before connecting them.
- For details of Transmission method, refer to 3.8.4 Transmission method-Network Guide.

## **End User License Agreement for the Projector Software**

Software in the projector consists of the plural number of independent software modules and there exist our copyright or/and third party copyrights for each of such software modules. The projector also uses software modules that we have developed or/and produced. And there exist our copyright and intellectual property for each of such software and related items including but not limited to the software related documents.

These rights above are protected by copyright law and other applicable laws. And the projector uses software modules licensed as Freeware upon GNU GENERAL PUBLIC LICENSE Version 2 and GNU LESSER GENERAL PUBLIC LICENSE Version 2.1 established by Free Software Foundation, Inc. (U.S.) or license agreements for each software.

Refer following web page for license agreements for such software modules and other software.

web page address: http://av.hitachi.com/projector/index.html

Contact dealer in your region for inquiry regarding licensed software. Refer to license agreement of each software in following pages ( $\ 15\ -$ ) and license agreements of each software on the web page for detail of the license conditions and so on. (The original in English is carried since the license agreement following is established by third party other than us.)

Because the program (the software module) is licensed free of charge, the program is provided "as is" without warranty of any kind, either expressed or implied, to the extent permitted by applicable law. And we do not take any responsibility or compensate for loss of any kind (including but not limited to loss of data, loss of accuracy or loss of compatibility with interface between other programs) by the software concerned or/and use of the software concerned to the extent permitted by applicable law.

License Agreement

# Accord de licence d'utilisateur final pour le logiciel du projecteur

Le logiciel de ce projecteur est composé de plusieurs modules logiciels indépendants avec des droits d'auteurs nous appartenant et/ou appartenant à des tiers pour chacun desdits modules logiciels. Le projecteur utilise également des modules logiciels que nous avons mis au point et/ou produits. Nous détenons également des droits d'auteur et de propriété intellectuelle pour chacun desdits logiciels et des éléments connexes, y compris, mais sans s'y limiter pour les documents relatifs aux logiciels.

Les droits susmentionnés sont protégés par la législation sur le copyright et d'autres lois applicables. Et le projecteur utilise les modules de logiciel accordés en licence en tant que logiciel libre sous GNU General Public License Version 2 et GNU Lesser General Public License Version 2.1 établis par Free Software Foundation, Inc. (États-Unis) ou autres accords de licence pour chaque logiciel.

Consultez la page Web suivante pour les accords de licence pour lesdits modules logiciels et d'autres logiciels.

Adresse de la page Web: http://av.hitachi.com/projector/index.html

Adressez-vous à votre revendeur pour toute question sur les logiciels sous licence. Consultez les accords de licence de chaque logiciel aux pages suivantes (\$\omega\$15 -) et les accords de licence de chaque logiciel sur la page Web pour le détail des conditions de licence, etc. (Étant donné que les accords de licence suivants sont établis par un tiers autre que nous, ils sont stipulés en anglais.)

Étant donné que le programme (le module logiciel) est accordé sous licence gratuitement, le programme est fourni sans aucune garantie, explicite ou implicite, dans la mesure permise par la loi. Et nous n'assumons aucune responsabilité ni ne compensons pour la perte de toute sorte (y compris, mais sans s'y limiter les pertes de données, la perte de précision ou la perte de compatibilité avec une interface entre d'autres programmes) par le logiciel concerné et/ou l'utilisation du logiciel concerné dans la mesure permise par la loi.

## Endbenutzerlizenzvereinbarung für die Projektorsoftware

Die Projektorsoftware besteht aus einer Vielzahl unabhängiger Softwaremodule, und jedes dieser Softwaremodule unterliegt dem Urheberrecht von uns und/oder dem Urheberrecht Dritter. Der Projektor verwendet zudem durch uns entwickelte und/oder produzierte Softwaremodule. Für jedes dieser Softwaremodule sowie deren Zubehör, einschließlich, aber nicht beschränkt auf die zur Software gehörigen Dokumente, unterliegen dem Urheberrecht und dem geistigen Eigentumsrecht von uns.

Die obigen Rechte sind durch das Urheberschutzgesetz und anderes geltendes Recht geschützt. Zudem verwendet der Projektor Softwaremodule, die unter GNU General Public License Version 2 und GNU Lesser General Public License Version 2.1 der Free Software Foundation, Inc. (USA) bzw. unter den Lizenzvereinbarungen für die einzelnen Softwaremodule als Freeware lizenziert sind.

Informationen zu den Lizenzvereinbarungen für derartige Softwaremodule und sonstige Software finden Sie auf der folgenden Webseite.

URL: http://av.hitachi.com/projector/index.html

Wenden Sie sich bei Fragen zu Lizenzsoftware an Ihren Vertragshändler. Detaillierte Informationen die den Lizenzbedingungen finden Sie in den Lizenzvereinbarungen der jeweiligen Software auf den folgenden Seiten (\$\sup\$15-) sowie den Lizenzvereinbarungen der jeweiligen Software auf der Webseite. (Da die folgenden Lizenzvereinbarungen durch Dritte festgelegt wurden, sind sie im englischen Original wiedergegeben).

Da das Programm (das Softwaremodul) kostenfrei bereitgestellt wird, erfolgt die Bereitstellung in gesetzlich zulässigem Umfang ohne Mängelgewähr und ohne Gewährleistung in irgendeiner Form, weder ausdrücklich noch stillschweigend. Wir schließen in gesetzlich zulässigem Umfang jede Haftung für Verluste irgendeiner Art (einschließlich, jedoch nicht beschränkt auf den Verlust von Daten, Genauigkeit oder Kompatibilität mit anderen Programmen) durch die betreffende Software und/oder die Verwendung der betreffenden Software aus.

# Acuerdo de licencia de usuario final para el software del proyector

El software incluido en el proyector consta del número plural de módulos de software independientes y contamos con nuestro derecho de reproducción y/ o los derechos de reproducción de terceros para cada uno de los módulos del software. El proyector también utiliza módulos de software que hemos desarrollado y/o producido. Contamos con derechos de reproducción y propiedad intelectual para cada uno de los software y elementos relacionados, incluidos, a título de ejemplo, los documentos relacionados con el software.

Los derechos de arriba están protegidos por la ley de derechos de reproducción y otras leyes aplicables. Y el proyector utiliza módulos de software con licencia como freeware en la GNU General Public License Version 2 y la GNU Lesser General Public License Version 2.1 establecida por Free Software Foundation, Inc. (EE.UU.) o acuerdos de licencia para cada software.

Consulte los acuerdos de licencia de dichos módulos de software y otro software en la siguiente página Web.

Dirección de la página Web: http://av.hitachi.com/projector/index.html

Si tiene alguna duda sobre el software otorgado bajo licencia, póngase en contacto con su distribuidor. Para conocer los detalles de las condiciones de licencia y otras cosas, consulte los acuerdos de licencia de cada software en las siguientes páginas (\$\top215\$-) y los acuerdos de licencia de cada software en la página Web. (Como los siguientes acuerdos de licencia han sido establecidos por un tercero diferente a nosotros, se indican en su original, en inglés.)

Como la licencia del programa (el módulo de software) se concede gratuitamente, el programa se ofrece sin garantías de ningún tipo, bien expresas o implícitas, en la medida permitida por la ley aplicable. Y no aceptamos ninguna responsabilidad ni compensamos por pérdidas de ningún tipo (incluido, a título de ejemplo, pérdida de datos, pérdida de precisión o pérdida de compatibilidad con interfaz entre otros programas) por parte del software en cuestión y/o la utilización del software en la medida permitida por la ley aplicable.

## Accordo di licenza dell'utente finale per il software del proiettore

Il software del proiettore è costituito da diversi moduli software indipendenti, su ognuno dei quali sussiste il nostro copyright e/o i copyright di terzi. Inoltre, il proiettore utilizza moduli software sviluppati e/o prodotti da noi. Il nostro copyright e la nostra proprietà intellettuale si applicano a ciascuno di questi software e ai prodotti annessi, compresi, ma non limitati, ai documenti relativi ai software.

I diritti di cui sopra sono tutelati dalla legge sul copyright e dalle altre leggi applicabili. Il proiettore utilizza moduli software concessi in licenza come freeware in conformità alla GNU General Public License Version 2 e alla GNU Lesser General Public License Version 2.1, stabilite dalla Free Software Foundation, Inc. (Stati Uniti) o dagli accordi di licenza per ciascun software.

Consultare la seguente pagina web per gli accordi di licenza relativi a tali moduli software e ad altri software.

Indirizzo pagina web: http://av.hitachi.com/projector/index.html

Rivolgersi al rivenditore per ulteriori informazioni riguardanti il software concesso in licenza. Consultare gli accordi di licenza di ciascun software alle seguenti pagine (\$\mathbb{\pi}\$15 -) e gli accordi di licenza di ciascun software sulla pagina web per informazioni sulle condizioni di licenza e così via. (Siccome i seguenti accordi di licenza sono stabiliti da un terzo e non da noi, sono riportati nella versione originale in lingua inglese.)

Siccome il programma (il modulo software) è concesso in licenza a titolo gratuito, il programma viene fornito così com'è, senza garanzia di alcun tipo, né espressa né implicita, nei limiti consentiti dalla legge applicabile. Inoltre, non ci assumiamo responsabilità alcuna e non provvederemo ad alcun risarcimento per qualsivoglia perdita (compresa, ma non limitata a, perdita di dati, perdita di precisione o perdita di compatibilità con l'interfaccia tra altri programmi) risultante dal software in oggetto e/o dall'utilizzo di tale software, nei limiti consentiti dalla legge applicabile.

### Avtale om sluttbrukerlisens for projektorens programvare

Programvaren i projektoren består av flere uavhengige programvaremoduler og våre opphavsrettigheter og/eller tredjeparts opphavsrettigheter finnes for hver slik programvaremodul. Projektoren bruker også programvaremoduler som vi har utviklet og/eller laget. Og våre opphavsrettigheter og åndsverk for hver slik programvare og relaterte enheter inkludert, men ikke begrenset til programvarerelaterte dokumenter finnes.

Rettighetene over er beskyttet av lover om opphavsrettighet og andre tilgjengelige lover. Og projektoren bruker programvaremoduler som er lisensiert under GNU General Public Lisence Version 2 og GNU Lesser General Public Version 2.1, etablert av Free Software Foundation, inc (U.S.A) eller lisensavtaler for hver programvare.

Se den følgende websiden for lisensavtaler for slike programvaremoduler og annen programvare.

Webadresse: http://av.hitachi.com/projector/index.html

Kontakt din forhandler for innspill angående lisensiert programvare. Se lisensavtalene for hver programvare i de følgende sidene (\$\mathbb{Q}\$ 15 -) og lisensavtalene for hver programvare på websiden for detaljer om lisensforholdene og så videre. (Ettersom de følgende lisensavtalene er etablert av en tredjepart er de oppgitt på originalspråket engelsk).

Fordi programmet (Programvaremodulen) er lisensiert gratis, er programmet utgitt uten noen garanti, enten uttrykt eller underforstått, i den utstrekning loven tillater. Og vi tar intet ansvar eller kompenserer for noe tap (inkludert, men ikke begrenset til tap av data, tap av nøyaktighet eller kompatibilitetstap med grensesnittet mellom andre programmer) av programvaren det gjelder og/eller bruk av programvaren det gjelder i den utstrekning loven tillater.

## Gebruiksrechtovereenkomst (EULA) voor de projectorsoftware

De software in de projector bestaat uit verschillende onafhankelijke softwaremodules waarop ons auteursrecht en/of dat van derden is gevestigd. De projector gebruikt ook softwaremodules die wij hebben ontwikkeld en/of geproduceerd. En op zulke software en aanverwante producten, maar niet beperkt tot documenten die betrekking hebben op software, is ook ons auteursen intellectuele eigendomsrecht gevestigd.

Bovenstaande rechten worden beschermd door de wet inzake auteursrecht en ander toepasselijk recht. En de projector gebruikt softwaremodules die staan geregistreerd als freeware volgens GNU General Public License Version 2 en GNU Lesser General Public License Version 2.1 van Free Software Foundation, Inc. (VS) of gebruiksrechtovereenkomsten voor elke software.

Raadpleeg de volgende webpagina voor de gebruiksrechtovereenkomsten betreffende zulke softwaremodules en andere software.

Webpagina: http://av.hitachi.com/projector/index.html

Neem contact op met uw dealer voor inlichtingen betreffende software waarop een gebruiksrecht is gevestigd. Raadpleeg de gebruiksrechtovereenkomsten van alle software op de volgende pagina's (\$\top215\)-) en gebruiksrechtovereenkomsten van alle software op de webpagina voor meer details over de gebruiksvoorwaarden enz. (Aangezien de volgende gebruiksrechtovereenkomsten niet door ons, maar door derden werden opgesteld, zijn ze oorspronkelijk opgesteld in de Engelse taal.)

Omdat het programma (de softwaremodule) een gratis gebruiksrecht heeft, wordt het programma zo ter beschikking gesteld zonder enige garantie, uitdrukkelijk noch impliciet, voor zover bij wet toegestaan. En we aanvaarden geen aansprakelijkheid noch betalen een schadevergoeding uit voor eventueel verlies (inclusief, maar niet beperkt tot verlies van gegevens, nauwkeurigheid of compatibiliteit met interface tussen andere programma's) door de respectieve software en/of het gebruik van de respectieve software voor zover bij wet toegestaan.

## Contrato de licença do utilizador final para o software do projector

Software no projector consiste no número plural de módulos de software independentes e aí residem os nossos direitos de autor e/ou direitos de autor de terceiros para cada um desses módulos de software. O projector também utiliza módulos de software que desenvolvemos e/ou produzimos. E aí residem os nossos direitos de autor e propriedade intelectual para esse software e itens relacionados mas não limitados aos documentos relacionados com o software.

Os direitos acima estão protegidos pela lei de direitos de autor e outras leis aplicáveis. E o projector utiliza módulos de software licenciados como freeware de acordo com GNU General Public License Version 2 e GNU Lesser General Public License Version 2.1 estabelecidas pela Free Software Foundation, Inc. (E.U.A.) ou contratos de licença para cada software.

Consulte a página de Internet seguinte para contratos de licença para tais módulos de software e outro software.

Endereço da página de Internet: http://av.hitachi.com/projector/index.html

Em caso de dúvidas, contacte o seu revendedor relativamente ao software licenciado. Consulte os contratos de licença de cada software nas páginas seguintes (\$\mathbb{\text{15}}\$-) e contratos de licença de cada software na página de Internet para detalhes sobre as condições da licença e assim por diante. (Uma vez que os contratos de licença seguintes são estabelecidos por terceiros, estes são declarados no inglês original.)

Uma vez que o programa (módulo de software) é licenciado gratuitamente, o programa é fornecido tal como está sem qualquer tipo de garantia, expressa ou implícita, até ao limite permitido pela lei aplicável. E não nos responsabilizamos nem compensamos por qualquer tipo de perda (incluindo mas não limitado a perda de dados, perda de precisão ou perda de compatibilidade com a interface entre outros programas) pelo software em questão e/ou utilização do software em questão até ao limite permitido pela lei aplicável.

### 投影机软件的终端用户许可协议

投影机的软件包含多个独立软件模块,每个软件模块均拥有我们的版权和/或第三方的版权。 投影机还使用我们开发或/和制造的软件模块。 各软件和相关产品均拥有我们的版权和知识产权,包括但不仅限于软件相关文档。

以上权利受版权法律和其他适用法律的保护。 基于 Free Software Foundation, Inc. (U.S.) 制定的 GNU General Public License Version 2 和 GNU Lesser General Public License Version 2.1 或者各软件的许可协议,投影机使用的软件模块作为自由软件许可使用。

有关这些软件模块和其他软件的许可协议,请参阅以下网页。

网页地址: http://av.hitachi.com/projector/index.html

请联系您的经销商了解许可软件的相关问题。 有关许可条件等问题的详情,请参阅以下各页 (**1**15-) 中各软件的许可协议以及网页上各软件的许可协议。(由于以下许可协议由第三方而非我们制定,这些协议以英文原文陈述。)

程序(软件模块)的许可使用并不收费,因此在适用法律允许的范围内,提供程序时我们不作任何明示或暗示的保证。 在适用法律许可的范围内,对于相关软件和/或相关软件的使用导致的任何损失(包括但不仅限于数据丢失、精确性降低或无法与其他程序界面兼容),我们不承担责任或赔偿。

## Slutanvändarlicensavtal för projektorns programvara

Programvaran i projektorn består av flera olika oberoende programvarumoduler och vår upphovsrätt och/eller tredje parts upphovsrätter existerar för var och en av dessa programvarumoduler. Projektorn har även programvarumoduler som har utvecklats och/eller skapats. Vår upphovsrätt och intellektuell egendom existerar för var och en av sådana programvaror och relaterade föremål, inklusive, men inte begränsat till, programvarans relaterade dokument.

Ovanstående rättigheter skyddas av upphovsrättslag och andra tillämpliga lagar. Projektorn använder programvarumoduler som är licensierade som gratisprogram enligt GNU General Public License Version 2 och GNU Lesser General Public License Version 2.1 utvecklade av Free Software Foundation, Inc. (USA.) eller licensavtal för varje programvara.

Se följande webbsida för licensavtal för sådana programvarumoduler och andra programvaror.

Webbsida: http://av.hitachi.com/projector/index.html

Kontakta din återförsäljare för frågor angående licensierad programvara. Se licensavtal för varje programvara på följande sidor (\$\mathbb{Q}\$ 15 -) och licensavtal för varje programvara på webbsidan för detaljer om licensvillkor och så vidare. (Eftersom följande licensavtal upprättats av en tredje part och inte av oss, är originaltexten på engelska.)

Eftersom programmet (programvarumodulen) är licensierad som gratisprogram, levereras programmet i befintligt skick utan någon typ av garanti, vare sig uttryckt eller underförstådd, till den omfattning som är tillåtet enligt tillämplig lag. Vi åtar oss inget ansvar eller kompensation för förlust av något slag (inklusive men inte begränsat till förlust av data, exakthet eller kompabilitet med gränssnitt mellan andra program) för den programvara som avses och/eller bruk av den programvara som avses till den omfattning som är tillåtet enligt tillämplig lag.

License Agreement

### **Лицензионное соглашение с конечным пользователем об использовании программного обеспечения проектора**

Программное обеспечение проектора состоит из нескольких самостоятельных модулей программного обеспечения; при этом авторские права и/или авторские права третьих сторон существуют в отношении каждого из подобных модулей программного обеспечения. Проектор также использует программное обеспечение, разработанное и/или предоставленное нашей компанией. Мы располагаем авторскими правами и правами на интеллектуальную собственность в отношении каждого подобного программного обеспечения и связанных с ним материалов, включая, в частности, документацию по программному обеспечению.

Вышеуказанные права защищаются законом об авторских правах и другими применимыми законами. Проектор также использует модули программного обеспечения, распространяемые бесплатно в соответствии с GNU General Public License Version 2, и GNU Lesser General Public License Version 2.1, используемыми компанией Free Software Foundation, Inc. (США) или лицензионными соглашениями на каждое программное обеспечение.

Лицензионные соглашения для подобных модулей программного обеспечения и другого программного обеспечения приведены на следующей вебстранице.

Адрес веб-страницы: http://av.hitachi.com/projector/index.html

Информацию о лицензированном программном обеспечении можно получить у дилера. Подробные данные по условиям лицензирования и другим вопросам приведены в лицензионных соглашениях по каждому программному обеспечению, приведенных на следующих страницах (ш15-), и лицензионных соглашениях по каждому программному обеспечению, приведенных на веб-странице. (Поскольку следующие лицензионные соглашения предоставлены третьими сторонами, приводятся их оригинальные тексты на английском языке.)

Поскольку программа (модуль программного обеспечения) предоставляется бесплатно, она предоставляется на условиях "как есть", без каких- либо прямых или косвенных гарантий какого-либо рода в той степени, в которой это разрешается применимым законодательством. Мы также не несем ответственности и не предоставляем компенсаций за какие-либо потери (включая, в частности, потерю данных, искажение или отсутствие совместимости интерфейса с другими программами) соответствующего программного обеспечения и/или за использование соответствующего программного обеспечения в той степени, в которой это разрешается применимым законодательством.

### Projektoriohjelmiston käyttöoikeussopimus

Projektorin ohjelmisto koostuu useista itsenäisistä ohjelmistomoduuleista, jotka on suojattu yrityksemme ja/tai kolmannen osapuolen tekijänoikeuksilla. Projektori käyttää myös ohjelmistomoduuleja, jotka olemme kehittäneet ja/tai tuottaneet. Kukin ohjelmisto ja niihin liittyvät osat, mukaan lukien mutta ei rajoittuen ohjelmistoon liittyvät asiakirjat, on suojattu tekijänoikeuksilla ja immateriaalioikeuksilla.

Edellä mainitut oikeudet on suojattu tekijänoikeuslailla ja muilla soveltuvilla lailla. Projektori käyttää Free Software Foundation, Inc:n (USA) ilmaisohjelmistomoduuleja GNU General Public License Version 2 ja GNU Lesser General Public License Version 2.1 tai kunkin ohjelmiston lisenssisopimuksia.

Seuraavalta verkkosivulta saat lisätietoja kyseisten ohjelmistomoduulien ja muiden ohjelmistojen lisenssisopimuksista.

Verkkosivun osoite: http://av.hitachi.com/projector/index.html

Ota yhteys myyjään saadaksesi tietoa käyttöoikeuksin suojatusta ohjelmistosta. Katso kunkin ohjelmiston käyttöoikeussopimus seuraavilta sivuilta (\*\*\textit{15}\textit{-}) ja käyttöoikeussopimusten yksityiskohtaiset tiedot kunkin ohjelmiston verkkosivuilta. (Seuraavat käyttöoikeussopimukset ovat vain englanniksi, koska ne ovat kolmannen osapuolten sopimuksia.)

Koska ohjelma (ohjelmistomoduuli) on ilmaisohjelmisto, se toimitetaan sellaisenaan ilman minkäänlaista suoraa tai epäsuoraa takuuta sovellettavan lain sallimissa rajoissa. Emme ota vastuuta tai korvaa mitään menetystä (mukaan lukien mutta ei rajoittuen tietojen menetystä, tarkkuuden menetystä tai muiden ohjelmien välisen yhteensopivuuden menetystä) ohjelmiston osalta ja/tai ohjelmiston käytön osalta sovellettavan lain sallimissa rajoissa.

## Umowa licencyjna użytkownika końcowego oprogramowania projektora

Oprogramowanie projektora składa się z pewnej liczby niezależnych modułów oprogramowania a każdy z takich modułów jest objęty naszym prawem autorskim lub prawem autorskim strony trzeciej. Projektor korzysta również z modułów oprogramowania, które stworzyliśmy i/lub wyprodukowaliśmy. Każde takie oprogramowanie oraz powiązane elementy włączając, ale nie ograniczając się do, dokumentacji oprogramowania, objęte jest prawem autorskim i prawami własności intelektualnej.

Powyższe prawa są chronione prawem autorskim i innymi mającymi zastosowanie prawami. Ponadto projektor korzysta z bezpłatnych modułów oprogramowania licencjonowanych na zasadzie GNU General Public License Version 2 i GNU Lesser General Public License Version 2.1 ustanowionych przez Free Software Foundation, Inc. (U.S.) lub porozumień licencyjnych dla poszczególnych programów.

Umowy licencyjne dla takich modułów oprogramowania oraz innego oprogramowania można znaleźć na poniższej stronie internetowej.

Adres strony internetowej: http://av.hitachi.com/projector/index.html

Pytania dotyczące licencjowanego oprogramowania można kierować do swojego sprzedawcy. Szczegóły warunków licencji oraz podobne informacje dotyczące umów licencyjnych dla każdego oprogramowania można znaleźć na następujących stronach (\$\subseteq\$15 -) lub na stronach internetowych. (Ponieważ następujące umowy licencyjne zostały sporządzone prze strony trzecie, pozostają w oryginalnym języku angielskim.)

Ponieważ ten program (moduł oprogramowania) jest na bezpłatnej licencji, dostarczany jest bez żadnych gwarancji, jasno wyrażonych lub implikowanych, w pełnym zakresie dopuszczonym prawem. Nie bierzemy żadnej odpowiedzialności ani nie rekompensujemy żadnych strat (włączając ale nie ograniczając się do utraty danych, utraty precyzji lub utraty kompatybilności pomiędzy innymi programami) spowodowanych przez rzeczone oprogramowanie i/lub wykorzystanie rzeczonego oprogramowania w zakresie dopuszczonym przez mające zastosowanie prawo.

#### **GNU GENERAL PUBLIC LICENSE Version 2, June 1991**

Copyright © 1989, 1991 Free Software Foundation, Inc.

51 Franklin St. Fifth Floor, Boston, MA 02110-1301 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

#### Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software—to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

#### GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language.

(Hereinafter, translation is included without limitation in the term

"modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty, keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

- 2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:
  - You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
  - b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
  - c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part requiredless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the

ENGLISH

SUO

POL SKI other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machinereadable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

- 4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.
- 5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.
- 6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.
- 7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you

cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all.

For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be torefrain entirely from distribution of the Program. If any portion of this section is held invalid or unenforceable underany particular circumstance, the balance of the section is intended toapply and the section as a whole is intended to apply in othercircumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

- 8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.
- 9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### **NO WARRANTY**

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

#### **End User License Agreement for the Projector Software**

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

**END OF TERMS AND CONDITIONS** 

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and chance under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>

Copyright © <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin St. Fifth Floor, Boston.

MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Gnomovision version 69, Copyright © year name of author Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'. This is free software, and you are welcome to redistribute it under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items-- whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the

program 'Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989 Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

#### Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software—to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages—typically libraries—of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The

ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing nonfree programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries in this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in nonfree programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/ Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

#### GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code

means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee

- You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:
  - a) The modified work must itself be a software library.
  - b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
  - c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
  - d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful. (For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If dentifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General

Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

> SUO MI

SKI

- a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)
- b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.
- Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.
- d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.
- e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

- 7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:
  - a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.
  - b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.
- 8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License, they do not distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

- 12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.
- 13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns. Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.
- 14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For

software which is copyrighted by the Free Software Foundation. write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE. YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL. SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE). EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

#### **END OF TERMS AND CONDITIONS**

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does >

Copyright © <vear> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and naner mail

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names: Yoyodyne, Inc., hereby disclaims all copyright interest in the library 'Frob' (a library for tweaking knobs) written by James Random Hacker.
